## EXECUTIVE SUMMARY

---

A Preliminary Ecological Appraisal has been carried out at Land at Penmaenmawr Road, Llanfairfechan, LL33 0PH on 10th October 2022 by Lizzie Atkinson. The assessment comprised a desk study and biological records search, as well as a site walkover survey in order to map habitat types. The survey was extended to assess the potential for protected species to use the site. The assessment provides baseline data as to current site conditions and where appropriate allows recommendations to be made in respect of further potential work in order to satisfy current wildlife legislation.

Assessed against the '*Guidelines for Ecological Impact Assessment in the UK and Ireland*' 2nd edition (2018), the habitats range in ecological value from negligible to within the zone of influence of the site. Scattered trees, semi-improved grassland, scrub and tall ruderal habitats within the site are to be lost to the proposals and as they are small in area and not of high ecological value it is considered that their loss can be mitigated for and the proposals will not adversely affect the ecological value of the wider area, provided the recommendations detailed below are followed.

Bat surveys are conducted in accordance with the Bat Surveys for Professional Ecologists - Good Practice Guidelines, published 2016 (the Guidelines). Strict adherence to these is not necessary, but where practice deviates from them, clear reasons and rationale are required.

The site comprises a semi-improved grassland field with pockets of scrub and tall ruderal throughout. A wet ditch (D1) flows through the western half of the site and a dry ditch (D2) is directly connected. Species poor hedgerow borders the north-western and south-eastern site boundaries and scattered trees are present throughout.

If the recommendations below are followed these species will not be adversely affected by the proposals.

- If works have not begun by October 2023, an updated site visit to assess the habitats within the site and a preliminary bat roost assessment of trees T1 and T2 will be required;
- Nocturnal bat activity surveys and the deployment of static bat detectors (between April and October in suitable weather conditions) to assess the level of bat activity throughout the site;
- A minimum of three nocturnal bat surveys on tree T3 between May and September (with at least one to occur between May and August) to determine if bats are using the tree as a roost;
- Sensitive lighting to be used to meet Bat Conservation Trust lighting guidance so not to cause detrimental effect to light sensitive species;
- Wintering birds surveys to be carried out between November and February/March;
- Production and implementation of a hedgehog RAMS to avoid any harm to this species during the proposed works;
- Production and implementation of a badger RAMS to avoid any harm to this species during the proposed works;
- Production and implementation of an amphibian RAMS to avoid any harm to this species during the proposed works;
- Precautionary check for badger prior to works commencing to assess if badger are using the habitats within the site for shelter;
- Vegetation clearance or pruning should be undertaken outside of the nesting bird season (1st March to 31st August Inclusive) to avoid any impact on breeding birds. Or a nesting bird check undertaken by a suitably experienced ecologist should be undertaken immediately prior to works commencing;
- Precautionary check for invasive prior to works commencing;
- Enhancing the site for species through appropriate landscape planting that includes native, species rich hedgerows, trees and areas of wildflowers plus provision of integrated bat and bird features within newly constructed buildings;
- Production of the Defra Metric Biodiversity Net Gain Calculations to minimise impacts on biodiversity and provide net gains in biodiversity; and
- Production of a Management Plan to ensure the long-term commitments to manage the planting, protection and enhancement of biodiversity in and around a new development site.

The site provides habitat for nesting birds, badger, hedgehog, amphibians and bats. Habitats on site will be lost to the proposals. There is likely to be low impacts on the local ecology due to the proposals if the recommendations within section 6 are implemented.

## 1.0 Introduction

---

Ascerta has been instructed by Castle Green Homes to carry out a Preliminary Ecological Appraisal of Land at Penmaenmawr Road, Llanfairfechan, LL33 0PH (hereafter referred to as the site). The site OS grid reference is SH 686 753 and the What3Words reference is warmers.remembers.camped. The extent of the site is displayed in photograph 1.1 below.

**Photograph 1.1: Extent of site**

The site was visited on 10th October 2022 by Lizzie Atkinson when a Preliminary Ecological Appraisal, which includes an assessment of the potential for protected species to be using the site or surroundings, was carried out in accordance with the *Handbook for Phase 1 Habitat Survey: a Technique for Environmental Audit (JNCC, 2010)*. The report was prepared following methods detailed in the CIEEM *'Guidelines for Ecological Impact Assessment in the UK and Ireland'* (2018) and *'Guidelines for Ecological Report Writing'* (2017). This report presents the results of the survey including evaluation of habitats on site and potential for protected species to be using the site. The report includes recommendations for further actions where applicable in order to satisfy current wildlife legislation and to achieve our client's objectives. Relevant legislation is detailed within Appendix 4.

The site comprises a semi-improved grassland field with pockets of scrub and tall ruderal throughout. A wet ditch (D1) flows through the western half of the site and a dry ditch (D2) is directly connected. Species poor hedgerow borders the north-western and south-eastern site boundaries and scattered trees are present throughout.

Our client seeks planning consent to redevelop the site for 55 residential dwellings, associated access roads and area of Public Open Space (POS).

## 2.0 Objectives

---

Our client's objectives are to assess the potential ecological constraints of the proposed development site.

Our objectives are as follows:

- Identify and evaluate any features of ecological value and the potential of the site to support protected species based on the walkover survey and biological records search;
- Identify designated sites within 2km of the site;
- Review protected species records within 2km of the site;
- Map the habitats within the site using JNCC (2010) methods;
- Provide recommendations for further species-specific surveys and mitigation measures where current legislation requires;
- Provide recommendations that seek to enhance the ecological value of the site;
- Provide recommendations to assist our clients in achieving their objectives whilst satisfying current wildlife legislation.

## 3.0 Survey Methods

---

The Preliminary Ecological Appraisal involved the collection and review of data from a desk study and field survey along with assessment of the value of the habitats following CIEEM guidelines.

### 3.1 Desk Study

A review of the designated sites and habitats within 2km of the site has been undertaken in November 2022 using the Multi-Agency Geographic Information for the Countryside (MAGIC) and the Natural Resources Wales websites.

A review of UK and Local priority species and habitats known to occur within 2km of the site has been undertaken in November 2022; using the Joint Nature Conservation Committee website, Multi-Agency Geographic Information for the Countryside (MAGIC) and local records from Cofnod North Wales Environmental Information Service (Appendix 5).

### 3.2 Field Survey

A walkover survey of the site was conducted on 10th October 2022 by Lizzie Atkinson when the habitat types and features of ecological interest were identified and mapped in compliance with the Handbook for Phase 1 Habitat Survey: A Technique for Environmental Audit (*JNCC, 2010*). The survey methods involve the recording and mapping of all habitat types and ecological features present on site, including the identification of the main species present and examination of the potential for any protected species. Habitats were mapped and target notes made for any interesting features.

The surveys particularly focused on the following species and habitat features:

- Mammals (badgers, bats, otter, and water vole);
- Birds (including species potentially associated with 'European Sites');
- Amphibians and reptiles;
- Invertebrates;
- Hedgerows and boundaries;
- Invasive plant species; and
- Plant communities and trees.

Weather conditions during the survey were mild (13°C), dry and sunny (1/8 cloud cover) with a F1 (Beaufort Scale) light air, therefore appropriate for this type of survey.

### 3.3 Bat Survey Methods

The survey methods followed the guidelines set out by the Bat Conservation Trust Bat Surveys for Professional Ecologists Good Practice Guidelines – 3rd Edition (2016). Habitats, buildings and trees were assessed for suitability for use by bats and categorised independently using table 4.1 page 35 within the Bat Conservation Trust Guidelines (Collins, 2016).

#### Preliminary Ecological Appraisal for Bats

Habitats on site were assessed for their suitability for bats to use them for roosting, commuting and foraging both on the site and surrounding area. Commuting and foraging habitat suitability was categorised **low** to **high**. Commuting and foraging habitat valued as **moderate** or above may need further survey effort if lost to the proposals.

#### Preliminary Roost Assessment Trees

All trees were inspected for Potential Roost Features (PRFs). Features searched for included: Natural or woodpecker holes, cracks/splits in major limbs, loose bark, hollows/cavities, dense epicormic growth, bird and bat boxes. Where such features were found they were investigated for scratches or staining, bat droppings and smoothing of surfaces around entry points. Trees assigned a suitability of **moderate** or above may require further inspection if they are to be lost to the development.

**Table 4.1: Guidelines for assessing Potential Roost Features (PRFs), commuting and foraging habitat within a proposed development site. Guidelines taken from table 4.1 page 35 of the Bat Conservation Trust Bat Surveys for Professional Ecologists Good Practice Guidelines – 3rd Edition (2016).**

<b>Suitability</b>	<b>Roosting Habitats</b>	<b>Commuting and Foraging Habitats</b>
<b><i>Negligible</i></b>	<i>Negligible habitat features on site likely to be used by roosting bats.</i>	<i>Negligible habitat features on site likely to be used by commuting or foraging bats.</i>
<b><i>Low</i></b>	<p><i>A structure with one or more potential roost sites that could be used by individual bats opportunistically. However, these potential roost sites do not provide enough space, shelter, protection, appropriate conditions <sup>a</sup> and/or suitable surrounding habitat to be used on a regular basis or by larger numbers of bats (i.e. unlikely to be suitable for maternity or hibernation <sup>b</sup>).</i></p> <p><i>A tree of sufficient size and age to contain PRFs but with none seen from the ground or features seen with only very limited roosting potential. <sup>c</sup></i></p>	<p><i>Habitat that could be used by small numbers of commuting bats such as a gappy hedgerow or unvegetated stream, but isolated, i.e. not very well connected to the surrounding landscape by other habitat.</i></p> <p><i>Suitable, but isolated habitat that could be used by small numbers of foraging bats such as a lone tree (not in a parkland situation) or a patch of scrub.</i></p>
<b><i>Moderate</i></b>	<i>A structure or tree with one or more potential roost sites that could be used by bats due to their size, shelter, protection, conditions<sup>a</sup> and surrounding habitat but unlikely to support a roost of high conservation status (with respect to roost type only – the assessments in this table are made irrespective of species conservation status, which is established after presence is confirmed).</i>	<p><i>Continuous habitat connected to the wider landscape that could be used by bats for commuting such as lines of trees and scrub or linked back gardens.</i></p> <p><i>Habitat that is connected to the wider landscape that could be used by bats for foraging such as trees, scrub, grassland or water.</i></p>
<b><i>High</i></b>	<i>A structure or tree with one or more potential roost sites that are obviously suitable for use by larger numbers of bats on a more regular basis and potentially for longer periods of time due to their size, shelter, protection, conditions <sup>a</sup> and surrounding habitat.</i>	<p><i>Continuous, high-quality habitat that is well connected to the wider landscape that is likely to be used regularly by commuting bats such as river valleys, streams, hedgerows, lines of trees and woodland edge.</i></p> <p><i>High-quality habitat that is well connected to the wider landscape that is likely to be used regularly by foraging bats such as broadleaved woodland, tree-lined watercourses and grazed parkland.</i></p> <p><i>Site is close to and connected to known roosts.</i></p>

<sup>a</sup> For example, in terms of temperature, humidity, height above ground level, light levels or levels of disturbance.

<sup>b</sup> Evidence from the Netherlands shows mass swarming events of common pipistrelle bats in the autumn followed by mass hibernation in a diverse range of building types in urban environments (Korsten et al., 2015). This phenomenon requires some research in the UK but ecologists should be aware of the potential for larger numbers of this species to be present during the autumn and winter in large buildings in highly urbanised environments.

<sup>c</sup> This system of categorisation aligns with BS 8596:2015 Surveying for bats in trees and woodland (BSI,2015).

### 3.4 Badger Survey Methods

The site was searched for setts and badger field signs including foraging areas, latrines and tracks. Attention was paid to the presence of the following field signs:

- Setts: single holes or a series of holes likely to be interconnected underground;
- Latrines: badgers usually deposit faeces in excavated pits;
- Paths and footprints;
- Scratching posts: at the base of trees;
- Snuffle holes: areas where badgers have searched for insects;
- Day nest: bundles of vegetation where badgers may sleep above ground; and
- Traces of hair.

### 3.5 Great Crested Newt Habitat Suitability Index (HSI)

The wet ditch (D1) was assessed for suitability as great crested newt breeding habitat. The HSI assessment followed the method described by Oldham *et al.* (2000) as updated by ARG UK (2010), involving an assessment of each water body against ten suitability indices:

- Location of the pond within the context of Britain;
- Total surface area of the pond;
- Pond drying (based on both local knowledge and field evidence);
- Water quality;
- Percentage perimeter shaded;
- Presence or absence of waterfowl;
- Presence or absence of fish;
- Number of water bodies situated within 1km;
- Suitability of terrestrial habitat; and
- Percentage macrophyte cover.

The HSI is calculated using an equation producing a single number between 0 and 1. The value provides an indication of whether the water body is likely to support a population of great crested newts. The lower the Index the less likely the location is to support a breeding population. Ponds are classed as Poor, Below Average, Average, Good or Excellent habitat suitability based on this value.

### 3.6 Water vole and Otter

The onsite wet ditch (D1) was assessed for use by otters and water voles following methods outlined in Chanin P (2003). *Monitoring the Otter Lutra lutra. Conserving Natura 2000 Rivers Monitoring Series No. 10, English Nature, Peterborough* and Strachan, R., Moorhouse, T., Gelling, M. (2011). *Water Vole Conservation Handbook*, 3<sup>rd</sup> Edition. Wildlife Conservation Research Unit: Abingdon.

## 3.7 Evaluation

Habitats and species on the site were evaluated following the '*Guidelines for Ecological Impact Assessment in the UK and Ireland*' 2018. A geographical frame of reference is assigned to each habitat and species, with International Value being most important, then National, Regional, County, District, Local and lastly, within the immediate Zone of Influence (Zoi) of the proposals only.

Value judgements are based on characteristics that can be used to identify ecological resources or features likely to be important in terms of biodiversity. These include site designations such as SSSIs. For undesignated features, the size, conservation status (locally, nationally or internationally), and the quality of the ecological resource are considered. Ecological resource quality can refer to habitats (for instance if they are particularly diverse, or a good example of a specific habitat type), other features (such as wildlife corridors or mosaics of habitats) or species populations or assemblages.

Although we cannot assess the survey findings fully in relation to the Environment Act and Biodiversity Metric, the recommendations detailed within this report aim to meet requirements of the Environment Act and Biodiversity Metric 3.1 as far as possible at this stage.

## 3.8 Limitations

The site visit was undertaken in October. Although this within the sub-optimal time of year for phase 1 habitat surveys, sufficient vegetation was present to enable habitat identification. It is not considered a limit to the conclusions of the report based on the habitats found within the site and the works proposed.

The absence of biological records does not necessarily mean the absence of species. This has been taken into account within the report conclusions.

The site was visited on only one occasion. This produces a snapshot of habitats and species on the site and others may be present at different times of the day or year. This limitation has been taken into account within this report.

## 4.0 Survey Results

---

### 4.1 Desk Study

Six statutory sites and thirteen non statutory sites were identified within a 2km radius of the proposed development site.

The following statutory sites were identified within the vicinity of the proposals (with approximate distance and direction from the site):

- Treth Lafan Site of Special Scientific Interest (SSSI) 175m north;
- Y Fenai a Bae Conwy/Menai Strait and Conwy Bay Special Area of Conservation (SAC), 175m north;
- Liverpool Bay/Bae Lerpwl (Wales) Special Protected Area (SPA), 350m north;
- Traeth Lafan/Lavan Sands, Conway Bay SPA, 175m north;
- Nant-y-Coed Local Nature Reserve (LNR), 1.4km south-east; and
- Traeth Lafan LNR, 175m north

The following non-statutory sites were identified within the vicinity of the proposals (with distance and direction from the site):

- Madryn grazing marsh and dunes (Glan-y-mor-Elias) Local Wildlife Site (LWS), 1.75km west;
- Llanerch Grassland and Woods LWS, 1.1km south-west;
- Nant y Coed, Llanfairfechan LWS, 1.4km south-east;
- Penmaenmawr Quarry Heath LWS, 740m east;
- Afon Llanfairfechan LWS, 600m west;
- Penmaenmawr Old Quarry Heath LWS, 550m east;
- Mynydd Uchaf Heath LWS, 1.65km east;
- Henar LWS, 460m south-east;
- Ffridd Mynydd Uchaf LWS, 1.6km south-east;
- Coed Nant y Felin LWS, 1.25km south-west;
- Bryn-y-neuadd LWS, 1.5km south-west;
- Glan-y-mor Elias LWS, 1.75km west; and
- Bryn-y-neuadd LWS, 1.25km south-west.

The site lies within a B-Lines, Cymru site and 1.25km north of Snowdonia National Park.

The site does not lie within a Natural Resources Wales SSSI Impact Risk Zone as mapped on Magic Maps.

Following a review of records held by the Cofnod North Wales Environmental Information Service, several priority species that have the potential to occur within the vicinity of the proposed development have been identified. These include birds, bats, badger, hedgehog, otter, brown hare, reptiles and amphibians. The species records are summarised below, and the detailed records held by Cofnod North Wales Environmental Information Service within 2km of the site are displayed within Appendix 5.

*Species records (oystercatcher and curlew) were returned by Cofnod North Wales Environmental Information Service within the site boundary.*

### **Birds**

One hundred and ninety-one bird species records were returned within 2km of the site. Species present include pink footed goose, whooper swan, skylark, lapwing, snipe, barn owl, peregrine, lesser redpoll, swift and snow bunting. Records for flocks of oystercatcher and flocks of curlew were returned within the site boundary within 2010. The most recent record was in August 2022 for a flock of chough, located 1.3km south-east within an unknown area of Llanfairfechan.

### **Bats**

Eighty-two records of bats were returned within 2km of the site. Seven records were for noctule bat, fourteen records for common pipistrelle, twelve for soprano pipistrelle, eight for brown long-eared bat, four for daubenton's bat, four for nathusus's pipistrelle, four for lesser horseshoe bat, six for myotis species, ten for pipistrelle bat species and thirteen for unknown bat species. The closest record was in 2018 for a common pipistrelle, soprano pipistrelle, noctule bat and pipistrelle bat species located approximately 48m north-west of the site within a residential area. The most recent record was in June 2020 for brown long-eared bat located 2km south-east of the site within Nant y Coed LNR/LWS.

### **Amphibians**

Thirty-two records of amphibians were returned within 2km of the site these records included nine for common toad, seventeen for common frog, three for palmate newt and three great crested newt (GCN). The closest record was in 2000 for two common toad records located 130m north of the site adjacent to the A55. The most recent record was in 2022 for a common frog located approximately 600m south-west of the site within an unknown area of Llanfairfechan.

### **Reptiles**

Three records of reptiles including one for common lizard, one for adder and one for slow-worm were returned within 2km of the site. The most recent record was in June 2022 for a slow-worm located 2km southwest of the site within Hafod Y Fedwen. The closest record was in May 2022 for a common lizard located 1.1km east of the site within Penmaenmawr Quarry LWS.

### ***Terrestrial mammals***

Nine records of badger were returned within 2km of the site, the closest record was in 2009 for a deceased badger located 931m west of the site along the A55.

Other mammal records returned within 2km of the site include thirteen for brown hare, forty-one for hedgehog and seven for otter.

No European Protected Species Licence (EPSL) applications within 2km of the site since 2016 were identified using Magic Maps.

A list of key habitats is shown in table 5.1 below and a summary description of key habitats within the site is provided in Section 5.2. Notes on the presence or potential presence of protected species are provided in Section 5.3. The Phase 1 Habitat map can be found in Appendix 1. The Target Notes (TN) and lists of species recorded during survey are presented in Appendix 2.

## **4.2 Habitat Survey**

The site comprises a semi-improved grassland field with pockets of scrub and tall ruderal throughout. A wet ditch (D1) flows through the western half of the site and a dry ditch (D2) is directly connected. Species poor hedgerow borders the north-western and south-eastern site boundaries and scattered trees are present throughout. These habitats are presented on plan P.1759.22.03 (Appendix 1).

The site lies on the outskirts of Llanfairfechan, approximately 0.5 miles from the town centre. The site is bound by the Penmaenmawr Road to the north-west, residential dwellings to the north-east and south-east and agricultural land to the south-west. The surrounding land use is predominately agricultural land and residential dwellings. The site lies approximately 175m south of statutory sites Treth Lafan Site SSSI/LNR, Y Fenai a Bae Conwy/Menai Strait and Conwy Bay SAC.

The habitat types identified within the site are detailed below and are displayed on drawing P.1759.22.03 *Phase One Habitat Survey* in Appendix 1 and on Photographs within Appendix 3. Species lists and target notes are displayed in Appendix 2.

### ***Dense/continuous scrub (A2.1)***

Pockets of mixed native species dense scrub is present throughout the site and species present include hawthorn and bramble. This habitat is displayed in photograph 1 within Appendix 3.

### ***Scattered trees (A3.1)***

Scattered trees are present throughout the site and species include oak, ash, beech, pine and larch. This habitat is displayed in photographs 2-4 within Appendix 3.

### ***Semi-improved grassland (B6)***

The site is predominantly semi-improved grassland. The sward height is approximately 15-20cm the grassland is dominated by Yorkshire fog with, poa sp., bent sp., rush sp., and fescue sp. Pockets of scrub and tall ruderal species have encroached the habitat. This habitat is displayed in photographs 5-6 within Appendix 3.

### ***Tall ruderal (C3.1)***

Tall ruderal species are present within the understorey of the scattered trees and have encroached the semi-improved grassland habitat. Species present include broadleaved dock, common nettle and creeping thistle. This habitat is displayed in photograph 7 within Appendix 3.

### ***Species Poor Hedge (J2.1.2)***

Species poor hedgerows line the north-western and south-eastern site boundaries. Species present include predominately bramble and hawthorn with strands of ivy. This habitat is displayed in photographs 8-9 within Appendix 3.

### ***Running water (G1)***

A wet ditch (D1) flows south to north through the western half of the site. The ditch was holding approximately <10cm deep and is culverted at both ends. Large boulders are present within the ditch and the banks at the northern half are steep and constructed in concrete. The ditch (D1) is surrounded by semi-improved grassland and scattered trees. The ditch (D1) was assessed for its great crested newt suitability and is discussed further in section 4.3 below. This habitat is displayed in photographs 10-11 within Appendix 3.

### ***Dry ditch (J2.6)***

A dry ditch (D2) is directly connected to ditch D1 and was encroached with vegetation and boulders and stones present in the ditch bed. The dry ditch (D2) is culverted and run off pipes are also present within the banks. The dry ditch (D2) is surrounded by semi-improved grassland, tall ruderal and scattered trees. This habitat is displayed in photograph 12 within Appendix 3.

## 4.3 Great Crested Newt Suitability

### Great Crested Newt Habitat Suitability Index (GCN HSI)

Table 4.1: Standing Water Description and GCN HSI with full details in Appendix 6.

Standing water description	Photograph
<p><b>Ditch (D1):</b> is the onsite wet ditch that flows south to north within the western half of the site. The ditch was holding &lt;10cm deep and large boulders and stones are present with the bed of the ditch. The ditch is culverted at both ends and the banks along the northern half of the ditch are steep and constructed in concrete. The ditch is surrounded by semi-improved grassland and scattered trees. The HSI score was 0.59 meaning it has <b>Below Average</b> suitability for use by great crested newt for breeding.</p>	

## 4.4 Protected and Notable Species

### *Birds*

The habitats within the site provide suitable foraging and nesting opportunities for bird species. These habitats include scrub, semi-improved grassland, scattered trees, species poor hedgerow and tall ruderal. During the survey jackdaw, goldfinch and crow were identified within the site.

The site lies 175m south of designated sites Treth Lafan Site SSSI/LNR, Y Fenai a Bae Conwy/Menai Strait and Conwy Bay SAC and Traeth Lafan/Lavan Sands, Conway Bay SPA and 350m south of Liverpool Bay/Bae Lerpwl (Wales) and these sites are of international importance for wintering wading birds. Records for curlew and oystercatcher have also been returned within the site boundary.

### *Bats*

No buildings are present within the site. Trees within the site have the potential to support roosting bats. Trees T1 (oak) was ivy clad and tree T2 (oak) has broken branches and cracked bark and both trees were assessed provide **low** bat roost potential (Drawing P.1759.22.01 *Tree Survey, Appendix 1*). Tree T3 (Ash) was noted to have broken and split branches and large crevice in the tree stem and was assessed to provide **high** bat roost potential.

Trees within groups G1, G2 and G3 (Drawing P.1759.22.01 *Tree Survey, Appendix 1*) were noted to possess features in including cracked and broken limbs that may support roosting bats, however these trees are to be retained within current proposals.

The scrub, species poor hedgerow, tall ruderal, wet ditch (D1), semi-improved grassland and scattered trees within the site provide good suitability for commuting and foraging bats, with good connectivity to the surrounding land use.

#### *Badger and other small mammals*

The scrub, species poor hedgerow, tall ruderal, semi-improved grassland and scattered tree habitats within the site provide foraging and shelter habitat for badger and other small mammal species such as hedgehog. No evidence of badger or hedgehog was identified within the site during the survey.

#### *Water vole and otter*

The onsite wet ditch (D1) provides very limited habitat for water vole and otter as the ditch is culverted at both ends and holding <10cm water deep. Boulders are also present within the ditch and the banks are steep and constructed in concrete at the northern end, further limiting the suitability for both species. Water vole and otter will not be impacted by the proposals within the site therefore, water vole and otter do not require further consideration within this planning application and will not be discussed further within this report.

#### *Amphibians*

No ponds are present within the site. The onsite wet ditch (D1) provides very limited breeding suitability for amphibians as the northern half of the ditch has steep concrete sides and there is very little vegetation present within the ditch. A bath (TN1) with run off pipe was also identified within the site, however the construction and materials of the bath are steep and slippery, making for unsuitable breeding habitat for amphibians.

The habitats within the site (semi-improved grassland, scrub, tall ruderal and species poor hedgerow) provide terrestrial habitats for amphibians and the water bodies will provide some limited aquatic habitat for amphibians. The wood pile (TN2) and stone pile (TN3) provide areas of refuge for amphibians.

#### *Reptiles*

The habitats within the site provide very limited suitability to support reptiles. Ecotones are not present within the site and the habitats are scattered across the site with no suitable connectivity. Additionally, only three records of reptiles have been returned within 2km of the site and all lie over 1km from the site. It is considered that reptiles will not be adversely impacted by the proposals, and do not require further consideration within this planning application and will not be discussed further within this report.

#### *Invasive species*

No non-native invasive species were identified within the site during the walkover survey.

## 5.0 Evaluation and Recommendations

---

### 5.1 Designated Sites and Habitats

The site lies 175m south of Statutory sites Treth Lafan SSSI/LNR, Y Fenai a Bae Conwy/Menai Strait and Conwy Bay SAC, Traeth Lafan/Lavan Sands, Conway Bay SPA and approximately 350m south of Liverpool Bay/Bae Lerpwl (Wales) SPA. It is unlikely that the sites will be directly impacted by the proposals during the construction phase due barriers in the form of residential dwellings and the busy North Wales Expressway (A55) that will likely absorb any noise, dust and pollution. The proposals are for 55 residential dwellings, and it is considered that the proposals will likely indirectly impact these sites due to an increase in recreational pressure. The impacts may include increased footfall from the new dwellings as well potential disturbance for species associated with designated areas from dogs. It is recommended that a mitigation strategy is produced and implemented in order to lesson potential impacts post development.

All non-statutory sites lie over 400m from the site, therefore will not be directly impacted by the proposals during the construction phase due to the separation distance. It is likely that the sites will receive a small increase in recreational pressure due to the proposals. It is considered that there will be no adverse impact on any non-statutory sites in the vicinity as a result of the proposals.

The site does not lie within a Natural Resources Wales SSSI Impact Risk Zone as mapped on Magic Maps. It is considered that there will be no impact on any SSSIs in the vicinity as a result of the proposals.

The habitats on site comprise semi-improved grassland, scrub, tall ruderal, wet ditch (D1), dry ditch (D2), species poor hedgerow and scattered tree. These habitats are considered to have an ecological value of **within the zone of influence** of the site or lower. The site contains no designated or priority habitats, however, lies approximately 175m south of designated sites Treth Lafan SSSI/LNR, Y Fenai a Bae Conwy/Menai Strait and Conwy Bay SAC, Traeth Lafan/Lavan Sands, Conway Bay SPA.

The production of the Defra Metric Biodiversity Net Gain Calculations is recommended to minimise impacts of biodiversity and provide net gains in biodiversity and the production of a Management Plan to ensure the long-term commitments to manage the planting, protection and enhancement of biodiversity in and around the new development site.

## 5.2 Protected and Notable Species

### *Birds*

The semi-improved grassland, species poor hedgerow, tall ruderal, scattered trees and scrub provide suitable habitat for nesting and foraging bird species. It is recommended that vegetation clearance and pruning should be undertaken outside of the nesting bird season (1<sup>st</sup> March to 31<sup>st</sup> August Inclusive) to avoid any impact on breeding birds. If vegetation clearance cannot be undertaken outside of the breeding bird season, a nesting bird check undertaken by a suitably experienced ecologist should be undertaken immediately prior to works commencing. If an active birds' nest is identified a suitable buffer zone should be implemented where no works are to occur within until the young have fledged the nest.

The site provides foraging and refuge habitat for wintering birds and records of oystercatcher and curlew have been returned within the site boundary. The site lies 175m south of designated sites Treth Lafan Site SSSI/LNR, Y Fenai a Bae Conwy/Menai Strait and Conwy Bay SAC and Traeth Lafan/Lavan Sands, Conway Bay SPA and 350m south of Liverpool Bay/Bae Lerpwl (Wales) and these sites are of international importance for wintering wading birds. Wintering bird surveys are recommended between November and February/March. The recommended minimum survey effort is for three wintering bird surveys within this period.

### *Bats*

Bat records were returned within 2km of the site. The closest record was recorded 48m north-west of the site.

No buildings are present within the site. The habitats on site provide at least **moderate** suitability for commuting and foraging bats and will require nocturnal bat activity surveys and the deployment of static bat detectors.

Trees within the site have the potential to support roosting bats. Trees T1 (oak) was ivy clad and tree T2 (oak) has broken branches and cracked bark and both trees were assessed provide **low** bat roost potential (Drawing P.1759.22.01 *Tree Survey, Appendix 1*). Tree T3 (Ash) was noted to have broken and split branches and large crevice in the tree stem and was assessed to provide **high** bat roost potential.

Tree T3 is to be removed to accommodate proposals, therefore will require a minimum of three nocturnal bat surveys undertaken between May and September (with at least one to occur between May and August) to assess if bats are using tree T3 within the site as a roost and to inform further recommendations if required.

Trees T1 and T2 were assessed to provide **low** bat roost potential at the time of the site walkover. Potential bat roosting features on trees develop as trees age, therefore if works to T1 and T2 have not occurred by October 2023, an updated daytime inspection will be required. If trees T1 and T2 are then assessed to provide **moderate** or higher bat roost potential, nocturnal surveys will be required.

Trees within groups G1, G2 and G3 (Drawing P.1759.22.01 *Tree Survey, Appendix 1*) were noted to possess features including cracked and broken limbs that may support roosting bats, however these trees are to be retained within current proposals. If, at a later stage, trees within these groups are to be

removed or pruned to accommodate proposals, a preliminary bat roost assessment of those trees to be affected should be undertaken to assess their potential to support a bat roost and to inform further recommendations if required.

To maintain the sites value for foraging and commuting bats, it is recommended that sensitive lighting be used to meet Bat Conservation Trust lighting guidance so not to cause detrimental effect to light sensitive species.

#### *Badger and other small mammals*

The site provides habitat for badger and hedgehog within the scrub, semi-improved grassland, tall ruderal, species poor hedgerow and scattered trees. These habitats are likely to be impacted by the proposals and therefore, it is recommended that a Hedgehog Reasonable Avoidance Measures (RAMS) Method Statement is produced and implemented during the works to avoid harm to this species. The RAMS should include:

- Construction materials stored on pallets so as not to create a hedgehog refuge area; and
- Existing refuge areas (scrub) should be removed by hand so hedgehog within are not harmed during their removal.

To enable hedgehog continued use of the site it is advised that gaps of at least 13cm by 13cm are left under any new garden fences to enable hedgehog to roam freely within the area following development.

As badger are a mobile species it is recommended an updated badger check of suitable habitats (scrub and semi-improved grassland) is undertaken prior to works commencing within the site to avoid harm to badger that may have moved into the habitats within the site. A Badger Reasonable Avoidance Measures (RAMS) Method Statement is produced and implemented during the works to avoid harm to this species. The RAMS should include:

- Construction materials stored on pallets so as not to create a badger refuge area; and
- Existing refuge areas (scrub) should be removed by hand so badger within are not harmed during their removal.

#### *Invasive species*

No non-native invasive species were identified during the walkover survey. As invasive species can colonise very quickly it is recommended that an updated check invasive species check is undertaken prior to the start of works.

#### *Amphibians*

Following a Habitat Suitability Index (HSI) assessment during the site walkover survey, the onsite ditch (D1) returned a HSI assessment score of 0.59 below average and the northern half of the ditch has steep concrete sides and there is very little vegetation present within the ditch, making it further unsuitable breeding habitat for GCN. A bath (TN1) with run off pipe was also identified within the site however the construction and materials of the bath are steep and slippery, making for unsuitable breeding habitat for GCN. No further survey effort for GCN will be required.

The site provides terrestrial habitat within the semi-improved grassland, species poor hedgerow and scrub areas. The wood pile (TN2) and stone pile (TN3) provide areas of refuge for amphibians. Amphibians may also use water bodies that have scored below average or below. These habitats are likely to be impacted by the proposals and therefore, it is recommended as the areas to be lost and small in size that an Amphibian Reasonable Avoidance Measures (RAMS) Method Statement is produced and implemented during the works to avoid harm to this species.

### 5.3 Enhancements

In order to meet requirements for biodiversity protection and enhancement outlined within the NPPF, it is recommended that ecological enhancements are included. These could include:

1. Provision of 7 bird boxes (25mm and 32mm entrance hole box, house sparrow terrace, swift box), attached to or integrated within new buildings or retained tree on site;
2. Provision of 7 bat features (e.g. Vivara Pro WoodStone Bat box or similar) attached to a retained tree on site or provision of a bat box (e.g. Vivara bat bricks or '*bird brick houses*' bat boxes) integrated within new buildings; and
3. Suitable landscaping incorporating species that provide a food or shelter resource to wildlife to include hawthorn, hazel, holly, blackthorn, field maple, dog rose and honeysuckle as hedgerow species and oak, alder, field maple, silver birch, crab apple, rowan and bird cherry as tree species together with implementing a relaxed mowing regime and establishing wildflowers in these areas.

## 6.0 Conclusions

---

The site was subject to an extended phase one habitat survey. During the survey and following review of historical species records, it is considered that an impact on birds, bats, badger, amphibians and hedgehog are likely to occur in relation to the proposals for the site. The following recommendations have been made to avoid an impact on these species:

- If works have not begun by October 2023, an updated site visit to assess the habitats within the site and a preliminary bat roost assessment of trees T1 and T2 will be required;
- Nocturnal bat activity surveys and the deployment of static bat detectors (between April and October in suitable weather conditions) to assess the level of bat activity throughout the site;
- A minimum of three nocturnal bat surveys on tree T3 between May and September (with at least one to occur between May and August) to determine if bats are using the tree as a roost;
- Sensitive lighting to be used to meet Bat Conservation Trust lighting guidance so not to cause detrimental effect to light sensitive species;
- Wintering birds surveys to be carried out between November and February/March;
- Production and implementation of a hedgehog RAMS to avoid any harm to this species during the proposed works;
- Production and implementation of a badger RAMS to avoid any harm to this species during the proposed works;
- Production and implementation of an amphibian RAMS to avoid any harm to this species during the proposed works;
- Precautionary check for badger prior to works commencing to assess if badger are using the habitats within the site for shelter;
- Vegetation clearance or pruning should be undertaken outside of the nesting bird season (1st March to 31st August Inclusive) to avoid any impact on breeding birds. Or a nesting bird check undertaken by a suitably experienced ecologist should be undertaken immediately prior to works commencing;
- Precautionary check for invasive prior to works commencing;
- Enhancing the site for species through appropriate landscape planting that includes native, species rich hedgerows, trees and areas of wildflowers plus provision of integrated bat and bird features within newly constructed buildings;
- Production of the Defra Metric Biodiversity Net Gain Calculations to minimise impacts on biodiversity and provide net gains in biodiversity; and
- Production of a Management Plan to ensure the long-term commitments to manage the planting, protection and enhancement of biodiversity in and around a new development site.

It is considered that there would be very limited impacts on the local ecology as a result of the proposals, provided the recommendations detailed within section 5.0 above are followed.

# Relevant Legislation

## European Legislation

The following Directives have been adopted by the European Union and provide protection for fauna and flora species of European importance and the habitats which support them:

- Directive 2009/147/EC on the Conservation of Wild Birds (Birds Directive);
- Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (Habitats Directive).

## UK Legislation

The Habitats Directive has been transposed into national legislation through the Conservation of Habitats and Species (Amendment) (EU Exit) Regulations 2019 (The Habitats Regulations). This provides for the designation and protection of 'European Sites' (SPAs, SACs and Ramsar Sites, including proposed or potential European Sites) and the protection of 'European Protected Species'.

The key UK legislation relating to nature conservation is the Wildlife and Countryside Act 1981 (as amended) (W&C Act). This Act is supplemented, *inter alia*, by provision in the Countryside and Rights of Way (CRoW) Act 2000, and the Natural Environment and Rural Communities Act 2006 (NERC Act). Additional species and habitat specific UK legislation includes the Protection of Badgers Act 1992 and the Hedgerow Regulations 1997.

The Environment Act sets out how the UK will maintain environmental standards following leaving of the EU. The Act builds on the vision of the 25 Year Environment Plan, with the ambition from the government to leave the environment in a better state than it was when inherited.

The Defra Biodiversity Metric is being implemented to work alongside the Environment Act. This tool calculates potential biodiversity impacts as a result of development and identifies mitigation and compensation requirements to ensure no net loss of biodiversity. In addition, it identifies measures that can be implemented in order to meet Biodiversity gain as a result of development. Defra released a beta version of the biodiversity metric in July 2019. This metric is likely to be the default metric used by councils.

The National Planning Policy Framework (NPPF) 2021 has been published to provide further planning guidance. Wildlife, biodiversity and ecological networks are referred to in Section 15 '*Conserving and enhancing the natural environment*'. The NPPF states that the planning system should contribute to and enhance the natural and local environment by: recognising the wider benefits of ecosystem services, minimising impacts on biodiversity and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future

pressures. Further guidance is provided within Government Circular *06/05: Biodiversity and Geological Conservation - Statutory Obligations and Their Impact Within the Planning System*.

### **Species and Habitats of Principal Importance**

Species and Habitats of Principal Importance are listed under section 41 of the NERC Act and are a material consideration in planning decisions. Planners require relevant, up to date information from ecological surveys in order to assess the effects of a proposed development on biodiversity as Councils have a statutory obligation under section 40 of the NERC Act to consider biodiversity conservation in the determination of planning applications.

Background information about the lists of priority habitats and species (Species and Habitats of Principal Importance) can be found within the UK Biodiversity Action Plan (UK BAP). Although this has been succeeded by the '*UK Post-2010 Biodiversity Framework*', many of UK BAP tools are still relevant. BAPs identify habitats and species of nature conservation priority on a UK (UK BAP) and Local (LBAP) scale. Most BAP priority habitats and species have Habitat Action Plans (HAP) and Species Action Plans (SAP) and there are also "grouped action plans" for groups of related species with similar conservation requirements. The LBAP relating to this Site is the Conwy Biodiversity Action Plan.

## ***Badgers***

The legislation protecting badgers in Wales is the Protection of Badgers Act 1992.

Under the Protection of Badgers Act 1992 it is an offence *inter alia* to:

- Wilfully kill, injure or take a badger, or to attempt to do so;
- Cruelly ill-treat a badger; or
- Intentionally or recklessly interfere with a badger sett by (a) damaging a sett or any part of one; (b) destroying a sett; (c) obstructing access to or any entrance of a sett; (d) causing a dog to enter a sett; or (e) disturbing a badger when it is occupying a sett.

The Badger Act 1992 defines a badger's sett as "*any structure or place which displays signs indicating current use by a badger*"

The Welsh Government has authority under Section 10(2) and (3) of the Act to issue licences to interfere with badger setts for:

1. The purpose of any agricultural or forestry operation;
2. The purpose of any operation to maintain or improve any existing watercourse or drainage works, or to construct new works required for the drainage of land, including works of defense against seawater or tidal water, and
3. Controlling foxes in order to protect livestock and penned game

Kill or take badgers or to interfere with their setts for:

1. The purpose of preventing the spread of disease; and
2. The purpose of preventing serious damage to land, crops, poultry or any other form of property.

The Natural Resources Wales are also a licensing authority under the 1992 Act. In relation to disturbance of badgers, Natural Resources Wales (2018) gives guidelines on disturbance which will require a licence. These includes: "*using very heavy machinery (generally tracked vehicles) within 30 metres of any entrance to an active sett; using lighter machinery, particularly for any digging operation, within 20 metres; light work such as hand digging or scrub clearance within 10 metres. There are some activities which may cause disturbance at greater distances (such as using explosives or pile driving) and these should be given individual consideration.*"

## ***Bats***

In England and Wales, all bats and their roosts are protected under the Conservation of Habitats and Species Regulations 2017 and the Wildlife & Countryside Act 1981 (as amended). Several species of bat are also highlighted as Priority Species under the UK Biodiversity Action Plan and within the Local BAP.

Under the current legislation as summarised on pages 8 and 9 of the Bat Surveys for Professional Ecologists Good Practice Guidelines – 3rd Edition (2016) it is a criminal offence to:

*“To kill, capture, injure or take a wild bat;*

- *To damage or destroy a place used by a bat for breeding or resting. All offences of this nature are identified within the Habitats Regulations. This offence is unique in that it can be committed accidentally. No element of intentional, reckless or deliberate action needs to be evidenced;*
- *To disturb bats anywhere (roosts, flight lines or foraging areas) if levels of disturbance can be shown to impair their ability to survive, to breed or reproduce, to rear or nurture their young, to hibernate or migrate or to affect significantly local distribution or abundance;*
- *To intentionally or recklessly disturb a bat, whilst it is occupying a place of shelter or protection;*
- *To intentionally or recklessly obstruct access to any place used by a bat for shelter or protection; and*
- *To be in possession or control of a bat alive or dead (or any part of a bat or anything derived from a bat, although bat droppings are generally considered to be acceptable), or to transport a bat, to sell or exchange a bat or to offer to sell or exchange a bat taken from the wild.”*

### ***Breeding Birds***

Breeding Birds are protected under the Wildlife and Countryside Act which make it an offence to:

- *intentionally kill, injure or take any wild bird or take, damage or destroy the nest of any wild bird whilst it is in use or being built;*
- *intentionally take or destroy the egg of any wild bird;*
- *have in one's possession or control any wild bird, dead or alive, or any part of a wild bird (including eggs), which has been taken in contravention of the Act or the Protection of Birds Act 1954;*
- *intentionally or recklessly disturb any wild bird listed on Schedule 1 while it is nest building, or at a nest containing eggs or young, or disturb the dependent young of such a bird.*

### ***Invasive Species***

It is an offence under Section 14(2) of the Wildlife and Countryside Act 1981 to ‘plant or otherwise cause to grow’ in the wild any plant in Schedule 9 Part II.

**It is a criminal offence to intentionally, wilfully kill, injure or take any of the aforementioned protected species or to destroy or disturb its habitat.**

### **Local Policy**

The site lies within Conwy and is covered by Conwy Local Development Plan 2007-2022 (Adopted October 2013) and extracts policies within The Natural Environment Statement. The policies of relevance are NTE/1-6.

A full review of the plan is currently being carried out.

**BAP** - UK Biodiversity Action Plan Priority Species, **BDir1** - EU Birds Directive Annex 1 - Birds which are the subject of special conservation measures, **BDir2.1** - EU Birds Directive Annex 2.1 - Birds which may potentially be hunted, **BDir2.2** - EU Birds Directive Annex 2.2 - Birds which may potentially be hunted within certain member states, **Bern2** - Bern Convention on the Conservation of European Wildlife and Natural Habitats, Appendix 2 - Strictly protected fauna species, **Bern3** - Bern Convention on the Conservation of European Wildlife and Natural Habitats, Appendix 3 - Protected fauna species, **Bonn2** - Bonn Convention on the Conservation of Migratory Species of Wild Animals, Appendix 2 - Migratory Species to be the subject of agreements, **CHS2** - The Conservation of Habitats and Species Regulations 2010, Schedule 2 - European Protected Species of Animals, **CHS4** - The Conservation of Habitats and Species Regulations 2010, Schedule 4 - Animals which may not be captured or killed in certain ways, **CITES-A** - Convention on International Trade in Endangered Species, Annex A - Species threatened with extinction, **CITES-B** - Convention on International Trade in Endangered Species, Annex B - Species that may become extinct unless trade is closely controlled, **CITES-C** - Convention on International Trade in Endangered Species, Annex C - Species subject to regulation, **GBNNSIP** - Great Britain Non-native Species Inventory Portal Checklist of Non-native Species, **HDir2** - Habitats Directive, Annex II - Species requiring designation of Special Areas of Conservation, **HDir4** - Habitats Directive, Annex IV - Species in need of strict protection, **HDir5** - Habitats Directive, Annex V - Species where population management is decided by individual countries, **INNS** - Invasive Non-native Species, **LBAP-A** - Anglesey Local Biodiversity Action Plan, **LBAP-C** - Conwy Local Biodiversity Action Plan, **LBAP-D** - Denbighshire Local Biodiversity Action Plan, **LBAP-F** - Flintshire Local Biodiversity Action Plan, **LBAP-G** - Gwynedd Local Biodiversity Action Plan, **LBAP-S** - Snowdonia National Park Authority Local Biodiversity Action Plan, **LBAP-T** - North and Mid Wales Trunk Road Agent Biodiversity Action Plan, **LBAP-W** - Wrexham Local Biodiversity Action Plan, **LI-50** - Locally Important Species in Vice-County 50: Denbighshire, **PBA** - Protection of Badgers Act 1992, **RDB-N** -

Red Data Book listing (not based on IUCN guidelines) - Notable, **RDB-NB** - Red Data Book listing (not based on IUCN guidelines) - Notable B, **RDB-NR** - Red Data Book listing (not based on IUCN guidelines) - Nationally Rare, **RDB-NS** - Red Data Book listing (not based on IUCN guidelines) - Nationally Scarce, **RL-CR** - IUCN Red List of Threatened Species - Critically Endangered, **RL-DD** - IUCN Red List of Threatened Species - Data Deficient, **RL-EN** - IUCN Red List of Threatened Species - Endangered, **RL-NT** - IUCN Red List of Threatened Species - Near Threatened, **RL-PX** - IUCN Red List of Threatened Species - Possibly Extinct, **RL-RE** - IUCN Red List of Threatened Species - Regionally Extinct, **RL-VU** - IUCN Red List of Threatened Species - Vulnerable, **S7** - Environment (Wales) Act 2016 (Section 7), **UKBA** - RSPB/BTO Birds of Conservation Concern - Amber list (not based on IUCN criteria), **UKBR** - RSPB/BTO Birds of Conservation Concern - Red list (not based on IUCN criteria), **WBA** - RSPB/BTO Birds of Conservation Concern in Wales - Amber list (not based on IUCN criteria), **WBR** - RSPB/BTO Birds of Conservation Concern in Wales - Red list (not based on IUCN criteria), **WCA1.1** - Wildlife & Countryside Act 1981 Schedule 1.1 - Birds which are protected at all times, **WCA1.2** - Wildlife & Countryside Act 1981 Schedule 1.2 - Birds which are protected during the close season, **WCA5** - Wildlife & Countryside Act 1981 Schedule 5 - Animals which are protected, **WCA8** - Wildlife & Countryside Act 1981 Schedule 8 - Plants which are protected, **WCA9** - Wildlife & Countryside Act 1981 Schedule 9 - Animals and plants which may not be released/planted or allowed to escape/grow in the wild

- PUBLIC VERSION

## Data Description

<b>Distance</b>	Indicates the distance, in metres, between the grid reference of the record (using the central point of the grid square) and the search location. For any Sensitive Species Records, this should not be released into the Public Domain.
<b>Species Name</b>	Name of the taxon (usually identified to species level) using the binomial system.
<b>Grid Reference</b>	Grid reference based on the Ordnance Survey grid system.
<b>Date</b>	Date on which the record was made. In some cases this might be a date range, or a vague date such as 'Summer 2010'.
<b>Recorder(s)</b>	One or more people who made the original observation and recorded it in some way. It may have subsequently been included in a data collation by another person or it may have been submitted to the LERC directly.
<b>Abundance</b>	Number of individuals recorded. Where not specified it is assumed that at least one was present.
<b>Record Type</b>	A description of the type of record.
<b>Site Name</b>	The site name (if one has been supplied). For any Sensitive Species Records, this cannot be released into the Public Domain.
<b>Notes</b>	Any additional notes about the sighting. For any Sensitive Species Records, this cannot be released into the Public Domain.
<b>Dataset ID</b>	ID of this dataset. See 'Important Issues' for more details.
<b>Lists</b>	Any local, national or international conservation statuses or legal protection which apply to this species and whether it is included in any Local Biodiversity Action Plans. See 'Abbreviations' for more details.
<b>V</b>	An indicator showing the level of confidence held in the record's correct identification.

## Dataset Information

The records in these results are drawn from the following datasets. Use the Dataset ID next to each record to find its dataset.

Dataset ID	Title	Acknowledgements	Type
D0026/041/01	Records captured from CCW regional files - CCW Files SJ18.1 & SJ18.2 - SSSI: Dee Estuary/Aber Afon Dyfrdwy - Scientific Information	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/042/01	Records captured from CCW regional files - CCW Files SJ18.1 & SJ18.2 - SSSI: Dee Estuary/Aber Afon Dyfrdwy - Scientific Information	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/208/01	Records captured from CCW regional files - CCW File SH49 - Un-named File	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/217/01	Records captured from CCW regional files - CCW File SH67 - Bats	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/235/01	Records captured from CCW regional files - CCW File 2.1.1.8 - North Wales - Ministries Transport and Civil Aviation. North Wales Expressway A55	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/247/01	Records captured from CCW regional files - CCW File Bat Rescue Register (no filing reference) - Anglesey and Caernarfonshire (Vice-Counties 49 and 52)	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0043/001/03	Bat records held by Snowdonia National Park Authority.	Awdurdod Parc Cenedlaethol Eryri/Snowdonia National Park Authority	Species
D0045/001/02	Wales Otter Survey Database	Joint Nature Conservation Committee (NBN download, 21/01/2020)	Species
D0054/001/03	Vice-County dataset - Moth records from Caernarfonshire Vice-county (49) - Complete database	Andrew Graham and Julian Thompson	Species
D0055/001/01	Historic Amphibian and Reptile species database for North West Wales (VCs 48, 49 and 52)	North West Wales Amphibian and Reptile Group	Species
D0059/003/01	North Wales badger records held by Clwyd Badger Group (including some historic data) - Historic sett data from the old county of Gwynedd	Gwynedd and Clwyd Badger Groups (clwydbadgergroup@btinternet.com)	Species
D0061/001/01	Cambrian Ornithological Society data digitised by Cofnod - 2000 data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species
D0061/002/01	Cambrian Ornithological Society data digitised by Cofnod - 2003 Data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species
D0061/003/01	Cambrian Ornithological Society data digitised by Cofnod - 2007 data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species
D0061/004/01	Cambrian Ornithological Society data digitised by Cofnod - 2008 data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species

D0061/005/01	Cambrian Ornithological Society data digitised by Cofnod - 1999 data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species
D0061/006/01	Cambrian Ornithological Society data digitised by Cofnod - 2001 data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species
D0061/007/01	Cambrian Ornithological Society data digitised by Cofnod - 2002 data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species
D0061/008/01	Cambrian Ornithological Society data digitised by Cofnod - 2004 data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species
D0061/009/01	Cambrian Ornithological Society data digitised by Cofnod - 2005 data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species
D0061/010/01	Cambrian Ornithological Society data digitised by Cofnod - 2006 data for Anglesey and Caernarfonshire Vice-counties	Cambrian Ornithological Society	Species
D0061/011/01	Cambrian Ornithological Society data digitised by Cofnod - 2011 data for Meirionnydd	Cambrian Ornithological Society	Species
D0067/002/01	Vice-County dataset: Odonata records from North Wales - Records from 2014 onwards	Allan Brandon	Species
D0078/001/03	Records collected and collated by Snowdonia Mammal Group - Records from 2003 to 2010	Snowdonia Mammal Group	Species
D0106/001/07	Miscellaneous species records collated by Snowdonia National Park Authority	Awdurdod Parc Cenedlaethol Eryri/Snowdonia National Park Authority	Species
D0116/001/01	Mammal records collated by Frances Cattnach while Caernarfonshire Vice-county recorder.	Alison Johnston and Frances Cattnach	Species
D0116/002/01	Mammal records collated by Frances Cattnach while Caernarfonshire Vice-county recorder. - Additional records from paper files	Frances Cattnach & Individual Recorders	Species
D0132/001/02	Green Shoots North Wales records	British Association for Shooting and Conservation	Species
D0145/001/08	Vice-County dataset - Arachnid records from North Wales (and some additional invertebrate data)	Richard Gallon	Species
D0165/001/01	Vice-County dataset - Vascular plant records from Caernarvonshire Vice-county (49).	Wendy McCarthy (BSBI Vice County Recorder)	Species
D0217/001/04	Welsh Invertebrate Database (WID) - Records from within the Cofnod boundary	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0256/013/01	Miscellaneous species records collected by Sam Dyer Ecology on behalf of various clients - DYER, S., 2010: "Building Renovation & Conversion Protected Species Survey, Platt's Farm Aber Road, Llanfairfechan, Conwy LL33 0HL". Sam Dyer Ecology	Sam Dyer Ecology	Species
D0346/001/01	eBird records - 2020 records from Cofnod area	Cornell Lab of Ornithology	Species

D0346/002/01	eBird records - 2021 records from Cofnod area	Cornell Lab of Ornithology	Species
D0823/001/02	A collation of records of stoneworts in Wales	Cyfoeth Naturiol Cymru/Natural Resources Wales (NBN Download)	Species
D0969/001/05	Miscellaneous species records submitted to rECOrd	rECOrd	Species
D1072/001/02	Mammal records from Britain from the Atlas of Mammals (1993), with some subsequent records	Biological Records Centre (NBN Download)	Species
D1075/001/06	Bryophyte data for Great Britain from the British Bryological Society held by BRC: Atlas 2014 - North Wales data	British Bryological Society (NBN download 04/12/2019)	Species
D1078/001/02	Cranefly (Diptera; Tipuloidea) records for Britain to 2016	Biological Records Centre & Cranefly Recording Scheme (NBN Download, 20/12/2018)	Species
D1096/001/02	Water Beetle Surveys from Britain and Ireland	Balfour-Browne Club (NBN Download, 10/10/2019)	Species
D1117/001/01	ad hoc Cofnod Online Recording System records	Individual Recorder(s)	Species
D1156/004/02	Marine Intertidal Phase 1 species dataset from the Countryside Council for Wales 1996-2005 - Species records from the Cofnod area	Cyfoeth Naturiol Cymru/Natural Resources Wales (NBN Download, 22/01/2020)	Species
D1192/001/01	Fungi records made by Debbie Evans, including personal records and ones recorded as part of various surveys. - Grassland fungi records from 2000-2006	Debbie Evans	Species
D1195/001/04	Invasive Non Native Species collated by North Wales and Dee Invasive Non Native Species Forum	North Wales and Dee Invasive Non Native Species Forum	Species
D1200/001/01	BIRKS, J.D.S., 2008: "The Polecat Survey of Britain 2004-2006: A report on the polecat's distribution, status and conservation". The Vincent Wildlife - All Welsh records	Vincent Wildlife Trust	Species
D1201/001/01	British Arachnological Society/Spider Recording Scheme dataset	British Arachnological Society/Spider Recording Scheme	Species
D1277/001/01	Miscellaneous species records collated by David Thorpe - Reptile records	David Thorpe	Species
D1286/001/02	Invasive species records gathered as part of North East Wales Invasive Action project	North East Wales Wildlife	Species
D1295/001/04	Dragonfly records from the British Dragonfly Society Recording Scheme - Records from the Cofnod area	British Dragonfly Society Recording Scheme (NBN download, 24/07/2020)	Species
D1297/004/01	BirdTrack records - 2010 data for Caernarfonshire	British Trust for Ornithology and Rhion Pritchard	Species
D1297/009/01	BirdTrack records - 2012 data for Caernarfonshire	British Trust for Ornithology and Rhion Pritchard	Species
D1297/010/01	BirdTrack records - 2011 data for Caernarfonshire	British Trust for Ornithology and Rhion Pritchard	Species
D1297/014/01	BirdTrack records - 2013 records from Vice-county 49 (Caernarvonshire)	British Trust for Ornithology & Individual recorders	Species

D1297/015/01	BirdTrack records - 2014 records from Vice-county 49 (Caernarvonshire)	British Trust for Ornithology & Individual recorders	Species
D1297/020/01	BirdTrack records - 2015 records from within the Cofnod boundary	British Trust for Ornithology & Individual Recorders	Species
D1297/021/01	BirdTrack records - 2016 records from within the Cofnod boundary	British Trust for Ornithology & Individual recorders	Species
D1297/028/01	BirdTrack records - 2019 records from Anglesey and Caernarfonshire Vice-counties	Ian M. Spence and British Trust for Ornithology	Species
D1297/032/01	BirdTrack records - 2017 and 2018 records for Vice-County 49 Caernarfonshire	Ian M. Spence and British Trust for Ornithology	Species
D1297/033/01	BirdTrack records - 1990 - 2009 records for Vice-County 49 Caernarfonshire	Ian M. Spence and British Trust for Ornithology	Species
D1297/036/01	BirdTrack records - 1900-1989 records for Vice-County 49 Caernarfonshire	Ian M. Spence and British Trust for Ornithology	Species
D1297/043/01	BirdTrack records - 2020 records from Anglesey and Caernarfonshire Vice-counties	Ian M. Spence and British Trust for Ornithology	Species
D1330/001/01	Invasive Non Native Species records, submitted to Cofnod as part of the N. Wales and Dee Invasive Non Native Species Forum 'Record An Alien' project	Individual recorders	Species
D1331/002/01	Miscellaneous species records submitted by staff of Natural Resources Wales	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1379/001/01	Miscellaneous species records from Morfa Madryn - HUGHES, R., 2010: "Morfa Madryn Lapwing Monitoring Report, March to September 2010". Unpublished report	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species
D1383/001/01	Hedgehog records submitted to Cofnod via their Online Recording System	Individual Recorders, and North Wales Local Biodiversity Action Plan partnerships.	Species
D1403/002/01	Miscellaneous bird records collected by Anthony Gallon - Bird records collected 18th May 2011	A. C. Gallon	Species
D1406/001/01	Invasive plant records collated by Carri Lane, Environment Agency	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1428/011/01	Miscellaneous species records collected by Enfys Ecology on behalf of various clients - YARDLEY, T., 2015: "EE.060 Land off Penmaenmawr Road, Llanfairfechan, Conwy. Extended Phase 1 Habitat Survey". Enfys Ecology Ltd	Enfys Ecology	Species
D1435/003/01	Vice-County dataset - Bird records from Caernarfonshire Vice-county (49) - Geoff Gibbs 2010 records	Geoff Gibbs and Rhion Pritchard	Species
D1435/005/01	Vice-County dataset - Bird records from Caernarfonshire Vice-county (49) - Robin Sandham 2010 records	Robin Sandham and Rhion Pritchard	Species
D1435/006/01	Vice-County dataset - Bird records from Caernarfonshire Vice-county (49) - Robin Sandham 2011 records	Robin Sandham and Rhion Pritchard	Species

D1452/001/03	Vice-County dataset - Butterfly records from Meirionnydd, Caernarfonshire and Anglesey Vice-counties (48, 49 and 52).	Andrew Graham	Species
D1452/002/01	Vice-County dataset - Butterfly records from Meirionnydd, Caernarfonshire and Anglesey Vice-counties (48, 49 and 52). - 2014 records and additional records from previous years	Andrew Graham	Species
D1452/003/01	Vice-County dataset - Butterfly records from Meirionnydd, Caernarfonshire and Anglesey Vice-counties (48, 49 and 52). - Records from 2015 and early 2016, plus additional records from previous years.	Andrew Graham	Species
D1452/004/01	Vice-County dataset - Butterfly records from Meirionnydd, Caernarfonshire and Anglesey Vice-counties (48, 49 and 52). - Records from 2016, plus additional records from previous years.	Andrew Graham	Species
D1452/005/01	Vice-County dataset - Butterfly records from Meirionnydd, Caernarfonshire and Anglesey Vice-counties (48, 49 and 52). - Records from 2017 and 2018, plus additional records from previous years.	Andrew Graham	Species
D1452/007/01	Vice-County dataset - Butterfly records from Meirionnydd, Caernarfonshire and Anglesey Vice-counties (48, 49 and 52). - Records from 2019 and early 2020, plus additional records from previous years	Andrew Graham	Species
D1452/008/01	Vice-County dataset - Butterfly records from Meirionnydd, Caernarfonshire and Anglesey Vice-counties (48, 49 and 52). - Records from 2020 and early 2021, plus additional records from previous years	Andrew Graham	Species
D1452/009/01	Vice-County dataset - Butterfly records from Meirionnydd, Caernarfonshire and Anglesey Vice-counties (48, 49 and 52). - Records from 2021 and early 2022, plus additional records from previous years	Andrew Graham	Species
D1480/001/01	Wales Online Amphibian & Reptile Atlas Ad-hoc Records	Amphibian & Reptile Conservation Trust	Species
D1486/001/01	Natural Resources Wales North Wales Bat Roosts	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1508/001/01	Vice-County dataset - amphibian and reptile records from Anglesey, Caernarfonshire and Meirionethshire Vice-counties (48, 49 & 52) - Records entered directly on Cofnod's Online Recording System	Wolfgang Wuster and Axel Barlow (NWWARG)	Species
D1509/002/01	Ringing records held by Ian Spence - 1987 - 2016	Ian Spence	Species
D1543/001/01	Miscellaneous bat records collected by Sam Dyer - Building and Roost records	Sam Dyer	Species
D1558/001/01	Otter Survey of Wales, 2009-2010	Individual Recorders & Natural Resources Wales	Species
D1566/001/01	Miscellaneous species records collected by Green Man Ecology Ltd. as part of various contracts - Miscellaneous records	Green Man Ecology	Species

D1566/003/01	Miscellaneous species records collected by Green Man Ecology Ltd. as part of various contracts - Miscellaneous records entered by Cofnod	Green Man Ecology Ltd	Species
D1566/152/01	Miscellaneous species records collected by Green Man Ecology Ltd. as part of various contracts - WUSTER, C., 2014: "Land at Llanfairfechan, Conwy, LL33 0PL". Green Man Ecology	Green Man Ecology	Species
D1566/157/01	Miscellaneous species records collected by Green Man Ecology Ltd. as part of various contracts - WUSTER, C., 2012: "GME210 Capel Horeb, Ffordd y Bryn, Llanfairfechan, Conwy. Protected Species Survey". Green Man Ecology	Green Man Ecology	Species
D1574/001/03	Hedgehog Hibernation Survey records	People's Trust for Endangered Species	Species
D1576/001/02	Tullie House Museum Natural History Collections - Cofnod area records	Tullie House Museum & Cumbria Biodiversity Data Centre (NBN download, 15/05/2020).	Species
D1622/001/01	Swift records submitted to Cofnod via their Online Recording System as part of A Swift Recovery project	Individual recorders, and North Wales Wildlife Trust	Species
D1688/004/01	Big Hedgehog Map records - Records from 2010 to January 2020	People's Trust for Endangered Species	Species
D1688/006/01	Big Hedgehog Map records - Records from June 2020 - January 2021	People's Trust for Endangered Species	Species
D1688/007/01	Big Hedgehog Map records - Records from January 2021 - July 2021	People's Trust for Endangered Species	Species
D1688/008/01	Big Hedgehog Map records - Records from May 2021 - March 2022	People's Trust for Endangered Species	Species
D1691/002/01	Miscellaneous species records collected by Atkins Ltd as part of various contracts. - ANON, 2007: "Community Living Proposed Development, Ecological Impact Assessment: Bryn-y-Neaudd Hospital, Llanfairfechan". Atkiins	Atkins Limited	Species
D1734/001/02	Swift Inventory of Low-Level Screaming Parties in the UK, 2009-2014 - Records from Cofnod area	RSPB (NBN download, 23/01/2020)	Species
D1735/001/02	Swift Inventory of Nest Sites in the UK, 2009-2014 - Records from Cofnod area	RSPB (NBN download, 23/01/2020)	Species
D1757/001/01	Phase Two Lowland Heathland Survey	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1779/001/02	Tir Cynnal and Tir Gofal Monitoring and Evaluation Programme: Whole-farm surveys for yellowhammer and curlew	Welsh Government (NBN Download, 12/11/2019)	Species
D1806/001/01	Miscellaneous species records collected by Stephen Cutmore on behalf of various clients - 2016 to 2017	Stephen Cutmore	Species
D1844/001/03	iRecord data for the Cofnod area - Verified data	Biological Records Centre and Individual Recorders	Species
D1847/001/01	Hogwatch and Rural Landowner surveys	People's Trust for Endangered Species	Species

D1852/001/01	RSPB Big Garden Birdwatch winter sightings in the UK in 2008 - 2008 records	RSPB (NBN Download, 16/01/2019)	Species
D1852/002/01	RSPB Big Garden Birdwatch winter sightings in the UK in 2008 - 2009 records	RSPB (NBN Download, 16/01/2019).	Species
D1895/001/01	Derek Lott Coleoptera Dataset	Biological Records Centre (NBN Download, 25/09/2019)	Species
D1921/001/01	Marine Nature Conservation Review (MNCR) and associated benthic marine data held and managed by JNCC	Joint Nature Conservation Committee (NBN download, 27/11/2019)	Species
D1924/001/01	UK Butterfly Monitoring Scheme (UKBMS) data from North Wales	UKBMS and Andrew Graham	Species
D1986/001/01	Non-avian taxa (BTO/JNCC/RSPB partnership)	British Trust for Ornithology (NBN download, 25/11/2020)	Species
