Appendix 5 Data Search Report

EXECUTIVE SUMMARY

A Preliminary Ecological Appraisal and Daytime Building Inspection for bats has been carried out at Land off Gronant Road, Prestatyn on 10th October 2022 by Lizzie Atkinson. The assessment comprised a desk study and biological records search, as well as a site walkover survey in order to map habitat types. The survey was extended to assess the potential for protected species to use the site. The assessment provides baseline data as to current site conditions and where appropriate allows recommendations to be made in respect of further potential work in order to satisfy current wildlife legislation.

Assessed against the '*Guidelines for Ecological Impact Assessment in the UK and Ireland*' 2nd edition (2018), the habitats range in ecological value from negligible to within the zone of influence of the site. Habitats will be lost to the proposals, however as the habitats to be lost to the proposals are small in area and not of high ecological value it is considered that their loss can be mitigated for and the proposals will not adversely affect the ecological value of the wider area, provided the recommendations detailed below are followed.

Bat surveys are conducted in accordance with the Bat Surveys for Professional Ecologists - Good Practice Guidelines, published 2016 (the Guidelines). Strict adherence to these is not necessary, but where practice deviates from them, clear reasons and rationale are required.

The site comprises agricultural buildings and sheds which are surrounded by hardstanding that has become encroached with scrub, short perennial and tall ruderal vegetation throughout. Semi-improved grassland lies within the north and east of the site of the site and species poor hedgerow lines eastern and southern site boundaries and scattered trees are present throughout.

If the recommendations below are followed these species will not be adversely affected by the proposals.

- If works have not begun by October 2023, an updated site visit will be required to assess the habitats within the site;
- A minimum of three nocturnal bat surveys on building B3 between May and September (with at least one to occur between May and August) to determine if bats are using the buildings as a roost;
- A minimum of two nocturnal bat surveys on building B1 between May and September (with at least one to occur between May and August) to determine if bats are using the buildings as a roost;
- A minimum of one nocturnal bat survey on building B5 between May and August to determine if bats are using the buildings as a roost;
- An updated survey for barn owl is recommended to inspect building B3 for any evidence of barn owl activity any further inform proposals;
- Production and implementation of a Construction Environmental Management Plan (CEMP) during the works;
- Further surveys for badger and the deployment of camera traps to assess the extent of badger use within the site;
- Sensitive lighting to be used to meet Bat Conservation Trust lighting guidance so not to cause detrimental effect to light sensitive species;
- No work to be undertaken at B1 between the start of May and the end of July/early August to allow any swallows to nest without disruption;
- Production and implementation of a hedgehog RAMS to avoid any harm to this species during the proposed works;
- Production and implementation of a badger RAMS to avoid any harm to this species during the proposed works;
- Implementation of an amphibian RAMS (section 5.2) to avoid any harm to this species during the proposed works;
- Vegetation clearance, pruning and building works should be undertaken outside of the nesting bird season (1st March to 31st August Inclusive) to avoid any impact on breeding birds. Or a nesting bird check undertaken by a suitably experienced ecologist should be undertaken immediately prior to works commencing;
- Production of an invasive species method statement to avoid the spread of cotoneaster (TN4) into the wider landscape during the proposed works;
- Enhancing the site for species through appropriate landscape planting that includes native, species rich hedgerows, trees and areas of wildflowers plus provision of integrated bat and bird features within newly constructed buildings; and
- Production of a Management Plan to ensure the long-term commitments to manage the planting, protection and enhancement of biodiversity in and around a new development site.

The site provides habitat for nesting birds, badger, hedgehog, amphibians and bats. Habitats on site will be lost to the proposals. There is likely to be low impacts on the local ecology due to the proposals if the recommendations within section 6 are implemented.

1.0 Introduction

Ascerta has been instructed by Castle Green Homes to carry out a Preliminary Ecological Appraisal and Daytime Building Inspection of Land off Gronant Road, Prestatyn (hereafter referred to as the site). The site OS grid reference is SJ 077 831 and the What3Words reference is nets.incisions.landlords. The extent of the site is displayed in photograph 1.1 below.

Photograph 1.1: Extent of site

The site was visited on 10th October 2022 by Lizzie Atkinson when a Preliminary Ecological Appraisal and Daytime Building Inspection, which includes an assessment of the potential for protected species to be using the site or surroundings, was carried out in accordance with the *Handbook for Phase 1 Habitat Survey: a Technique for Environmental Audit (JNCC, 2010)*. The report was prepared following methods detailed in the CIEEM *'Guidelines for Ecological Impact Assessment in the UK and Ireland'* (2018) and *'Guidelines for Ecological Report Writing'* (2017). This report presents the results of the survey including evaluation of habitats on site and potential for protected species to be using the site. The report includes recommendations for further actions where applicable in order to satisfy current wildlife legislation and to achieve our client's objectives. Relevant legislation is detailed within Appendix 4.

The site comprises agricultural buildings and sheds which are surrounded by hardstanding that has become encroached with scrub, short perennial and tall ruderal vegetation throughout. Semi-improved grassland lies within the north and east of the site and species poor hedgerow lines eastern and southern site boundaries and scattered trees are present throughout.

Our client seeks planning consent to redevelop the site with 45 residential dwellings and associated access roads and area of Public Open Space (POS).

2.0 Objectives

Our client's objectives are to assess the potential ecological constraints of the proposed development site.

Our objectives are as follows:

- Identify and evaluate any features of ecological value and the potential of the site to support protected species based on the walkover survey and biological records search;
- Identify designated sites within 2km of the site;
- Review protected species records within 2km of the site;
- Map the habitats within the site using JNCC (2010) methods;
- Provide recommendations for further species-specific surveys and mitigation measures where current legislation requires;
- Provide recommendations that seek to enhance the ecological value of the site;
- Provide recommendations to assist our clients in achieving their objectives whilst satisfying current wildlife legislation.

3.0 Survey Methods

The Preliminary Ecological Appraisal and Daytime Building Inspection involved the collection and review of data from a desk study and field survey along with assessment of the value of the habitats following CIEEM guidelines.

3.1 Desk Study

A review of the designated sites and habitats within 2km of the site has been undertaken in November 2022 using the Multi-Agency Geographic Information for the Countryside (MAGIC) and the Natural Resources Wales websites.

A review of UK and Local priority species and habitats known to occur within 2km of the site has been undertaken in November 2022; using the Joint Nature Conservation Committee website, Multi-Agency Geographic Information for the Countryside (MAGIC) and local records from Cofnod North Wales Environmental Information Service (Appendix 5).

3.2 Field Survey

A walkover survey of the site was conducted on 10th October 2022 by Lizzie Atkinson when the habitat types and features of ecological interest were identified and mapped in compliance with the Handbook for Phase 1 Habitat Survey: A Technique for Environmental Audit (*JNCC, 2010*). The survey methods involve the recording and mapping of all habitat types and ecological features present on site, including the identification of the main species present and examination of the potential for any protected species. Habitats were mapped and target notes made for any interesting features.

The surveys particularly focused on the following species and habitat features:

- Mammals (badgers, bats);
- Birds;
- Amphibians and reptiles;
- Invertebrates;
- Hedgerows and boundaries;
- Invasive plant species; and
- Plant communities and trees.

Weather conditions during the survey were mild (14°C), dry and sunny (2/8 cloud cover) with a F2 (Beaufort Scale) light breeze, therefore appropriate for this type of survey.

3.3 Bat Survey Methods

The survey methods followed the guidelines set out by the Bat Conservation Trust Bat Surveys for Professional Ecologists Good Practice Guidelines – 3rd Edition (2016). Habitats, buildings and trees were assessed for suitability for use by bats and categorised independently using table 4.1 page 35 within the Bat Conservation Trust Guidelines (Collins, 2016).

Preliminary Ecological Appraisal for Bats

Habitats on site were assessed for their suitability for bats to use them for roosting, commuting and foraging both on the site and surrounding area. Commuting and foraging habitat suitability was categorised **low** to **high**. Commuting and foraging habitat valued as **moderate** or above may need further survey effort if lost to the proposals.

Preliminary Roost Assessment Trees

All trees were briefly inspected for Potential Roost Features (PRFs). Features searched for included: Natural or woodpecker holes, cracks/splits in major limbs, loose bark, hollows/cavities, dense epicormic growth, bird and bat boxes. Where such features were found they were investigated for scratches or staining, bat droppings and smoothing of surfaces around entry points. Trees assigned a suitability of **moderate** or above may require further inspection if they are to be lost to the development.

External Inspection of the Building

A daytime external inspection of the buildings was carried out during the survey by a suitably experienced ecologist. The buildings were searched externally looking for signs of bats, including staining on barge boards, soffits and more commonly droppings on flat surfaces i.e. window ledges that would indicate potential roosting sites. Possible bat access points such as loose tiles, cracks and crevices or crawl spaces beneath and/or behind roofing materials such as roofing felt, panelling, soffits and tiles were identified and checked for signs of use by bats, for example droppings, scratch marks and staining.

The building was categorised as per Table 4.1 (below). Buildings assigned a suitability of **Low** or above may require further inspection if they are to be lost to the development.

Table 4.1: Guidelines for assessing Potential Roost Features (PRFs), commuting and foraging habitat within a proposed development site. Guidelines taken from table 4.1 page 35 of the Bat Conservation Trust Bat Surveys for Professional Ecologists Good Practice Guidelines – 3rd Edition (2016).

Suitability	Roosting Habitats	Commuting and Foraging Habitats
Negligible	<i>Negligible habitat features on site likely to be used by roosting bats.</i>	<i>Negligible habitat features on site likely to be used by commuting or foraging bats.</i>
Low	<p><i>A structure with one or more potential roost sites that could be used by individual bats opportunistically. However, these potential roost sites do not provide enough space, shelter, protection, appropriate conditions ^a and/or suitable surrounding habitat to be used on a regular basis or by larger numbers of bats (i.e. unlikely to be suitable for maternity or hibernation ^b).</i></p> <p><i>A tree of sufficient size and age to contain PRFs but with none seen from the ground or features seen with only very limited roosting potential. ^c</i></p>	<p><i>Habitat that could be used by small numbers of commuting bats such as a gappy hedgerow or unvegetated stream, but isolated, i.e. not very well connected to the surrounding landscape by other habitat.</i></p> <p><i>Suitable, but isolated habitat that could be used by small numbers of foraging bats such as a lone tree (not in a parkland situation) or a patch of scrub.</i></p>
Moderate	<i>A structure or tree with one or more potential roost sites that could be used by bats due to their size, shelter, protection, conditions^a and surrounding habitat but unlikely to support a roost of high conservation status (with respect to roost type only – the assessments in this table are made irrespective of species conservation status, which is established after presence is confirmed).</i>	<p><i>Continuous habitat connected to the wider landscape that could be used by bats for commuting such as lines of trees and scrub or linked back gardens.</i></p> <p><i>Habitat that is connected to the wider landscape that could be used by bats for foraging such as trees, scrub, grassland or water.</i></p>
High	<i>A structure or tree with one or more potential roost sites that are obviously suitable for use by larger numbers of bats on a more regular basis and potentially for longer periods of time due to their size, shelter, protection, conditions ^a and surrounding habitat.</i>	<p><i>Continuous, high-quality habitat that is well connected to the wider landscape that is likely to be used regularly by commuting bats such as river valleys, streams, hedgerows, lines of trees and woodland edge.</i></p> <p><i>High-quality habitat that is well connected to the wider landscape that is likely to be used regularly by foraging bats such as broadleaved woodland, tree-lined watercourses and grazed parkland.</i></p> <p><i>Site is close to and connected to known roosts.</i></p>

^a For example, in terms of temperature, humidity, height above ground level, light levels or levels of disturbance.

^b Evidence from the Netherlands shows mass swarming events of common pipistrelle bats in the autumn followed by mass hibernation in a diverse range of building types in urban environments (Korsten et al., 2015). This phenomenon requires some research in the UK but ecologists should be aware of the potential for larger numbers of this species to be present during the autumn and winter in large buildings in highly urbanised environments.

^c This system of categorisation aligns with BS 8596:2015 Surveying for bats in trees and woodland (BSI,2015).

3.4 Badger Survey Methods

The site was searched for setts and badger field signs including foraging areas, latrines and tracks. Attention was paid to the presence of the following field signs:

- Setts: single holes or a series of holes likely to be interconnected underground;
- Latrines: badgers usually deposit faeces in excavated pits;
- Paths and footprints;
- Scratching posts: at the base of trees;
- Snuffle holes: areas where badgers have searched for insects;
- Day nest: bundles of vegetation where badgers may sleep above ground; and
- Traces of hair.

3.5 Evaluation

Habitats and species on the site were evaluated following the '*Guidelines for Ecological Impact Assessment in the UK and Ireland*' 2018. A geographical frame of reference is assigned to each habitat and species, with International Value being most important, then National, Regional, County, District, Local and lastly, within the immediate Zone of Influence (Zoi) of the proposals only.

Value judgements are based on characteristics that can be used to identify ecological resources or features likely to be important in terms of biodiversity. These include site designations such as SSSIs. For undesignated features, the size, conservation status (locally, nationally or internationally), and the quality of the ecological resource are considered. Ecological resource quality can refer to habitats (for instance if they are particularly diverse, or a good example of a specific habitat type), other features (such as wildlife corridors or mosaics of habitats) or species populations or assemblages.

Although we cannot assess the survey findings fully in relation to the Environment Act and Biodiversity Metric, the recommendations detailed within this report aim to meet requirements of the Environment Act and Biodiversity Metric 3.1 as far as possible at this stage.

3.6 Limitations

The site visit was undertaken in October. Although this within the sub-optimal time of year for phase 1 habitat surveys, sufficient vegetation was present to enable habitat identification. It is not considered a limit to the conclusions of the report based on the habitats found within the site and the works proposed.

Access to carry out a full internal inspection of all the building B1 was not available. Buildings B2, B3, B4, B5, B6, B7, B8 and B9 could partially be viewed through open entrances. The loft of building B3 could not be inspected due to safety restrictions. Access was also restricted to the west of buildings B4 and B6 was restricted due to overgrown dense scrub. These access restrictions are taken into account within the report conclusions.

The daytime building inspections were undertaken at a time of year when bats are less active. Signs of bats including droppings and feed remains and less likely to present within hibernation months.

The absence of biological records does not necessarily mean the absence of species. This has been taken into account within the report conclusions.

The site was visited on only one occasion. This produces a snapshot of habitats and species on the site and others may be present at different times of the day or year. This limitation has been taken into account within this report.

4.0 Survey Results

4.1 Desk Study

Five statutory sites and seven non statutory sites were identified within a 2km radius of the proposed development site.

The following statutory sites were identified within the vicinity of the proposals (with approximate distance and direction from the site):

- The Dee Estuary (Wales) Ramsar Site/ Site of Special Scientific Interest (SSSI)/ Special Protected Area (SPA) Special Area of Conservation (SAC), 250m north;
- Gronant Dunes and Talacre Warren SSSI, 1km north;
- Gronant Dunes Local Nature Reserve (LNR), 1km north;
- Prestatyn Hillside SSSI, 1.1km south-west;
- Teilia Quarry SSSI, 1.7km south

The following non-statutory sites were identified within the vicinity of the proposals (with distance and direction from the site):

- Y Morfa Local Wildlife Site (LWS), 1.35km west;
- Prestatyn Golf Links LWS, 700m north;
- The Dingle LWS, 250m south-east;
- Coed Bell LWS, 520m east;
- Top y Nant Woods, 600m south-west;
- Home and Stoney Woods LWS, 1.5km south-east; and
- Gronant Verge LWS, 1.4km north-east.

The site lies immediately north of an Area of Outstanding Natural Beauty (AONB).

The site does not lie within a Natural Resources Wales SSSI Impact Risk Zone as mapped on Magic Maps.

Following a review of records held by the Cofnod North Wales Environmental Information Service, several priority species that have the potential to occur within the vicinity of the proposed development have been identified. These include birds, bats, badger, reptiles, water vole, brown hare, otter, hedgehog and amphibians. The species records are summarised below, and the detailed records held by Cofnod North Wales Environmental Information Service within 2km of the site are displayed within Appendix 5.

No species records were returned by Cofnod North Wales Environmental Information Service within the site boundary.

Birds

One hundred and seventy-seven bird species records were returned for bird species within 2km of the site. Species present whooper swan, pink footed goose, kingfisher, skylark, curlew, peregrine, kestrel, barn owl and oystercatcher. The closest record was in 2021 for a buzzard located 180m east of the site, south of Gronant Road. The most recent record was in March 2021 for a sparrowhawk located 333m south-west of the site within a residential area.

Bats

Forty records of bats were returned within 2km of the site. Twelve records were for pipistrelle bat species, ten for unknown bat species, eight for common pipistrelle, two for soprano pipistrelle, two for brown long eared bat, one for noctule bat, one for unknown myotis bat species, one for daubenton's bat, one for whiskered/brandt's bat, one for natterer's bat and one for lesser horseshoe bat. The most recent records were in 2019 for noctule, common pipistrelle and soprano pipistrelle located 1.1km south-west of the site within Prestatyn Hillside SSSI. The closest record was in 1997 for a pipistrelle bat species located 588m south-west of the site within a residential area.

Amphibians

One hundred and two records of amphibians were returned within 2km of the site. Seven records for common frog, sixty-six for natterjack toad, twelve for smooth newt, thirteen for common toad, one for palmate newt, one for great crested newt (GCN) and two for newt species. The closest record was in 1985 for a common frog located 376m north of the site within Nant Hall Hotel Grounds. The most recent record was in June 2022 for two unknown newt eggs located 980m north-west of the site with a pond.

Reptiles

Three hundred and eleven records of reptiles were returned within 2km of the site. Two hundred and thirty-nine records were for common lizard, seventy for sand lizard, one for grass snake and one for adder. The closest record was in 2019 for a common lizard located 832m north-west of the site adjacent to Prestatyn Golf Links LWS. The most recent record was in June 2022 for a common lizard located 1.1km north-west of the site within Barkby Dunes.

Terrestrial mammals

Mammal records included ten records for otter, twenty-eight records for water vole, forty-five for badger and forty-seven for hedgehog.

No European Protected Species Licence (EPSL) applications within 2km of the site since 2016 were identified using Magic Maps.

A list of key habitats is shown in table 5.1 below and a summary description of key habitats within the site is provided in Section 5.2. Notes on the presence or potential presence of protected species are provided in Section 5.3. The Phase 1 Habitat map can be found in Appendix 1. The Target Notes (TN) and lists of species recorded during survey are presented in Appendix 2.

4.2 Habitat Survey

The site lies on the outskirts of Prestatyn, approximately one mile east of the town centre and is bound by Gronant Road to the south, residential dwellings to the west and north and agricultural land to the east. The onsite habitats comprise agricultural buildings and sheds which are surrounded by hardstanding that has become encroached with scrub, short perennial and tall ruderal vegetation throughout. Semi-improved grassland lies within the north and east of the site and species poor hedgerow lines eastern and southern site boundaries and scattered trees are present throughout. These habitats are presented on plan P.1715.22.01 (Appendix 1). The surrounding landscape is predominately agricultural land and residential dwellings.

The habitat types identified within the site are detailed below and are displayed on drawing P.1715.22.01 *Phase One Habitat Survey* in Appendix 1 and on Photographs within Appendix 3. Species lists and target notes are displayed in Appendix 2.

Hard standing (J4)

Concrete hardstanding surrounds the onsite buildings. The hardstanding areas have become encroached with short perennial, tall ruderal and mixed species scrub throughout. Hardstanding vehicle tracks also lead through the site. This habitat is displayed in photographs 1-2 within Appendix 3.

Buildings (J3.6)

Nine buildings (B1-B9) are present within the site. The buildings are a mixture of agricultural barns/sheds and a residential dwelling. The buildings are detailed within section 4.3 below. The buildings are displayed within photographs 3-25 within Appendix 3.

Dense/continuous scrub (A2.1)

Areas of mixed native species dense scrub is present throughout the site. Species present include bramble, elder and hawthorn. This habitat is displayed in photograph 26 within Appendix 3.

Introduced shrub (J1.4)

Introduced shrubs border the residential garden south of building B1. Non-native invasive species cotoneaster (TN4) was identified within this habitat. This habitat is displayed in photograph 27 within Appendix 3.

Poor semi-improved grassland (B6)

Semi improved grassland dominates the north and east of the site. The sward height is approximately 15-20cm. The grassland is dominated by Yorkshire fog with red fescue, poa sp., bent sp., and black knapweed present. This habitat is displayed in photographs 28-30 within Appendix 3.

Scattered trees (A3.1)

Scattered trees are present throughout the site and species include sycamore, apple, ash, elder and conifer species. This habitat is displayed in photographs 31-32 within Appendix 3.

Species Poor Hedge (J2.1.2)

Species poor hedgerows lines the eastern site boundary and part of the southern site boundary. Species present include hawthorn, bramble, sycamore and ivy. Species poor privet hedgerow borders the residential garden south of B1. This habitat is displayed in photographs 33-34 within Appendix 3.

Tall ruderal (C3.1)

Tall ruderal vegetation has encroached the hardstanding and semi-improved grassland habitats throughout the site. Species present include stinging nettle, black knapweed, broadleaved dock and willowherb. This habitat is displayed in photographs 35-36 within Appendix 3.

Short perennial/ephemeral vegetation (J1.3)

Short perennial/ephemeral vegetation has encroached the hardstanding throughout the site. Species present include groundsel, broadleaved dock, moss, herb robert, and false oat-grass. This habitat is displayed in photograph 37 within Appendix 3.

4.3 Preliminary bat roost assessment of buildings

Building 1-

Building B1 is a two-storey residential dwelling with a single storey extension off the eastern elevation. The building is constructed in brickwork walls with pebble dash and white render. Cracks and areas of missing render was noted on the northern elevation. The roof is pitched and tiled with a brick and concrete chimney present. Missing and slipped tiles were noted throughout the roof and area of missing mortar noted within the chimney. Wooden fascias and barge boards line the building, and a large gap is present between the fascias/barge boards and external walls. The windows are a mixture of single and double glazed and sit within wooden and uPVC frames. Some of the wooden frames were noted to be broken. No large gaps are present between the window frames and walls. No evidence of bats was identified during the external inspection. Building 1 is displayed within photographs 3-7 within Appendix 3.

The building was assessed to have **negligible** hibernation potential for crevice and void dwelling bats and **moderate** potential for day and maternity roosts for crevice dwelling bats and **moderate** potential for void dwelling bats. Overall, the building is classified as having **moderate** bat roosting potential.

Building 2-

Building B2 is a large steel framed agricultural barn constructed in concrete breeze blocks and wooden panelling. The roof is pitched asbestos with plastic skylights present and support by steel beams. The barn is open fronted, illuminated and constructed in materials unfavourable for bats. No evidence of bats was identified during the external inspection. Building 2 is displayed within photographs 8-9 within Appendix 3.

The building was assessed to have **negligible** hibernation potential for crevice and void dwelling bats and **negligible** potential for day and maternity roosts for crevice dwelling bats and **negligible** potential for void dwelling bats. Overall, the building is classified as having **negligible** bat roosting potential.

Building 3-

Building B3 is a two-storey stone built agricultural barn with a pitched corrugated roof and wooden facias. Single glazed windows are present within the walls with missing glass present throughout. The stone walls are in a deteriorating state of repair with missing mortar and gaps throughout. The south-western of the building has a dense coverage of ivy and a large gap is present between the wooden facias and walls. A single storey brick extension with sloped corrugated metal roof is present off the northern elevation and gap is present between the roof and walls. The second storey is supported by wooden and steel beams and gaps are present between the ceiling joists and walls. Feral pigeon were noted nesting within the barn during the site walkover. No evidence of bats was identified during the external or internal inspection. Building 3 is displayed within photographs 10-13 within Appendix 3.

The building was assessed to have **negligible** hibernation potential for crevice and void dwelling bats and **high** potential for day and maternity roosts for crevice dwelling bats and **high** potential for void dwelling bats. Overall, the building is classified as having **high** bat roosting potential.

Building 4-

Building B4 is a large steel framed agricultural barn constructed in concrete breeze blocks and corrugated panelling. The roof is pitched asbestos with plastic skylights present and support by steel beams. The barn is open fronted, illuminated and constructed in materials unfavourable for bats. No evidence of bats was identified during the external inspection. Building 4 is displayed within photographs 14-15 within Appendix 3.

The building was assessed to have **negligible** hibernation potential for crevice and void dwelling bats and **negligible** potential for day and maternity roosts for crevice dwelling bats and **negligible** potential for void dwelling bats. Overall, the building is classified as having **negligible** bat roosting potential.

Building 5-

Building B5 is a small single storey barn building connected to B4 and B6. The barn is constructed in stone walls with a corrugated metal roof. The roof is in a poor state of disrepair with corrugated sheeting missing. Large gaps are present within the brickwork with areas of stone and mortar missing. No evidence of bats was identified during the external inspection. Building 5 is displayed within photographs 16-17 within Appendix 3.

The building was assessed to have **negligible** hibernation potential for crevice and void dwelling bats and **low** potential for day and maternity roosts for crevice dwelling bats and **negligible** potential for void dwelling bats. Overall, the building is classified as having **low** bat roosting potential.

Building 6-

Building B6 is a large steel framed agricultural barn constructed in concrete breeze blocks and corrugated metal and wooden panelling. The roof is pitched asbestos and supported by steel beams. The barn is open fronted, illuminated and constructed in materials unfavourable for bats. No evidence of bats was identified during the external inspection. Building 6 is displayed within photographs 18-20 within Appendix 3.

The building was assessed to have **negligible** hibernation potential for crevice and void dwelling bats and **negligible** potential for day and maternity roosts for crevice dwelling bats and **negligible** potential for void dwelling bats. Overall, the building is classified as having **negligible** bat roosting potential.

Building 7-

Building B7 is a large steel framed agricultural barn used to storage hay and straw. The barn is constructed in concrete breeze blocks and corrugated metal and wooden panelling. The breezeblock has small areas of missing mortar. The roof is pitched with plastic skylights and supported by steel beams. The barn is open fronted, illuminated and constructed in materials unfavourable for bats. No evidence of bats was identified during the external inspection. Building 7 is displayed within photograph 21 within Appendix 3.

The building was assessed to have **negligible** hibernation potential for crevice and void dwelling bats and **negligible** potential for day and maternity roosts for crevice dwelling bats and **negligible** potential for void dwelling bats. Overall, the building is classified as having **negligible** bat roosting potential.

Building 8-

Building B8 is a large steel framed milking parlour barn. The barn is constructed in concrete breeze blocks and corrugated metal and wooden panelling. The breezeblock has small areas of missing mortar. The roof is domed and constructed in corrugated metal. Areas of corrugated sheeting are missing on the cladding. The barn is open fronted, illuminated and constructed in materials unfavourable for bats. No evidence of bats was identified during the external inspection. Building 8 is displayed within photographs 22-23 within Appendix 3.

The building was assessed to have **negligible** hibernation potential for crevice and void dwelling bats and **negligible** potential for day and maternity roosts for crevice dwelling bats and **negligible** potential for void dwelling bats. Overall, the building is classified as having **negligible** bat roosting potential.

Building 9-

Building B9 is a large steel framed milking parlour barn. The barn is constructed in concrete breeze blocks and corrugated metal and wooden panelling. The breezeblock has small areas of missing mortar. The roof is corrugated and pitched with plastic skylights and supported by steel beams. The barn is open fronted, illuminated and constructed in materials unfavourable for bats. No evidence of bats was identified during the external inspection. Building 9 is displayed within photographs 24-25 within Appendix 3.

The building was assessed to have **negligible** hibernation potential for crevice and void dwelling bats and **negligible** potential for day and maternity roosts for crevice dwelling bats and **negligible** potential for void dwelling bats. Overall, the building is classified as having **negligible** bat roosting potential

4.4 Protected and Notable Species

Birds

The habitats within the site provide suitable foraging and nesting opportunities for bird species. These habitats include scrub, semi-improved grassland, species poor hedgerow, tall ruderal, scattered trees and buildings. During the survey crows, buzzard, wood pigeon, goldfinch, jackdaw and Canadian geese were noted within and flying over site. Swallow cups (TN7) were also noted on building B1, and feral pigeon were identified within B3.

Building B3 provides potential nesting/roosting habitat for barn owl. The loft of building B3 could not be accessed at the time of the survey due to safety restrictions.

Records were returned for whooper swan, pink footed goose, kingfisher, skylark, curlew, peregrine, kestrel and oystercatcher however the site provides very limited habitat for these species as it is predominately hardstanding and buildings. The site is also prone to regular vehicular and human disturbance, further limiting the sites suitability for these species. It is considered that the proposals are unlikely to adversely impact these species and they do not require further consideration within this planning application.

Bats

The buildings on site offer **negligible to high** potential to support bat roosts as detailed above in section 4.3. Evidence of bats was not identified within the site during the survey. The trees within the site have the potential to support roosting bats however, a detailed preliminary bat roost assessment was not undertaken during the survey. A sycamore within the south-western corner of the site was noted to have rot holes and cracked areas of bark. Two sycamore trees within the semi-improved grassland habitat south of B1, were noted to be ivy clad.

The scrub, species poor hedgerow, semi-improved grassland, tall ruderal and scattered trees within the site provide good suitability for commuting and foraging bats, with good connectivity to the surrounding land use.

Badger and other small mammals

The semi-improved grassland, tall ruderal, scattered trees and scrub habitats within the site provide foraging and shelter habitat for badger and other small mammal species such as hedgehog. A deceased badger (TN5) was identified adjacent to the site on Gronant Road. Multiple mammal tracks and snuffle holes (TN6) were identified within the site west of B4. These signs can be viewed on plan P.1715.22.01 in appendix 1.

Otter and water vole

Records were returned for otter and water vole however the site does not provide any suitable habitat for these species and connectivity to the site and any suitable waterbodies is poor due to the presence of Gronant Road to the south and Prestatyn Road to the north. It is considered that these species will not be adversely impacted by the proposals and do not require further consideration.

Amphibians

No ponds are present within the site and one pond is present with 500m of the site as mapped on Magic Maps. Access between the pond and the site is restricted due to the presence of residential dwellings and other infrastructure.

The habitats within the site (semi-improved grassland, tall ruderal, scrub and species poor hedgerow) provide terrestrial habitats for amphibians.

Reptiles

The habitats within the site do not offer suitability to support reptiles. Ecotones are not present within the site and the habitats are scattered across the site with no suitable connectivity. The habitats within the site are prone to high human disturbance. Reptiles do not require further consideration within this planning application and will not be discussed further within this report.

Invasive species

Non-native invasive species cotoneaster (TN4) was identified within the site. The locations of the non-native invasive species identified within the site are displayed on plan P.1715.22.01 within Appendix 1.

5.0 Evaluation and Recommendations

5.1 Designated Sites and Habitats

The development site lies within 250m of statutory site Dee Estuary (Wales) SSSI/SPA/SAC/Ramsar and non-statutory site The Dingle LWS and it is likely the sites will directly be impacted by the proposals through visual and noise pollution during the construction phase. It is recommended that a Construction Environmental Management Plan (CEMP) is produced and implemented during the works to protect the sites. The plan should include details on measures that will be taken to avoid dust, noise, lighting and litter emissions from the site. All other statutory and non-statutory sites lie over 500m from the site, therefore are unlikely to be directly impacted by the proposals during the construction phase.

It is likely that statutory site Dee Estuary (Wales) SSSI/SPA/SAC/Ramsar and non-statutory site the Dingle LWS will receive an increase of recreational pressure due to the proposals. In order to mitigate any potential impacts resulting from increased recreational impact, it is recommended that a leaflet is provided to each new homeowner, providing information on the wildlife value of the local area and encouraging responsible use of these habitats. Information/notice board(s) could also be produced to direct users to the less sensitive areas and to provide information on how to responsibly use the SSSI/SPA/SAC/Ramsar and LWS sites.

The remaining statutory and non-statutory sites within 2km of the proposals will likely receive a small increase in recreational pressure however, new residentials are likely to utilise amenity spaces closer to the site. It is considered that there will be no adverse indirect impact on the sites as a consequence of the proposals.

The site does not lie within a Natural Resources Wales SSSI Impact Risk Zone as mapped on Magic Maps.

The habitats on site comprise hardstanding, short perennial/ephemeral, tall ruderal, semi-improved grassland, species poor hedgerow, scattered trees, scrub and buildings. These habitats are considered to have an ecological value of **within the zone of influence** of the site or lower. The site contains no designated or priority habitats. The scattered trees and species poor hedgerow that line the site provide commuting corridors as well as areas of forage for wildlife and these habitats should be retained and enhanced where possible. Overall, the proposals are unlikely to adversely affect the ecological value of the area.

The production of the Defra Metric Biodiversity Net Gain Calculations is recommended to minimise impacts of biodiversity and provide net gains in biodiversity and the production of a Management Plan to ensure the long-term commitments to manage the planting, protection and enhancement of biodiversity in and around the new development site.

5.2 Protected and Notable Species

Birds

The scattered trees, semi-improved grassland, buildings, tall ruderal and scrub provide suitable habitat for nesting and foraging bird species. It is recommended that vegetation clearance, pruning and building works should be undertaken outside of the nesting bird season (1st March to 31st August Inclusive) to avoid any impact on breeding birds. If works cannot be undertaken outside of the breeding bird season, a nesting bird check undertaken by a suitably experienced ecologist should be undertaken immediately prior to works commencing. If an active birds' nest is identified a suitable buffer zone should be implemented where no works are to occur within until the young have fledged the nest.

Building B3 provides potential nesting/roosting habitat for barn owl and records for barn owl have been returned with 2km of the site. The loft of building B3 could not be accessed at the time of the survey due to health and safety purposes. It is recommended that an updated scoping survey for barn owl is carried out to inspect building B3 for any evidence of barn owl activity. If signs for barn owl are identified within the building, further surveys may be required and mitigation provided.

Bats

Bat records were returned within 2km of the site. The closest record was recorded 588m south-west of the site.

The habitats on site provide **low** suitability for commuting and foraging bats and the site is well connected to the surrounding landscape with the species poor hedgerow and scattered trees that line the site boundaries providing valuable commuting corridors for bats. It is recommended that these habitats are retained and enhanced so they can continue to provide valuable foraging and commuting habitat for bats.

To maintain the sites value for foraging and commuting bats it is recommended that sensitive lighting be used to meet Bat Conservation Trust lighting guidance so not to cause detrimental effect to light sensitive species.

The buildings on site were assessed to provide **negligible** to **high** potential for bats. The buildings were assessed as followed:

- Negligible potential- B2, B4, B6, B7, B8 and B9;
- Low potential – B5
- Moderate potential – B1
- High potential – B3

The buildings will be demolished to accommodate the proposals within the site.

Building B5 with **low** bat roost potential will require a minimum of one nocturnal survey undertaken between May and August to assess if bats are using the buildings within the site as a roost and to inform further recommendations if required.

Building B1 with **moderate** bat roost potential will require a minimum of two nocturnal surveys undertaken between May and September (with at least one to occur between May and August) to assess if bats are using the buildings within the site as a roost and to inform further recommendations if required.

Building B3 with **high** bat roost potential will require a minimum of three nocturnal surveys undertaken between May and September (with at least one to occur between May and August) to assess if bats are using the buildings within the site as a roost and to inform further recommendations if required.

The trees within the site possess suitable features to support a bat roost. A sycamore within the south-western corner of the site was noted to have rot holes and cracked areas of bark. Two sycamore trees within the semi-improved grassland habitat south of B1, were noted to be ivy clad. The current proposals indicate that these trees are to be retained, if at a later date these trees are to be removed or pruned to accommodate proposals, further surveys may be required.

Badger and other small mammals

The site provides habitat for badger and hedgehog within the scrub, tall ruderal and semi-improved grassland. These habitats are likely to be impacted by the proposals and therefore, it is recommended that a Hedgehog Reasonable Avoidance Measures (RAMS) Method Statement is produced and implemented during the works to avoid harm to this species. The RAMS should include:

- Construction materials stored on pallets so as not to create a hedgehog refuge area; and
- Existing refuge areas (scrub) should be removed by hand so hedgehog within are not harmed during their removal.

To enable hedgehog continued use of the site it is advised that gaps of at least 13cm by 13cm are left under any new garden fences to enable hedgehog to roam freely within the area following development.

Badger activity (mammal tracks and snuffle holes) was noted within the scrub habitat to the west of building B4. A deceased badger (TN5) was also identified adjacent to the site on Gronant Road. As the site was not fully accessible due to overgrown scrub, further badger activity surveys are recommended to assess how badger are using the site.

It is further recommended that a Badger Reasonable Avoidance Measures (RAMS) Method Statement is produced and implemented during the works to avoid harm to this species. The RAMS should include:

- Construction materials stored on pallets so as not to create a badger refuge area; and
- Existing refuge areas (scrub) should be removed by hand so badger within are not harmed during their removal.

Invasive species

Cotoneaster (TN4) has been identified within the site. To avoid the spread of these species within the site during site clearance it is recommended that an invasive species management plan is produced and

adhered to during the works. It is recommended that the management plan details suitable management of these species, biosecurity measures and avoidance measures where possible.

Amphibians

The site provides no suitable aquatic habitat for amphibians and some limited terrestrial habitat. The terrestrial habitats do provide refuge areas and connectivity corridors for amphibians. These habitats are likely to be impacted by the proposals and therefore, it is recommended as the areas to be lost and small in size that an Amphibian Reasonable Avoidance Measures (RAMS) Method Statement is implemented during the works to avoid harm to this species. The RAMS should include:

- Vegetation clearance applies to all habitats cleared in daytime air temperatures above 5°C. Works must be avoided in cold temperatures or if prior overnight temperatures have been less than 1°C;
- The cut material is to be chipped and placed in discrete piles outside the working areas or removed from the site;
- Existing tracks should be utilised for vehicle movements where possible;
- Throughout the works all trenches must be covered at night or ramps provided to prevent amphibians from getting stuck; and
- Construction material will be stored on pallets to avoid creating habitat for amphibians.

5.3 Enhancements

In order to meet requirements for biodiversity protection and enhancement outlined within the NPPF, it is recommended that ecological enhancements are included. These could include:

1. Provision of 14 bird boxes (25mm and 32mm entrance hole box, house sparrow terrace, swift box), attached to or integrated within new buildings or retained tree on site;
2. Provision of 12 bat features (e.g. Vivara Pro WoodStone Bat box or similar) attached to a retained tree on site or provision of a bat box (e.g. Vivara bat bricks or 'bird brick houses' bat boxes) integrated within new buildings;
3. Retention and enhancement of existing trees and hedgerows along the site boundaries to maintain connectivity throughout the site; and
4. Suitable landscaping incorporating species that provide a food or shelter resource to wildlife to include hawthorn, hazel, holly, blackthorn, field maple, dog rose and honeysuckle as hedgerow species and oak, alder, field maple, silver birch, crab apple, rowan and bird cherry as tree species together with implementing a relaxed mowing regime and establishing wildflowers in these areas.

6.0 Conclusions

The site was subject to an extended phase one habitat survey and a preliminary bat roost assessment of all buildings. During the survey and following review of historical species records, it is considered that an impact on birds, bats, badger, amphibians and hedgehog are likely to occur in relation to the proposals for the site. The following recommendations have been made to avoid an impact on these species:

- If works have not begun by October 2023, an updated site visit will be required to assess the habitats within the site;
- A minimum of three nocturnal bat surveys on building B3 between May and September (with at least one to occur between May and August) to determine if bats are using the buildings as a roost;
- A minimum of two nocturnal bat surveys on building B1 between May and September (with at least one to occur between May and August) to determine if bats are using the buildings as a roost;
- A minimum of one nocturnal bat survey on building B5 between May and August to determine if bats are using the buildings as a roost;
- An updated survey for barn owl is recommended to inspect building B3 for any evidence of barn owl activity any further inform proposals;
- Production and implementation of a Construction Environmental Management Plan (CEMP) during the works;
- Further surveys for badger and the deployment of camera traps to assess the extent of badger use within the site;
- Sensitive lighting to be used to meet Bat Conservation Trust lighting guidance so not to cause detrimental effect to light sensitive species;
- No work to be undertaken at B1 between the start of May and the end of July/early August to allow any swallows to nest without disruption;
- Production and implementation of a hedgehog RAMS to avoid any harm to this species during the proposed works;
- Production and implementation of a badger RAMS to avoid any harm to this species during the proposed works.
- Implementation of an amphibian RAMS (section 5.2) to avoid any harm to this species during the proposed works;
- Vegetation clearance, pruning and building works should be undertaken outside of the nesting bird season (1st March to 31st August Inclusive) to avoid any impact on breeding birds. Or a nesting bird check undertaken by a suitably experienced ecologist should be undertaken immediately prior to works commencing;
- Production of an invasive species method statement to avoid the spread of cotoneaster (TN4) into the wider landscape during the proposed works;
- Enhancing the site for species through appropriate landscape planting that includes native, species rich hedgerows, trees and areas of wildflowers plus provision of integrated bat and bird features within newly constructed buildings; and
- Production of a Management Plan to ensure the long-term commitments to manage the planting, protection and enhancement of biodiversity in and around a new development site.

It is considered that there would be very limited impacts on the local ecology as a result of the proposals, provided the recommendations detailed within section 5.0 above are followed.

Appendix 4

Relevant Legislation

European Legislation

The following Directives have been adopted by the European Union and provide protection for fauna and flora species of European importance and the habitats which support them:

- Directive 2009/147/EC on the Conservation of Wild Birds (Birds Directive);
- Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (Habitats Directive).

UK Legislation

The Habitats Directive has been transposed into national legislation through the Conservation of Habitats and Species (Amendment) (EU Exit) Regulations 2019 (The Habitats Regulations). This provides for the designation and protection of 'European Sites' (SPAs, SACs and Ramsar Sites, including proposed or potential European Sites) and the protection of 'European Protected Species'.

The key UK legislation relating to nature conservation is the Wildlife and Countryside Act 1981 (as amended) (W&C Act). This Act is supplemented, *inter alia*, by provision in the Countryside and Rights of Way (CROW) Act 2000, and the Natural Environment and Rural Communities Act 2006 (NERC Act). Additional species and habitat specific UK legislation includes the Protection of Badgers Act 1992 and the Hedgerow Regulations 1997.

The Environment Act sets out how the UK will maintain environmental standards following leaving of the EU. The Act builds on the vision of the 25 Year Environment Plan, with the ambition from the government to leave the environment in a better state than it was when inherited.

The Defra Biodiversity Metric is being implemented to work alongside the Environment Act. This tool calculates potential biodiversity impacts as a result of development and identifies mitigation and compensation requirements to ensure no net loss of biodiversity. In addition, it identifies measures that can be implemented in order to meet Biodiversity gain as a result of development. Defra released a beta version of the biodiversity metric in July 2019. This metric is likely to be the default metric used by councils.

The National Planning Policy Framework (NPPF) 2021 has been published to provide further planning guidance. Wildlife, biodiversity and ecological networks are referred to in Section 15 '*Conserving and enhancing the natural environment*'. The NPPF states that the planning system should contribute to and enhance the natural and local environment by: recognising the wider benefits of ecosystem services, minimising impacts on biodiversity and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future

pressures. Further guidance is provided within Government Circular *06/05: Biodiversity and Geological Conservation - Statutory Obligations and Their Impact Within the Planning System*.

Species and Habitats of Principal Importance

Species and Habitats of Principal Importance are listed under section 41 of the NERC Act and are a material consideration in planning decisions. Planners require relevant, up to date information from ecological surveys in order to assess the effects of a proposed development on biodiversity as Councils have a statutory obligation under section 40 of the NERC Act to consider biodiversity conservation in the determination of planning applications.

Background information about the lists of priority habitats and species (Species and Habitats of Principal Importance) can be found within the UK Biodiversity Action Plan (UK BAP). Although this has been succeeded by the '*UK Post-2010 Biodiversity Framework*', many of UK BAP tools are still relevant. BAPs identify habitats and species of nature conservation priority on a UK (UK BAP) and Local (LBAP) scale. Most BAP priority habitats and species have Habitat Action Plans (HAP) and Species Action Plans (SAP) and there are also "grouped action plans" for groups of related species with similar conservation requirements. The LBAP relating to this Site is the Denbighshire's Local Biodiversity Action Plan.

Badgers

The legislation protecting badgers in Wales is the Protection of Badgers Act 1992.

Under the Protection of Badgers Act 1992 it is an offence *inter alia* to:

- Wilfully kill, injure or take a badger, or to attempt to do so;
- Cruelly ill-treat a badger; or
- Intentionally or recklessly interfere with a badger sett by (a) damaging a sett or any part of one; (b) destroying a sett; (c) obstructing access to or any entrance of a sett; (d) causing a dog to enter a sett; or (e) disturbing a badger when it is occupying a sett.

The Badger Act 1992 defines a badger's sett as "*any structure or place which displays signs indicating current use by a badger*"

The Welsh Government has authority under Section 10(2) and (3) of the Act to issue licences to interfere with badger setts for:

1. The purpose of any agricultural or forestry operation;
2. The purpose of any operation to maintain or improve any existing watercourse or drainage works, or to construct new works required for the drainage of land, including works of defense against seawater or tidal water, and
3. Controlling foxes in order to protect livestock and penned game

Kill or take badgers or to interfere with their setts for:

1. The purpose of preventing the spread of disease; and
2. The purpose of preventing serious damage to land, crops, poultry or any other form of property.

The Natural Resources Wales are also a licensing authority under the 1992 Act. In relation to disturbance of badgers, Natural Resources Wales (2018) gives guidelines on disturbance which will require a licence. These includes: "*using very heavy machinery (generally tracked vehicles) within 30 metres of any entrance to an active sett; using lighter machinery, particularly for any digging operation, within 20 metres; light work such as hand digging or scrub clearance within 10 metres. There are some activities which may cause disturbance at greater distances (such as using explosives or pile driving) and these should be given individual consideration.*"

Bats

In England and Wales, all bats and their roosts are protected under the Conservation of Habitats and Species Regulations 2017 and the Wildlife & Countryside Act 1981 (as amended). Several species of bat are also highlighted as Priority Species under the UK Biodiversity Action Plan and within the Local BAP.

Under the current legislation as summarised on pages 8 and 9 of the Bat Surveys for Professional Ecologists Good Practice Guidelines – 3rd Edition (2016) it is a criminal offence to:

“To kill, capture, injure or take a wild bat;

- *To damage or destroy a place used by a bat for breeding or resting. All offences of this nature are identified within the Habitats Regulations. This offence is unique in that it can be committed accidentally. No element of intentional, reckless or deliberate action needs to be evidenced;*
- *To disturb bats anywhere (roosts, flight lines or foraging areas) if levels of disturbance can be shown to impair their ability to survive, to breed or reproduce, to rear or nurture their young, to hibernate or migrate or to affect significantly local distribution or abundance;*
- *To intentionally or recklessly disturb a bat, whilst it is occupying a place of shelter or protection;*
- *To intentionally or recklessly obstruct access to any place used by a bat for shelter or protection; and*
- *To be in possession or control of a bat alive or dead (or any part of a bat or anything derived from a bat, although bat droppings are generally considered to be acceptable), or to transport a bat, to sell or exchange a bat or to offer to sell or exchange a bat taken from the wild.”*

Breeding Birds

Breeding Birds are protected under the Wildlife and Countryside Act which make it an offence to:

- *intentionally kill, injure or take any wild bird or take, damage or destroy the nest of any wild bird whilst it is in use or being built;*
- *intentionally take or destroy the egg of any wild bird;*
- *have in one's possession or control any wild bird, dead or alive, or any part of a wild bird (including eggs), which has been taken in contravention of the Act or the Protection of Birds Act 1954;*
- *intentionally or recklessly disturb any wild bird listed on Schedule 1 while it is nest building, or at a nest containing eggs or young, or disturb the dependent young of such a bird.*

Invasive Species

It is an offence under Section 14(2) of the Wildlife and Countryside Act 1981 to ‘plant or otherwise cause to grow’ in the wild any plant in Schedule 9 Part II.

It is a criminal offence to intentionally, wilfully kill, injure or take any of the aforementioned protected species or to destroy or disturb its habitat.

Local Policy

The site lies within Denbighshire and is covered by the Local Development Plan 2006 – 2021 (Adopted 4th June 2013) and extracts policies within Valuing Our Environment. The policies of relevance are VOE1-VOE2. It is due to be replaced by the Replacement Local Development Plan 2018-2033, which is currently in preparation.

- Use of the data is governed by Cofnod's [Terms & Conditions](#).
- Data marked as confidential or sensitive must not be released into the public domain, with the exception of the Public Version of the PDF report, which has had sensitive information removed or restricted.
- You should not amend any part of the downloaded records.
- Unless otherwise agreed, use of the data is valid until the Expiry Date (15/01/2023).
- Past records of presence of a habitat or species do not guarantee continued occurrence; absence of records does not imply absence of a species, merely that no records are held by Cofnod; Cofnod cannot guarantee the accuracy of supplied data; copyright of records remains with the original recorder.
- The Dataset ID associated with each record can be used to find information about the provenance of the data. See the [Cofnod Metadata](#) page for more information.
- Verification Levels are given for each record and indicate whether the record has been assessed by an expert.
- Please [contact us](#) if you have any questions about using the data or wish to add further Data Users.

Notes

- Records with 1km, 2km, 5km, 10km or 100km grid references (where present) are highlighted with, for example, (1km) next to the distance to indicate that the distance

should not be considered to be exact given the vague nature of the grid reference.

- Records shown in **bold** typeface are sensitive species records, and some details have been restricted in this public version of the report.

Verification Levels

- **UA:** Unassessed
- **PC:** Probably Correct
- **KC:** Known Correct
- **NA:** Not Required

Species Categories

- **All Other Species:** Any species not included in other categories
- **Category 1 Species:** Species with European and/or UK Legal Protection, Section 7 Species or UK BAP Priority Species
- **Category 2 Species:** Global Red List, British Red Data Book, Nationally Rare & Scarce, Welsh Red and Amber Birds & Welsh Vascular Plant Red Data List, not identified in Category 1
- **Category 3 Species:** Local species not identified under Categories 1 & 2, Locally Important species as specified by local experts

Abbreviations

BAP - UK Biodiversity Action Plan Priority Species, **BDir1** - EU Birds Directive Annex 1 - Birds which are the subject of special conservation measures, **BDir2.1** - EU Birds Directive Annex 2.1 - Birds which may potentially be hunted, **BDir2.2** - EU Birds Directive Annex 2.2 - Birds which may potentially be hunted within certain member states, **Bern2** - Bern Convention on the Conservation of European Wildlife and Natural Habitats, Appendix 2 - Strictly protected fauna species, **Bern3** - Bern Convention on the Conservation of European Wildlife and Natural Habitats, Appendix 3 - Protected fauna species, **Bonn2** - Bonn Convention on the Conservation of Migratory Species of Wild Animals, Appendix 2 - Migratory Species to be the subject of agreements, **CHS2** - The Conservation of Habitats and Species Regulations 2010, Schedule 2 - European Protected Species of Animals, **CHS4** - The Conservation of Habitats and Species Regulations 2010, Schedule 4 - Animals which may not be captured or killed in certain ways, **CITES-A** - Convention on International Trade in Endangered Species, Annex A - Species threatened with extinction, **CITES-B** - Convention on International Trade in Endangered Species, Annex B - Species that may become extinct unless trade is closely controlled, **CITES-C** - Convention on International Trade in Endangered Species, Annex C - Species subject to regulation, **GBNNSIP** - Great Britain Non-native Species Inventory Portal Checklist of Non-native Species, **HDir2** - Habitats Directive, Annex II - Species requiring designation of Special Areas of Conservation, **HDir4** - Habitats Directive, Annex IV - Species in need of strict protection, **HDir5** - Habitats Directive, Annex V - Species where population management is decided by individual countries, **INNS** - Invasive Non-native Species, **LBAP-A** - Anglesey Local Biodiversity Action Plan, **LBAP-C** - Conwy Local Biodiversity Action Plan, **LBAP-D** - Denbighshire Local Biodiversity Action Plan, **LBAP-F** - Flintshire Local Biodiversity Action Plan, **LBAP-G** - Gwynedd Local Biodiversity Action Plan, **LBAP-S** - Snowdonia National Park Authority Local Biodiversity Action Plan, **LBAP-T** - North and Mid Wales Trunk Road Agent Biodiversity Action Plan, **LBAP-W** - Wrexham Local Biodiversity Action Plan, **LI-50** - Locally Important Species in Vice-County 50: Denbighshire, **PBA** - Protection of Badgers Act 1992, **RDB-N** -

Red Data Book listing (not based on IUCN guidelines) - Notable, **RDB-NA** - Red Data Book listing (not based on IUCN guidelines) - Notable A, **RDB-NB** - Red Data Book listing (not based on IUCN guidelines) - Notable B, **RDB-NR** - Red Data Book listing (not based on IUCN guidelines) - Nationally Rare, **RDB-NS** - Red Data Book listing (not based on IUCN guidelines) - Nationally Scarce, **RL-CR** - IUCN Red List of Threatened Species - Critically Endangered, **RL-DD** - IUCN Red List of Threatened Species - Data Deficient, **RL-EN** - IUCN Red List of Threatened Species - Endangered, **RL-NT** - IUCN Red List of Threatened Species - Near Threatened, **RL-PX** - IUCN Red List of Threatened Species - Possibly Extinct, **RL-RE** - IUCN Red List of Threatened Species - Regionally Extinct, **RL-VU** - IUCN Red List of Threatened Species - Vulnerable, **S7** - Environment (Wales) Act 2016 (Section 7), **UKBA** - RSPB/BTO Birds of Conservation Concern - Amber list (not based on IUCN criteria), **UKBR** - RSPB/BTO Birds of Conservation Concern - Red list (not based on IUCN criteria), **WBA** - RSPB/BTO Birds of Conservation Concern in Wales - Amber list (not based on IUCN criteria), **WBR** - RSPB/BTO Birds of Conservation Concern in Wales - Red list (not based on IUCN criteria), **WCA1.1** - Wildlife & Countryside Act 1981 Schedule 1.1 - Birds which are protected at all times, **WCA1.2** - Wildlife & Countryside Act 1981 Schedule 1.2 - Birds which are protected during the close season, **WCA5** - Wildlife & Countryside Act 1981 Schedule 5 - Animals which are protected, **WCA8** - Wildlife & Countryside Act 1981 Schedule 8 - Plants which are protected, **WCA9** - Wildlife & Countryside Act 1981 Schedule 9 - Animals and plants which may not be released/planted or allowed to escape/grow in the wild

- PUBLIC VERSION

Data Description

Distance	Indicates the distance, in metres, between the grid reference of the record (using the central point of the grid square) and the search location. For any Sensitive Species Records, this should not be released into the Public Domain.
Species Name	Name of the taxon (usually identified to species level) using the binomial system.
Grid Reference	Grid reference based on the Ordnance Survey grid system.
Date	Date on which the record was made. In some cases this might be a date range, or a vague date such as 'Summer 2010'.
Recorder(s)	One or more people who made the original observation and recorded it in some way. It may have subsequently been included in a data collation by another person or it may have been submitted to the LERC directly.
Abundance	Number of individuals recorded. Where not specified it is assumed that at least one was present.
Record Type	A description of the type of record.
Site Name	The site name (if one has been supplied). For any Sensitive Species Records, this cannot be released into the Public Domain.
Notes	Any additional notes about the sighting. For any Sensitive Species Records, this cannot be released into the Public Domain.
Dataset ID	ID of this dataset. See 'Important Issues' for more details.
Lists	Any local, national or international conservation statuses or legal protection which apply to this species and whether it is included in any Local Biodiversity Action Plans. See 'Abbreviations' for more details.
V	An indicator showing the level of confidence held in the record's correct identification.

Dataset Information

The records in these results are drawn from the following datasets. Use the Dataset ID next to each record to find its dataset.

Dataset ID	Title	Acknowledgements	Type
D0026/041/01	Records captured from CCW regional files - CCW Files SJ18.1 & SJ18.2 - SSSI: Dee Estuary/Aber Afon Dyfrdwy - Scientific Information	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/042/01	Records captured from CCW regional files - CCW Files SJ18.1 & SJ18.2 - SSSI: Dee Estuary/Aber Afon Dyfrdwy - Scientific Information	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/046/01	Records captured from CCW regional files - CCW Files SJ18.1 & SJ18.2 - SSSI: Dee Estuary/Aber Afon Dyfrdwy - Welsh Water Authority - National Rivers Authority	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/048/01	Records captured from CCW regional files - CCW File SJ08.2 - SSSI: Gronant Dunes & Talacre Warren - General	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/049/01	Records captured from CCW regional files - CCW File SJ08.2 - SSSI: Gronant Dunes & Talacre Warren - General	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/050/01	Records captured from CCW regional files - CCW File SJ08.2 - SSSI: Gronant Dunes & Talacre Warren - General	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/051/01	Records captured from CCW regional files - CCW File SJ08.2 - SSSI: Gronant Dunes & Talacre Warren - General	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/057/01	Records captured from CCW regional files - CCW File SJ16 - SJ16 - General	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/144/01	Records captured from CCW regional files - CCW File SJ07.18 - Trefnant - Trefnant Isa	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/276/01	Records captured from CCW regional files - CCW File - Bat Roost Forms - North East Wales - Clwyd Bat Calls, SJ06-SJ08	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/279/01	Records captured from CCW regional files - CCW File M1.1.4.2 - North Wales - Amphibian Survey and Monitoring	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0035/002/01	Vice-County dataset - Reptile records from Denbighshire and Flintshire Vice-counties (50 and 51)	Mick Brummage (North East Wales Amphibian and Reptile Network)	Species
D0052/001/01	Miscellaneous invertebrate species records held by John Bratton - Records (mostly) from selected SSSIs in North Wales	John Bratton	Species
D0059/001/03	North Wales badger records held by Clwyd Badger Group (including some historic data) - CBG Historic sett data	Clwyd Badger Group (clwydbadgergroup@btinternet.com)	Species

D0059/009/01	North Wales badger records held by Clwyd Badger Group (including some historic data) - Badger road traffic accidents recorded by CBG, imported from spreadsheet	Clwyd Badger Group (clwydbadgergroup@btinternet.com)	Species
D0061/007/01	Cambrian Ornithological Society data digitised by Cofnod - 2002 data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species
D0062/008/01	Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - All records up to 2018	Ian M Spence (Clwyd Bird Recording Group)	Species
D0062/011/01	Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - 2020 records	Ian M Spence (Clwyd Bird Recording Group)	Species
D0101/001/01	Historic Vice-County dataset - Vascular plant records from Flintshire Vice-county (50) digitised by Cofnod - Species summary cards	Goronwy Wynne (BSBI Vice County Recorder)	Species
D0108/001/03	Brown Hare records collated by North Wales Wildlife Trust - Brown Hare records	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species
D0120/001/01	Otter road casualty records maintained by Cardiff University and Environment Agency	Cardiff University & Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0127/001/02	Historic Vice-County dataset - Butterfly records from Denbighshire and Flintshire Vice-counties (50 and 51)	Rob Whitehead	Species
D0137/001/01	Great Crested Newt (<i>Triturus cristatus</i>) Sites in Wales	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0145/001/08	Vice-County dataset - Arachnid records from North Wales (and some additional invertebrate data)	Richard Gallon	Species
D0158/003/01	Miscellaneous species records held by North Wales Wildlife Trust in a BIORECS recording database. - Full database	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species
D0216/001/03	Miscellaneous species records held by Denbighshire County Council (records to 2004)	Cyngor Sir Ddinbych/Denbighshire County Council	Species
D0217/001/04	Welsh Invertebrate Database (WID) - Records from within the Cofnod boundary	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0225/001/01	Native Black Poplar records from North East Wales	Les Starling & Trefor Thompson	Species
D0227/002/01	Flintshire Wildlife Sites - Species records extracted from Wildlife Site Database	Cyngor Sir y Fflint/Flintshire County Council	Species
D0820/001/02	Phase 2 Lowland Grassland Survey of Wales - Site records held digitally on the 'Grasslands' copy of Recorder 2002 database (Clwyd).	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0823/001/02	A collation of records of stoneworts in Wales	Cyfoeth Naturiol Cymru/Natural Resources Wales (NBN Download)	Species
D0969/001/05	Miscellaneous species records submitted to rECOrd	rECOrd	Species
D0971/001/01	Hedgehog records collected by NRW and Wild Ground	Wild Ground & Cyfoeth Naturiol Cymru/Natural Resources Wales	Species

D1014/005/01	Gronant and Talacre Natterjack toad monitoring records - Records entered through the ORS (2013 -)	Cyngor Sir Ddinbych/Denbighshire County Council & BHP Billiton	Species
D1015/001/01	Wales Sand lizard monitoring data - N.E. Wales - 2011 onwards	Individual recorders, Cyngor Sir Ddinbych/Denbighshire County Council and Cyngor Sir y Fflint/Flintshire County Council	Species
D1072/001/02	Mammal records from Britain from the Atlas of Mammals (1993), with some subsequent records	Biological Records Centre (NBN Download)	Species
D1075/001/06	Bryophyte data for Great Britain from the British Bryological Society held by BRC: Atlas 2014 - North Wales data	British Bryological Society (NBN download 04/12/2019)	Species
D1076/001/02	Reptiles and Amphibians Dataset	Biological Records Centre (NBN Download)	Species
D1096/001/02	Water Beetle Surveys from Britain and Ireland	Balfour-Browne Club (NBN Download, 10/10/2019)	Species
D1097/002/04	Ladybird Survey of the UK - Data from the Cofnod area	Biological Records Centre	Species
D1117/001/01	ad hoc Cofnod Online Recording System records	Individual Recorder(s)	Species
D1118/013/01	Miscellaneous species datasets held in MapInfo format by Matthew Ellis - Watervole records	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1121/001/01	ANON - HERPETOFAUNA CONSULTANTS INTERNATIONAL, 1993: "Crested Newt Survey in the Wrexham and Rhyl Areas of Clwyd. A report to the Countryside Council for Wales (Final Report, July 1993)". - Great Crested Newt data	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1156/004/02	Marine Intertidal Phase 1 species dataset from the Countryside Council for Wales 1996-2005 - Species records from the Cofnod area	Cyfoeth Naturiol Cymru/Natural Resources Wales (NBN Download, 22/01/2020)	Species
D1195/001/04	Invasive Non Native Species collated by North Wales and Dee Invasive Non Native Species Forum	North Wales and Dee Invasive Non Native Species Forum	Species
D1201/001/01	British Arachnological Society/Spider Recording Scheme dataset	British Arachnological Society/Spider Recording Scheme	Species
D1239/008/01	Miscellaneous species records captured from paper forms containing results of surveys on potential N E Wales Wildlife Sites. - SJ08 Delyn	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species
D1239/009/01	Miscellaneous species records captured from paper forms containing results of surveys on potential N E Wales Wildlife Sites. - SJ08 Rhuddlan	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species
D1274/001/01	Vice-County dataset - Vascular plant records from Flintshire Vice-county (51).	Emily Meilleur (BSBI)	Species
D1274/004/01	Vice-County dataset - Vascular plant records from Flintshire Vice-county (51). - Records from Flintshire BSBI Bramble weekend and Recording week 13-19/07/2015	Individual recorders	Species
D1274/006/01	Vice-County dataset - Vascular plant records from Flintshire Vice-county (51). - Records by Peter Tattersfield	Peter Tattersfield	Species

D1285/001/03	Vice-County dataset - Moth records from Denbighshire and Flintshire Vice-counties (50 and 51)	Justin Williams	Species
D1295/001/04	Dragonfly records from the British Dragonfly Society Recording Scheme - Records from the Cofnod area	British Dragonfly Society Recording Scheme (NBN download, 24/07/2020)	Species
D1297/020/01	BirdTrack records - 2015 records from within the Cofnod boundary	British Trust for Ornithology & Individual Recorders	Species
D1297/021/01	BirdTrack records - 2016 records from within the Cofnod boundary	British Trust for Ornithology & Individual recorders	Species
D1297/025/01	BirdTrack records - 2004-2018 data from Vice-Counties 50 & 51 (Denbighshire & Flintshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/027/01	BirdTrack records - 2019 data from Vice-County 51 (Flintshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/040/01	BirdTrack records - 2020 records for Vice-County 51 (Flintshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/041/01	BirdTrack records - 1900-2003 records for Vice-County 51 Flintshire	Ian M. Spence and British Trust for Ornithology	Species
D1308/001/01	Flintshire (VC51) County Rare Plant Register - WYNNE, G. et al, 2008: "The Rare Plants of Flintshire". Unpublished report, compiled by Goronwy Wynne, Joe Phillips and Delyth Williams. BSBI.	Goronwy Wynne (former BSBI Vice County Recorder)	Species
D1308/002/01	Flintshire (VC51) County Rare Plant Register - BROWN, B.M., 2020: "The Rare Plants of Flintshire. A Register of the rare, scarce or threatened plants in the old county of Flintshire, botanical vice-county 51. Based on the original edition by Goronwy Wynne, with Delyth Williams & Joe Phillips". Botanical Society of the British Isles	Botanical Society of the British Isles	Species
D1330/001/01	Invasive Non Native Species records, submitted to Cofnod as part of the N. Wales and Dee Invasive Non Native Species Forum 'Record An Alien' project	Individual recorders	Species
D1331/002/01	Miscellaneous species records submitted by staff of Natural Resources Wales	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1338/008/01	Miscellaneous species records collected by YGC (and their sub-contractors) on behalf of various clients - Records entered from miscellaneous reports by YGC staff (pre ORCA)	YGC	Species
D1373/001/05	Historic Vice-County dataset - Butterfly records from Denbighshire and Flintshire Vice-counties (50 and 51)	David Hinde	Species
D1383/001/01	Hedgehog records submitted to Cofnod via their Online Recording System	Individual Recorders, and North Wales Local Biodiversity Action Plan partnerships.	Species
D1403/002/01	Miscellaneous bird records collected by Anthony Gallon - Bird records collected 18th May 2011	A. C. Gallon	Species
D1418/001/01	Miscellaneous species records made by various recorders at Y Morfa, Prestatyn - PHILLIPS, J. & HEATON, S. et al, 2011: "Survey of Y Morfa, Prestatyn". Unpublished Report	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species

D1418/002/01	Miscellaneous species records made by various recorders at Y Morfa, Prestatyn - Records from 2006 included within 2011 report	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species
D1428/015/01	Miscellaneous species records collected by Enfys Ecology on behalf of various clients - HUGHES, R., 2014: "EE.053 Denbighshire County Council, Ecological Surveys at Ty Nant Council Offices, Prestatyn". Enfys Ecology Ltd	Enfys Ecology	Species
D1428/032/01	Miscellaneous species records collected by Enfys Ecology on behalf of various clients - KNEEN, P. & BOYETT, L., 2017: "EE.386 The Dell, Prestatyn, Preliminary Ecological Appraisal, Preliminary Bat Roost Assessment and Bat Emergence Survey". Enfys Ecology Ltd	Enfys Ecology Ltd	Species
D1428/042/01	Miscellaneous species records collected by Enfys Ecology on behalf of various clients - BOYETT, L., 2018: "EE.467 The Beaches Hotel, Prestatyn. Preliminary Roost Assessment & Emergence Survey". Enfys Ecology Ltd	Enfys Ecology Ltd	Species
D1428/047/01	Miscellaneous species records collected by Enfys Ecology on behalf of various clients - KNEEN, P., 2017: "EE.376 Ysgol Bodnant Infants, Prestatyn. Preliminary Ecological Appraisal, Bat Roost Assessment and Nocturnal Bat Surveys". Enfys Ecology Ltd	Enfys Ecology Ltd	Species
D1433/002/01	Coastal Otter surveys carried out by volunteers on behalf of Flintshire County Council - SLATER, S., 2011: "Coastal Otter Survey Preliminary Report North East Wales 2011".	Flintshire & Denbighshire Biodiversity Partnerships	Species
D1440/001/01	PHILLIPS, J., 2010: "A Plant List for the Little Tern Colony, Gronant". Unpublished report	Joe Phillips and Cyngor Sir Ddinbych/Denbighshire County Council	Species
D1444/001/01	PHILLIPS, J., 2010: "Botanical Survey at Coed Bell, Gronant". Unpublished Report	Joe Phillips and Cyngor Sir Ddinbych/Denbighshire County Council	Species
D1480/001/01	Wales Online Amphibian & Reptile Atlas Ad-hoc Records	Amphibian & Reptile Conservation Trust	Species
D1486/001/01	Natural Resources Wales North Wales Bat Roosts	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1505/001/03	Amphibian and Reptile records held in 'Record Pool' - Records for Wales	ARC and ARG UK	Species
D1509/002/01	Ringing records held by Ian Spence - 1987 - 2016	Ian Spence	Species
D1519/001/01	Species records collected during monitoring and planting of Juniper plants on Prestatyn Hillside - 2005 survey of Juniper plants on Prestatyn Hillside	Joe Phillips & Cyngor Sir Ddinbych/Denbighshire County Council	Species
D1519/002/01	Species records collected during monitoring and planting of Juniper plants on Prestatyn Hillside - Planting of Juniper on Prestatyn Hillside November 2010	Cyngor Sir Ddinbych/Denbighshire County Council	Species
D1539/002/01	Nest records for Schedule 1 birds primarily from Anglesey and Gwynedd - Nest Records 2017	Kelvin Jones and Anglesey Barn Owl Group	Species

D1546/001/01	Miscellaneous records submitted through the Llên Natur website - Records submitted to Cofnod up until end 2013	Cymdeithas Edward Llwyd	Species
D1546/002/01	Miscellaneous records submitted through the Llên Natur website - Records submitted 15/12/2019	Cymdeithas Edward Llwyd	Species
D1562/003/01	Miscellaneous records collected by David Hill - 2014 Records	David G. Hill	Species
D1574/001/03	Hedgehog Hibernation Survey records	People's Trust for Endangered Species	Species
D1586/014/01	Miscellaneous species records collected as part of the Dee Invasive Non-Native Species Project - Records entered through the Dee INNS Atlas or Cofnod ORS	Individual Recorders & Dee Invasive Non-Native Species Project	Species
D1587/011/01	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Records from October 2016	Jonathan Shanklin	Species
D1587/017/02	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - BSBI Annual Summer Meeting and personal records, June 2017	Individual recorders	Species
D1587/018/01	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Records from July 2017	Jonathan Shanklin	Species
D1587/022/01	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - June 2018	Jonathan Shanklin	Species
D1587/024/01	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - September 2018	Jonathan Shanklin	Species
D1587/039/01	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - July 2021	Jonathan Shanklin	Species
D1590/001/01	PlantTracker data from 2012 onwards	Nature Locator & Biological Records Centre (NBN download)	Species
D1603/001/01	Camera trap records from NatureSpy volunteers, submitted to Cofnod via their Online Recording System - iWild North Wales Project	Individual Recorders and NatureSpy	Species
D1622/001/01	Swift records submitted to Cofnod via their Online Recording System as part of A Swift Recovery project	Individual recorders, and North Wales Wildlife Trust	Species
D1651/001/01	Records collected as part of the Mammals in a Sustainable Environment (MISE) Project - Batch 01	Mammals in a Sustainable Environment project (Data provided by NRW)	Species
D1662/003/01	Miscellaneous species records collected by Jonathan Shanklin - 2017 records	Jonathan Shanklin	Species
D1666/002/01	Records captured from Licence Returns submitted to Natural Resources Wales - Miscellaneous species records mobilised from 2004 - 2007 CCW Licence returns	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1681/001/03	National Bat Monitoring Programme Hibernation Survey - Records received 12/03/2020	Bat Conservation Trust	Species

D1688/004/01	Big Hedgehog Map records - Records from 2010 to January 2020	People's Trust for Endangered Species	Species
D1688/005/01	Big Hedgehog Map records - Records from January 2020 - June 2020	People's Trust for Endangered Species	Species
D1688/007/01	Big Hedgehog Map records - Records from January 2021 - July 2021	People's Trust for Endangered Species	Species
D1690/001/01	Water Vole records provided to National Water Vole Database and Mapping Project by EAW	National Water Vole Database Project & Natural Resources Wales	Species
D1696/001/01	Miscellaneous species records collected by Marches Ecology on behalf of various clients - Records from miscellaneous reports entered by Marches Ecology	Marches Ecology	Species
D1704/001/01	Plant records collected by Martyn Stead in Flintshire (Vice-County 51) - Polypodium species records 2015-2016	Martyn Stead	Species
D1704/002/01	Plant records collected by Martyn Stead in Flintshire (Vice-County 51) - Records received 20/12/2019	Martyn Stead	Species
D1734/001/02	Swift Inventory of Low-Level Screaming Parties in the UK, 2009-2014 - Records from Cofnod area	RSPB (NBN download, 23/01/2020)	Species
D1737/003/01	Amphibian and Reptile records held by ARC Trust - Data from the Cofnod area	Amphibian and Reptile Conservation	Species
D1748/001/01	Miscellaneous species records collected by Tom Knight (personal records)	Tom Knight	Species
D1756/001/02	Phase 2 Woodland Survey of Wales	Cyfoeth Naturiol Cymru/Natural Resources Wales (NBN Download, 29/01/2019).	Species
D1766/001/01	National Water Vole Database and Mapping Project - Water vole records captured via an online recording form	Individual recorders	Species
D1784/001/01	Welsh beetle records extracted from specimens held by Doncaster Museum	Doncaster Museum	Species
D1806/002/01	Miscellaneous species records collected by Stephen Cutmore on behalf of various clients - Bat survey records Feb 2018 - Feb 2020	Stephen Cutmore Consultancy	Species
D1814/001/01	Records of Curlew and Lapwing collected as part of the Curlew Cymru Project	Individual recorders	Species
D1818/001/01	Additional Weevil records held by Weevil and Bark Beetle Recording Scheme - Records which Cofnod does not already hold, received April 2018	Weevil and Bark Beetle Recording Scheme	Species
D1844/001/03	iRecord data for the Cofnod area - Verified data	Biological Records Centre and Individual Recorders	Species
D1846/001/01	Living with Mammals - Records to 2017	People's Trust for Endangered Species	Species
D1847/001/01	Hogwatch and Rural Landowner surveys	People's Trust for Endangered Species	Species

D1852/001/01	RSPB Big Garden Birdwatch winter sightings in the UK in 2008 - 2008 records	RSPB (NBN Download, 16/01/2019)	Species
D1852/002/01	RSPB Big Garden Birdwatch winter sightings in the UK in 2008 - 2009 records	RSPB (NBN Download, 16/01/2019).	Species
D1858/001/02	Butterfly records collected and collated by Andrew Graham for VCs 50 and 51 - Records to 2019 inclusive	Andrew Graham	Species
