## EXECUTIVE SUMMARY

---

A Preliminary Ecological Appraisal has been carried out at the land at Ash Lane, Mancot on 22nd August 2023 by Liz Kenyon. The assessment comprised a desk study and site walkover survey in order to map habitat types. The survey was extended to assess the potential for protected species to use the site. The assessment provides baseline data as to current site conditions and where appropriate allows recommendations to be made in respect of further potential work in order to satisfy current wildlife legislation.

Assessed against the '*Guidelines for Ecological Impact Assessment in the UK and Ireland*' 2nd edition (2018), the habitats range in ecological value from negligible to within the zone of influence of the site. The majority of habitats to the south of the site will likely to be lost to the proposals, the north of the site will be retained. It is considered that their loss can be mitigated for, and the proposals will not adversely affect the ecological value of the wider area, provided the recommendations detailed below are followed.

Bat surveys are conducted in accordance with the Bat Surveys for Professional Ecologists - Good Practice Guidelines, published 2016 (the Guidelines). Strict adherence to these is not necessary, but where practice deviates from them, clear reasons and rationale are required.

The site comprises predominantly semi-improved grassland that is divided into fields that are unmanaged and grazed. Species poor hedgerows and scattered trees demarcate the field boundaries. A ditch (D1) partially lines a section of the eastern site boundary, with tall ruderal vegetation and bramble scrub present with the margin of the fields to the north of the site.

If the recommendations below are followed these species will not be adversely affected by the proposals.

- If works have not begun by March 2025, an updated site visit will be required to assess the habitats within the site;
- Implementation of a hedgehog and badger RAMS to avoid any harm to this species during the proposed works;
- Production and implementation of an amphibian RAMS to avoid any harm to this species during the proposed works;
- Precautionary check for badger prior to works commencing to assess if badger are using the habitats within the site for shelter;
- Vegetation clearance or pruning should be undertaken outside of the nesting bird season (1<sup>st</sup> March to 31<sup>st</sup> August Inclusive) to avoid any impact on breeding birds. Or a nesting bird check undertaken by a suitably experienced ecologist should be undertaken immediately prior to works commencing;
- Precautionary check for invasive prior to works commencing;
- Implementation of an invasive species method statement to avoid the spread of invasive species Montbretia into the wider landscape during the proposed works;
- Enhancing the site for species through appropriate landscape planting that includes native, species rich hedgerows, trees and areas of wildflowers plus provision of integrated bat and bird features within newly constructed buildings;
- Production of the Defra Metric Biodiversity Net Gain Calculations to minimise impacts on biodiversity and provide net gains in biodiversity; and
- Production of a Management Plan to ensure the long-term commitments to manage the planting, protection and enhancement of biodiversity in and around a new development site.

The site provides habitat for nesting birds, badger, hedgehog, amphibians and bats. Habitats on site will be lost to the proposals. There is likely to be low impacts on the local ecology due to the proposals if the recommendations within section 6 are implemented.

## 1.0 Introduction

---

Ascerta has been instructed by Castle Green Homes to carry out a Preliminary Ecological Appraisal of land at Ash Lane, Mancot (hereafter referred to as the site). The site OS grid reference is SJ 3176 6672 and the What3Words reference is edges.constants.wage. The extent of the site is displayed in photograph 1.1 below.

**Photograph 1.1: Extent of site**

The site was visited on 22nd August 2023 by Liz Kenyon when a Preliminary Ecological Appraisal, which includes an assessment of the potential for protected species to be using the site or surroundings, was carried out in accordance with the *Handbook for Phase 1 Habitat Survey: a Technique for Environmental Audit (JNCC, 2010)*. The report was prepared following methods detailed in the CIEEM *'Guidelines for Ecological Impact Assessment in the UK and Ireland'* (2018) and *'Guidelines for Ecological Report Writing'* (2017). This report presents the results of the survey including evaluation of habitats on site and potential for protected species to be using the site. The report includes recommendations for further actions where applicable in order to satisfy current wildlife legislation and to achieve our client's objectives. Relevant legislation is detailed within Appendix 4.

The site comprises predominantly semi-improved grassland that is divided into fields that are unmanaged and grazed. Species poor hedgerows and scattered trees demarcate the field boundaries. A ditch (D1) partially lines a section of the eastern site boundary, with tall ruderal vegetation and bramble scrub present with the margin of the fields to the north of the site.

Our client seeks planning to develop the site for residential dwellings, with associated access routes, an area of Public Open Space (POS) and Sustainable Urban Drainage Features (SUDs).

## 2.0 Objectives

---

Our client's objectives are to assess the potential ecological constraints of the area.

Our objectives are as follows:

- Identify and evaluate any features of ecological value and the potential of the site to support protected species based on the walkover survey and biological records search;
- Identify designated sites within 2km of the site;
- Review protected species records within 2km of the site
- Map the habitats within the site using JNCC (2010) methods;
- Provide recommendations for further species-specific surveys and mitigation measures where current legislation requires;
- Provide recommendations that seek to enhance the ecological value of the site;
- Provide recommendations to assist our clients in achieving their objectives whilst satisfying current wildlife legislation.

## 3.0 Survey Methods

---

The Preliminary Ecological Appraisal involved the collection and review of data from a desk study and field survey along with assessment of the value of the habitats following CIEEM guidelines.

### 3.1 Desk Study

A review of the designated sites and habitats within 2km of the site has been undertaken on 21<sup>st</sup> August 2023 using the Multi-Agency Geographic Information for the Countryside (MAGIC) and the Natural Resources Wales websites.

A review of UK and Local priority species and habitats known to occur within 2km of the site has been undertaken on 21<sup>st</sup> August 2023; using the Joint Nature Conservation Committee website, Multi-Agency Geographic Information for the Countryside (MAGIC) and local records from Cofnod (Appendix 5).

### 3.2 Field Survey

A walkover survey of the site was conducted on 22nd August 2023 by Liz Kenyon when the habitat types and features of ecological interest were identified and mapped in compliance with the Handbook for Phase 1 Habitat Survey: A Technique for Environmental Audit (*JNCC, 2010*). The survey methods involve the recording and mapping of all habitat types and ecological features present on site, including the identification of the main species present and examination of the potential for any protected species. Habitats were mapped and target notes made for any interesting features.

The surveys particularly focused on the following species and habitat features:

- Mammals (badgers, bats, red squirrel and hedgehog);
- Birds;
- Amphibians and reptiles;
- Invertebrates;
- Hedgerows and boundaries;
- Invasive plant species; and
- Plant communities and trees.

Weather conditions during the survey were warm (22°C), dry and sunny (4/8 cloud cover) with a F0 (Beaufort Scale) calm air, therefore appropriate for this type of survey.

### 3.3 Bat Survey Methods

The survey methods followed the guidelines set out by the Bat Conservation Trust Bat Surveys for Professional Ecologists Good Practice Guidelines – 3rd Edition (2016). Habitats, buildings and trees were assessed for suitability for use by bats and categorised independently using table 4.1 page 35 within the Bat Conservation Trust Guidelines (Collins, 2016).

#### Preliminary Ecological Appraisal for Bats

Habitats on site were assessed for their suitability for bats to use them for roosting, commuting and foraging both on the site and surrounding area. Commuting and foraging habitat suitability was categorised **low to high**. Commuting and foraging habitat valued as **moderate** or above may need further survey effort if lost to the proposals.

#### Preliminary Roost Assessment Trees

All trees were inspected for Potential Roost Features (PRFs). Features searched for included: Natural or woodpecker holes, cracks/splits in major limbs, loose bark, hollows/cavities, dense epicormic growth, bird and bat boxes. Where such features were found they were investigated for scratches or staining, bat droppings and smoothing of surfaces around entry points. Trees assigned a suitability of **moderate** or above may require further inspection if they are to be lost to the development.

The trees were categorised as per Table 4.1 (below). Trees assigned a suitability of **Low** or above may require further inspection if they are to be lost to the development.

**Table 4.1: Guidelines for assessing Potential Roost Features (PRFs), commuting and foraging habitat within a proposed development site. Guidelines taken from table 4.1 page 35 of the Bat Conservation Trust Bat Surveys for Professional Ecologists Good Practice Guidelines – 3rd Edition (2016).**

<b>Suitability</b>	<b>Roosting Habitats</b>	<b>Commuting and Foraging Habitats</b>
<b>Negligible</b>	<i>Negligible habitat features on site likely to be used by roosting bats.</i>	<i>Negligible habitat features on site likely to be used by commuting or foraging bats.</i>
<b>Low</b>	<p><i>A structure with one or more potential roost sites that could be used by individual bats opportunistically. However, these potential roost sites do not provide enough space, shelter, protection, appropriate conditions<sup>a</sup> and/or suitable surrounding habitat to be used on a regular basis or by larger numbers of bats (i.e. unlikely to be suitable for maternity or hibernation<sup>b</sup>).</i></p> <p><i>A tree of sufficient size and age to contain PRFs but with none seen from the ground or features seen with only very limited roosting potential.<sup>c</sup></i></p>	<p><i>Habitat that could be used by small numbers of commuting bats such as a gappy hedgerow or unvegetated stream, but isolated, i.e. not very well connected to the surrounding landscape by other habitat.</i></p> <p><i>Suitable, but isolated habitat that could be used by small numbers of foraging bats such as a lone tree (not in a parkland situation) or a patch of scrub.</i></p>
<b>Moderate</b>	<i>A structure or tree with one or more potential roost sites that could be used by bats due to their size, shelter, protection, conditions<sup>a</sup> and surrounding habitat but unlikely to support a roost of high conservation status (with respect to roost type only – the assessments in this table are made irrespective of species conservation status, which is established after presence is confirmed).</i>	<p><i>Continuous habitat connected to the wider landscape that could be used by bats for commuting such as lines of trees and scrub or linked back gardens.</i></p> <p><i>Habitat that is connected to the wider landscape that could be used by bats for foraging such as trees, scrub, grassland or water.</i></p>
<b>High</b>	<i>A structure or tree with one or more potential roost sites that are obviously suitable for use by larger numbers of bats on a more regular basis and potentially for longer periods of time due to their size, shelter, protection, conditions<sup>a</sup> and surrounding habitat.</i>	<p><i>Continuous, high-quality habitat that is well connected to the wider landscape that is likely to be used regularly by commuting bats such as river valleys, streams, hedgerows, lines of trees and woodland edge.</i></p> <p><i>High-quality habitat that is well connected to the wider landscape that is likely to be used regularly by foraging bats such as broadleaved woodland, tree-lined watercourses and grazed parkland.</i></p> <p><i>Site is close to and connected to known roosts.</i></p>

<sup>a</sup> For example, in terms of temperature, humidity, height above ground level, light levels or levels of disturbance.

<sup>b</sup> Evidence from the Netherlands shows mass swarming events of common pipistrelle bats in the autumn followed by mass hibernation in a diverse range of building types in urban environments (Korsten et al., 2015). This phenomenon requires some research in the UK but ecologists should be aware of the potential for larger numbers of this species to be present during the autumn and winter in large buildings in highly urbanised environments.

<sup>c</sup> This system of categorisation aligns with BS 8596:2015 Surveying for bats in trees and woodland (BSI,2015).

### 3.4 Badger Survey Methods

The site was searched for setts and badger field signs including foraging areas, latrines and tracks. Attention was paid to the presence of the following field signs:

- Setts: single holes or a series of holes likely to be interconnected underground;
- Latrines: badgers usually deposit faeces in excavated pits;
- Paths and footprints;
- Scratching posts: at the base of trees;
- Snuffle holes: areas where badgers have searched for insects;
- Day nest: bundles of vegetation where badgers may sleep above ground; and
- Traces of hair.

### 3.5 Great Crested Newt Habitat Suitability Index (HSI)

The onsite ditch (D1) was assessed for suitability as great crested newt breeding habitat. The HSI assessment followed the method described by Oldham *et al.* (2000) as updated by ARG UK (2010), involving an assessment of each water body against ten suitability indices:

- Location of the pond within the context of Britain;
- Total surface area of the pond;
- Pond drying (based on both local knowledge and field evidence);
- Water quality;
- Percentage perimeter shaded;
- Presence or absence of waterfowl;
- Presence or absence of fish;
- Number of water bodies situated within 1km;
- Suitability of terrestrial habitat; and
- Percentage macrophyte cover.

The HSI is calculated using an equation producing a single number between 0 and 1. The value provides an indication of whether the water body is likely to support a population of great crested newts. The lower the Index the less likely the location is to support a breeding population. Ponds are classed as Poor, Below Average, Average, Good or Excellent habitat suitability based on this value.

## 3.6 Evaluation

Habitats and species on the site were evaluated following the '*Guidelines for Ecological Impact Assessment in the UK and Ireland*' 2018. A geographical frame of reference is assigned to each habitat and species, with International Value being most important, then National, Regional, County, District, Local and lastly, within the immediate Zone of Influence (Zoi) of the proposals only.

Value judgements are based on characteristics that can be used to identify ecological resources or features likely to be important in terms of biodiversity. These include site designations such as SSSIs. For undesignated features, the size, conservation status (locally, nationally or internationally), and the quality of the ecological resource are considered. Ecological resource quality can refer to habitats (for instance if they are particularly diverse, or a good example of a specific habitat type), other features (such as wildlife corridors or mosaics of habitats) or species populations or assemblages.

Although we cannot assess the survey findings fully in relation to the Environment Act and Biodiversity Metric, the recommendations detailed within this report aim to meet requirements of the Environment Act and Biodiversity Metric 4.0 as far as possible at this stage.

## 3.7 Limitations

The site visit was undertaken in August, which is within the optimal time of year for phase 1 habitat surveys, sufficient vegetation was present to enable habitat identification and the full site was fully accessible.

The absence of biological records does not necessarily mean the absence of species. This has been taken into account within the report conclusions.

## 4.0 Survey Results

---

### 4.1 Desk Study

Three statutory sites were identified within a 2km radius of the proposed site.

The following statutory sites were identified within the vicinity of the proposals (with approximate distance and direction from the site):

- Afon Dyfrdwy (River Dee) Site of Special Scientific Interest (SSSI) (1.9km northeast);
- River Dee and Bala Lake Special Area of Conservation (SAC) (1.9km northeast); and
- Broughton Brook Section Regionally Important Geological Site (RIGS) (1.9km southeast)

Six non-statutory sites were identified within a 2km radius the proposed development site.

The following non-statutory sites were identified within the vicinity of the proposals (with distance and direction from the site):

- Sea View Wetland Local Wildlife Site (LWS) (1.9km northwest);
- The River Dee (LWS) (2km north);
- Aston Wetland (LWS) (1.4km northwest);
- Hawarden Park (LWS) (890m south);
- Shotton Bank (LWS) (1.9km north); and
- Bilberry Wood (LWS) (1.2km south)

Several areas of ancient and restored ancient woodlands lie within 2km of the site. The closest area lies approximately 250m southeast of the site.

The site does not lie within a Natural Resources Wales SSSI Impact Risk Zone, however a consultation with Natural Resources Wales will not be triggered as the proposals are for residential dwellings only.

## Priority Species

Following a review of records held by Cofnod, several priority species that have the potential to occur within the vicinity of the proposed development have been identified. These include birds, bats, badger, hedgehog, water vole, otter, brown hare, reptiles and amphibians. The species records are summarised below, and the detailed records held by Cofnod within 2km of the site are displayed within Appendix 5. Protected species legislation can be found within Appendix 4.

*No species records were returned by Cofnod within the site boundary.*

## Birds

One thousand and thirty-two records were returned for bird species within 2km of the site. Species returned include barn owl, arctic tern, great white egret, kingfisher, lapwing and little owl. All species recorded within 2km are displayed within Appendix 5. Table 4.1 below shows a summary of the closest and most recent bird records and related distance to the site.

**Table 4.1. Summary of the closest and most recent bird species records and related distance to site.**

Bird Species	Distance of record to site (approx.)	Record date
Little Egret ( <i>Egretta garzetta</i> )	1.4km southeast	Between 31 <sup>st</sup> December 2021 and 24 <sup>th</sup> February 2022
Black-headed gull ( <i>Chroicocephalus ridibundus</i> )	2km northwest	Between 1 <sup>st</sup> December 2010 and 6 <sup>th</sup> October 2022
Blackcap ( <i>Sylvia atricapilla</i> )	2km northwest	Between 24 <sup>th</sup> January 2009 and 30 <sup>th</sup> December 2022
Grey heron ( <i>Ardea cinerea</i> )	2km southwest	17 <sup>th</sup> December 2022
Goldfinch ( <i>Carduelis carduelis</i> )	280m northwest	19 <sup>th</sup> July 2011
House sparrow ( <i>Passer domesticus</i> )	280m northwest	19 <sup>th</sup> July 2011
Swallow ( <i>Hirundo rustica</i> )	280m northwest	19 <sup>th</sup> July 2011
Swift ( <i>Apus apus</i> )	280m northwest	19 <sup>th</sup> July 2011
Wood pigeon ( <i>Columba palumbus</i> )	280m northwest	19 <sup>th</sup> July 2011

## Bats

Cofnod returned eighty-six records for bats within the search area. Bat species include common pipistrelle, soprano pipistrelle, daubenton's bat, whiskered bat, noctule bat, brown long-eared bat, lesser horseshoe bat, natterer's bat, myotis bat, unknown pipistrelle species and unknown bat species. Below is a summary of the most recent and closest bat records and related distance to the site (see Table 4.2). All species recorded within 2km are displayed within Appendix 5.

**Table 4.2. Summary of closest and most recent bat records, record type and related distance to site.**

Bat Species	Record type	Distance of record to site (approx.)	Record date
Daubenton's bat ( <i>Myotis daubentoniid</i> )	Field Record	1.4km south	Between 15 <sup>th</sup> August 2021 and 27 <sup>th</sup> August 2021
Bat species ( <i>Chiroptera sp.</i> )	Field Record	Adjacent to western boundary of the site	27 <sup>th</sup> June 2003

## Amphibians

Fourteen records for amphibians were returned within 2km of the site. Species present include common frog, palmate newt, smooth newt and great crested newt. All species recorded within 2km are displayed within Appendix 5. Below (Table 4.3) is a summary of the closest and most recent amphibian records and related distance to the site.

**Table 4.3. Summary of most recent and closest amphibian records to and related distance to site.**

Notable and Protected Species	Distance of record to site (approx.)	Record date
Palmate Newt ( <i>Lissotriton helveticus</i> )	1.7km west	Between 28 <sup>th</sup> April 2022 and 11 <sup>th</sup> May 2022
Palmate Newt ( <i>Lissotriton helveticus</i> )	1.2km northwest	Between 2004 and 2006
Smooth newt ( <i>Lissotriton vulgaris</i> )	1.7km west	Between 28 <sup>th</sup> April 2022 and 11 <sup>th</sup> May 2022
Smooth newt ( <i>Lissotriton vulgaris</i> )	1.2km northwest	Between 2004 and 2006
Common frog ( <i>Rana temporaria</i> )	300m northwest	17 <sup>th</sup> July 2016

Great crested newt ( <i>Triturus cristatus</i> )	1.7km west	28 <sup>th</sup> April 2022
Great crested newt ( <i>Triturus cristatus</i> )	1.2km northwest	2006

## Reptiles

Three records for reptiles were returned within 2km of the site. All species recorded within 2km are displayed within Appendix 5. Below (Table 4.4) is a summary of the closest and most recent reptile records and related distance to the site.

**Table 4.4. Summary of most recent and closest reptile records to and related distance to site.**

Notable and Protected Species	Distance of record to site (approx.)	Record date
Common Lizard ( <i>Zootoca vivipar</i> )	2km west	2001
Grass Snake ( <i>Natrix Helvetica</i> )	1.4km south	7 <sup>th</sup> July 2019

## Terrestrial mammals

Eighty-nine records for Terrestrial mammals were returned within 2km of the site. Species present include badger, hedgehog, brown hare, water vole, and otter. All species recorded within 2km are displayed within Appendix 5. Below (Table 4.5) is a summary of most notable and/or protected species and related distance to site.

**Table 4.5. Summary of most notable mammal species and related distance to site.**

Notable and Protected Species	Distance of record to site (approx.)	Record date
European Hedgehog ( <i>Erinaceus europaeus</i> )	150m east	15 <sup>th</sup> August 2015
European Hedgehog ( <i>Erinaceus europaeus</i> )	600m northeast	23 <sup>rd</sup> March 2022
European Otter ( <i>Lutra lutra</i> )	1.9km northeast	2006
European brown hare ( <i>Lepus europeus</i> )	2km northeast	Between 19 <sup>th</sup> May 2003 and 3 <sup>rd</sup> June 2015
European brown hare ( <i>Lepus europeus</i> )	1.4km southeast	1 <sup>st</sup> May 2006
European water vole ( <i>Arvicola amphibius</i> )	1.6km east	Between 1996 and 1 <sup>st</sup> July 2001

A list of key habitats is shown in table 5.1 below and a summary description of key habitats within the site is provided in Section 5.2. Notes on the presence or potential presence of protected species are provided in Section 5.3. The Phase 1 Habitat map can be found in Appendix 1. The Target Notes (TN) and lists of species recorded during survey are presented in Appendix 2.

## 4.2 Habitat Survey

The site lies to the south of Mancot and is bound by Ash Lane to the east and Park Avenue to the west. Within the wider landscape lies agricultural land use and residential dwellings. The site comprises predominantly semi-improved grassland that is divided into fields that are unmanaged and grazed. Species poor hedgerows and scattered trees demarcate the field boundaries. A ditch (D1) partially lines a section of the eastern site boundary, with tall ruderal vegetation and bramble scrub present with the margin of the fields to the north of the site. These habitats are presented on plan P.1844.23.E01 (Appendix 1).

The habitat types identified within the site are detailed below and are displayed on drawing P.1844.23.E01 *Phase One Habitat Survey* in Appendix 1 and on Photographs within Appendix 3. Species lists and target notes are displayed in Appendix 2.

### ***Semi-improved grassland (B6)***

The site comprises predominantly semi-improved grassland that is divided into fields. The fields to the south of the site are grazed by cattle and sheep and have been recently managed, with a sward height of approximately 5cm. To the north of the site the grassland is unmanaged, with a sward height of 15-20cm and has become encroached by tall ruderal species and strands of bramble scrub that are present in the field boundaries. Species present include perennial rye grass, Yorkshire fog, fescue sp., creeping butter cup and ragwort. Mammal tracks were also noted within the unmanaged grassland. This area of habitat is currently unmanaged. This habitat is displayed in photograph 1 -3 within Appendix 3.

### ***Tall Ruderal Vegetation (C3.1)***

Tall ruderal vegetation is present within the boundaries of the unmanaged semi-improved grassland to the north of the site, predominantly to the northeast hedge lines adjacent to the private gardens of Park Avenue. Species present include, willowherb, wild carrot, vetch sp, and stinging nettle. A small area of montbretia (TN1) was also recorded during the site walkover. This area of habitat is currently unmanaged. This habitat is displayed in photograph 5 within Appendix 3.

### ***Dense/continuous scrub (A2.1)***

Areas of bramble scrub are present to the boundaries of the fields that lie to the north of the site along D1.

### ***Scattered trees (A3.1)***

Scattered trees are present to the field boundaries line. Species present are predominantly ash and oak with occasional cherry. This habitat is displayed in Photographs 2&6 within Appendix 3.

### **Species Poor Hedge (J2.1.2)**

Species poor hedgerows are present throughout the site, species present include hawthorn, cypress and blackthorn. This habitat is displayed in photograph 4 within Appendix 3.

### **Running water (G2)**

A ditch (D1) partially lines a section of the eastern site boundary that lies adjacent to Ash Lane. The ditch enters the site via a culverted section and flows south to north. The water body was assessed for their great crested newt suitability and are discussed further in section 4.3 below.

## **4.3 Great Crested Newt Suitability**

### Great Crested Newt Habitat Suitability Index (GCN HSI)

Table 4.1: Standing Water Description and GCN HSI with full details in Appendix 6.

<b>Standing water description</b>	<b>Photograph</b>
<p><b>Ditch 1 (D1):</b> partially lines a section of the eastern site boundary that lies adjacent to Ash Lane. The ditch enters the site via a culverted section and flows at a slow to moderate speed south to north. The majority of the ditch lies within the field and has been poached by cattle, as it flows to the north the water boded becomes surrounded by a shallow bank with scattered trees present. The ditch was holding water approximately &lt;5cm deep. The HSI score was 0.54 meaning it has below average suitability for use by great crested newt for breeding.</p>	

## 4.4 Protected and Notable Species

### ***Birds***

The habitats within the site provide suitable foraging and nesting opportunities for bird species. These habitats include scrub, semi-improved grassland, scattered trees and species poor hedgerows. During the survey wood pigeon, swallow and passerine species were identified within the site.

### ***Bats***

No buildings are present within the site. The site was assessed to provide **low** potential for foraging and commuting bats. The scrub, species poor hedgerow, running water semi-improved grassland and scattered trees within the site provide good suitability for commuting and foraging bats, with good connectivity to the surrounding land use.

The trees within the site have the potential to support roosting bats a ground level bat roost assessment was undertaken during the survey It was noted that trees, (trees T9, T13 – T16 drawing *P.18944.01 Tree Survey 1-2 and 2-2, appendix 1*) to the north of the site possessed features, including cracked and broken limbs that may support roosting bats.

### ***Badger and other small mammals***

The semi-improved grassland, tall ruderal vegetation and scrub habitats within the site provide limited foraging and shelter habitat for badger and other small mammal species such as hedgehog and the majority of site is prone to regular disturbance for agricultural use. No evidence of badger or hedgehog was identified within the site during the survey; however, mammal tracks were noted to the north of the site.

### ***Amphibians***

No ponds are present within the site; however, a ditch (D1) does partially line the eastern site boundary. No other ponds are present within 500m of the site as mapped on Magic Maps.

The habitats within the site (semi-improved grassland, bramble scrub, tall ruderal vegetation and species poor hedgerow) provide terrestrial habitats for amphibians and D1 will provide some limited aquatic habitat for amphibians. Amphibians may use water bodies that score an average or below HSI assessment.

### ***Reptiles***

The habitats within the site do not offer suitability to support reptiles. Ecotones are not present within the site and the habitats are scattered across the site with no suitable connectivity. The habitats within the site are prone to high human disturbance. Reptiles do not require further consideration within this planning application and will not be discussed further within this report.

### ***Invasive species***

Non-native invasive species montbretia (TN1), was identified within an area of tall ruderal vegetation to the north of the site. The location of the non-native invasive species identified within the site is displayed on plan P.1884.23.E01 within Appendix 1.

## 5.0 Evaluation and Recommendations

---

### 5.1 Designated Sites and Habitats

There are no statutory or non-statutory protected sites within the vicinity of the proposals that are likely to be influenced by the proposals. It is considered that as all statutory or non-statutory sites lie over 1km from the proposed development site that there will be no impact on any statutory or non-statutory sites as a result of the proposals.

The site lies within a Natural Resources Wales SSSI Impact Risk Zone; however, Natural Resources Wales will not need to be consulted for this type of planning proposal within the residential area as the proposed development does not fall under the likely impacts for the SSSI as detailed on MAGIC Maps. It is considered that there will be no impact on any SSSIs in the vicinity as a result of the proposals.

The habitats on site comprise semi-improved grassland, scattered trees, tall ruderal vegetation, running water, bramble scrub and species poor hedgerow. These habitats are considered to have an ecological value of **within the zone of influence** of the site or lower. The site contains no designated or priority habitats. Overall, the proposals are unlikely to adversely affect the ecological value of the area.

The production of the Defra Metric Biodiversity Net Gain Calculations is recommended to minimise impacts of biodiversity and provide net gains in biodiversity and the production of a Management Plan to ensure the long-term commitments to manage the planting, protection and enhancement of biodiversity in and around the new development site.

## 5.2 Protected and Notable Species

### ***Birds***

The scrub, semi-improved grassland, scattered trees and species poor hedgerows provide suitable habitat for nesting and foraging bird species. It is recommended that vegetation clearance should be undertaken outside of the nesting bird season (1<sup>st</sup> March to 31<sup>st</sup> August Inclusive) to avoid any impact on breeding birds. If vegetation clearance cannot be undertaken outside of the breeding bird season, a nesting bird check undertaken by a suitably experienced ecologist should be undertaken immediately prior to works commencing. If an active birds' nest is identified a suitable buffer zone should be implemented where no works are to occur within until the young have fledged the nest.

### ***Bats***

Bat records were returned within 2km of the site. The closest record was recorded adjacent to western boundary of the site in 2003.

The habitats on site provide **low** suitability for commuting and foraging bats and the majority of hedgerows and scattered trees will be retained within the proposals to provide continued commuting and foraging habitats for bats, along with the enhancement of the north of the site with the provision of POS and SUDs features. Some of the mature oak trees were also assessed to provide **low** suitability for bats due to cracked and broken limbs. The trees with low potential for roosting bats will be retained within the proposals (trees T9, T13 – T16 drawing *P.18944.01 Tree Survey 1-2 and 2-2, appendix 1*), however if they do require any pruning works at a later stage this must be done under ecological supervision.

### ***Badger and other small mammals***

The site provides limited habitat for badger and hedgehog within the scrub and semi-improved grassland. These habitats are to be impacted by the proposals and therefore, it is recommended that a Hedgehog and Badger Reasonable Avoidance Measures (RAMS) Method Statement is implemented during the works to avoid harm to this species. The RAMS should include:

- Any vegetation clearance applies to all habitats cleared in daytime air temperatures above 5°C. Works must be avoided in cold temperatures or if prior overnight temperatures have been less than 1°C;
- The cut material is to be chipped and placed in discrete piles outside the working areas or removed from the site;
- Existing tracks should be utilised for vehicle movements where possible;
- Throughout the works all trenches must be covered at night or ramps provided to prevent small mammals and badger from getting stuck; and
- Construction material will be stored on pallets to avoid creating habitat for small mammals.

To enable hedgehog continued use of the site it is advised that gaps of at least 13cm by 13cm are left under any new garden fences to enable hedgehog to roam freely within the area following development. To mitigate for the loss of habitat that could be used by hibernating hedgehog it is recommended that a hedgehog hibernaculum is provided within the landscaping.

As badger are a mobile species it is recommended an updated badger check of suitable habitats (scrub and semi-improved grassland) is undertaken prior to works commencing within the site to avoid harm to badger that may have moved into the habitats within the site.

***Invasive species***

Montbretia (TN1) was identified within the site. To avoid the spread of the species within the site during site clearance it is recommended that an invasive species management plan is adhered to during the works. The management plan should include:

- All montbretia should be isolated prior to site clearance. The plant should be fully excavated, including 500cm of earth surrounding the plant to ensure all roots have been removed. This can be done at any time of year; however, it is recommended that the plant should be removed in spring or early summer (April-July) when the plant is in flower;
- The earth should be shaken off the roots and the entire plant removed from site by a licenced contractor;
- Once all montbretia has been cleared from the site, site clearance can begin, provided other ecological issues have been addressed, including the potential presence of breeding birds should the site be cleared between 1<sup>st</sup> March and 31<sup>st</sup> August inclusive.

***Timetable for Invasive Species Treatment***

<b>Date</b>	<b>Montbretia</b>
<b>July</b>	Excavate and remove from the site (can occur any time of year but recommended between April and July).
<b>September</b>	Continue monitoring the site and remove any new growth.
<b>From July for 2 years</b>	Continue monitoring the site and treat any new growth. (Until a 12-month period in which no growth is observed).

A commenced check for the species should be carried out and if the plant is noted to have reestablished the following should be followed to ensure the plant is fully eradicated.

***Amphibians***

The site provides terrestrial habitat within the semi-improved grassland, species poor hedgerow, tall ruderal vegetation and bramble scrub areas. Amphibians may also use ditch D1 that have scored below average or below. The terrestrial habitats do provide refuge areas and connectivity corridors for amphibians. These habitats are likely to be impacted by the proposals and therefore, it is recommended that an Amphibian Reasonable Avoidance Measures (RAMS) Method Statement is produced and implemented during the works to avoid harm to this species.

## 5.3 Enhancements

In order to meet requirements for biodiversity protection and enhancement outlined within the NPPF, it is recommended that ecological enhancements are included. These could include:

1. Provision of 30 bird boxes (25mm and 32mm entrance hole box, house sparrow terrace, swift box), attached to or integrated within retained or new buildings on site;
2. Provision of 25 bat features (e.g. Vivara Pro WoodStone Bat box or similar) attached to a retained or new tree on site or provision of a bat box (e.g. Vivara bat bricks or '*bird brick houses*' bat boxes) integrated within new or retained buildings; and
3. Suitable landscaping incorporating species that provide a food or shelter resource to wildlife to include hawthorn, hazel, holly, blackthorn, field maple, dog rose and honeysuckle as hedgerow species and oak, alder, field maple, silver birch, crab apple, rowan and bird cherry as tree species together with implementing a relaxed mowing regime and establishing wildflowers in these areas.

## 6.0 Conclusions

---

The site was subject to an extended phase one habitat survey. During the survey and following review of historical species records, it is considered that an impact on birds, bats, amphibians, badger and hedgehog are likely to occur in relation to the proposals for the site. The following recommendations have been made to avoid an impact on these species:

- If works have not begun by March 2025, an updated site visit will be required to assess the habitats within the site;
- Implementation of a hedgehog and badger RAMS to avoid any harm to this species during the proposed works;
- Production and implementation of an amphibian RAMS to avoid any harm to this species during the proposed works.;
- Precautionary check for badger prior to works commencing to assess if badger are using the habitats within the site for shelter;
- Vegetation clearance or pruning should be undertaken outside of the nesting bird season (1st March to 31st August Inclusive) to avoid any impact on breeding birds. Or a nesting bird check undertaken by a suitably experienced ecologist should be undertaken immediately prior to works commencing;
- Precautionary check for invasive prior to works commencing;
- Implementation of an invasive species method statement (section 5.2) to avoid the spread of invasive species Montbretia into the wider landscape during the proposed works;
- Enhancing the site for species through appropriate landscape planting that includes native, species rich hedgerows, trees and areas of wildflowers plus provision of integrated bat and bird features within newly constructed buildings;
- Production of the Defra Metric Biodiversity Net Gain Calculations to minimise impacts on biodiversity and provide net gains in biodiversity; and
- Production of a Management Plan to ensure the long-term commitments to manage the planting, protection and enhancement of biodiversity in and around a new development site.

It is considered that there would be very limited impacts on the local ecology as a result of the proposals, provided the recommendations detailed within section 5.0 above are followed.

# Relevant Legislation

## European Legislation

The following Directives have been adopted by the European Union and provide protection for fauna and flora species of European importance and the habitats which support them:

- Directive 2009/147/EC on the Conservation of Wild Birds (Birds Directive);
- Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (Habitats Directive).

## UK Legislation

The Habitats Directive has been transposed into national legislation through the Conservation of Habitats and Species (Amendment) (EU Exit) Regulations 2019 (The Habitats Regulations). This provides for the designation and protection of 'European Sites' (SPAs, SACs and Ramsar Sites, including proposed or potential European Sites) and the protection of 'European Protected Species'.

The key UK legislation relating to nature conservation is the Wildlife and Countryside Act 1981 (as amended) (W&C Act). This Act is supplemented, *inter alia*, by provision in the Countryside and Rights of Way (CROW) Act 2000, and the Natural Environment and Rural Communities Act 2006 (NERC Act). Additional species and habitat specific UK legislation includes the Protection of Badgers Act 1992 and the Hedgerow Regulations 1997.

The Environment Act sets out how the UK will maintain environmental standards following leaving of the EU. The Act builds on the vision of the 25 Year Environment Plan, with the ambition from the government to leave the environment in a better state than it was when inherited.

The Defra Biodiversity Metric is being implemented to work alongside the Environment Act. This tool calculates potential biodiversity impacts as a result of development and identifies mitigation and compensation requirements to ensure no net loss of biodiversity. In addition, it identifies measures that can be implemented in order to meet Biodiversity gain as a result of development. Defra released a beta version of the biodiversity metric in July 2019, with the most recent metric released in March 2023. This metric is likely to be the default metric used by councils.

The National Planning Policy Framework (NPPF) 2021 has been published to provide further planning guidance. Wildlife, biodiversity and ecological networks are referred to in Section 15 '*Conserving and enhancing the natural environment*'. The NPPF states that the planning system should contribute to and enhance the natural and local environment by: recognising the wider benefits of ecosystem services, minimising impacts on biodiversity and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures. Further guidance is provided within Government Circular 06/05: *Biodiversity and Geological Conservation - Statutory Obligations and Their Impact Within the Planning System*.

### **Species and Habitats of Principal Importance**

Species and Habitats of Principal Importance are listed under section 41 of the NERC Act and are a material consideration in planning decisions. Planners require relevant, up to date information from ecological surveys in order to assess the effects of a proposed development on biodiversity as Councils have a statutory obligation under section 40 of the NERC Act to consider biodiversity conservation in the determination of planning applications.

Background information about the lists of priority habitats and species (Species and Habitats of Principal Importance) can be found within the UK Biodiversity Action Plan (UK BAP). Although this has been succeeded by the '*UK Post-2010 Biodiversity Framework*', many of UK BAP tools are still relevant. BAPs identify habitats and species of nature conservation priority on a UK (UK BAP) and Local (LBAP) scale. Most BAP priority habitats and species have Habitat Action Plans (HAP) and Species Action Plans (SAP) and there are also "grouped action plans" for groups of related species with similar conservation requirements.

## **Badgers**

The legislation protecting badgers in Wales is the Protection of Badgers Act 1992.

Under the Protection of Badgers Act 1992 it is an offence *inter alia* to:

- Wilfully kill, injure or take a badger, or to attempt to do so;
- Cruelly ill-treat a badger; or
- Intentionally or recklessly interfere with a badger sett by (a) damaging a sett or any part of one; (b) destroying a sett; (c) obstructing access to or any entrance of a sett; (d) causing a dog to enter a sett; or (e) disturbing a badger when it is occupying a sett.

The Badger Act 1992 defines a badger's sett as "*any structure or place which displays signs indicating current use by a badger*"

The Welsh Government has authority under Section 10(2) and (3) of the Act to issue licences to interfere with badger setts for:

1. The purpose of any agricultural or forestry operation;
2. The purpose of any operation to maintain or improve any existing watercourse or drainage works, or to construct new works required for the drainage of land, including works of defense against seawater or tidal water, and
3. Controlling foxes in order to protect livestock and penned game

Kill or take badgers or to interfere with their setts for:

1. The purpose of preventing the spread of disease; and
2. The purpose of preventing serious damage to land, crops, poultry or any other form of property.

The Natural Resources Wales are also a licensing authority under the 1992 Act. In relation to disturbance of badgers, Natural Resources Wales (2018) gives guidelines on disturbance which will require a licence. These includes: "*using very heavy machinery (generally tracked vehicles) within 30 metres of any entrance to an active sett; using lighter machinery, particularly for any digging operation, within 20 metres; light work such as hand digging or scrub clearance within 10 metres. There are some activities which may cause disturbance at greater distances (such as using explosives or pile driving) and these should be given individual consideration.*"

## **Bats**

In England and Wales, all bats and their roosts are protected under the Conservation of Habitats and Species Regulations 2017 and the Wildlife & Countryside Act 1981 (as amended). Several species of bat are also highlighted as Priority Species under the UK Biodiversity Action Plan and within the Local BAP.

Under the current legislation as summarised on pages 8 and 9 of the Bat Surveys for Professional Ecologists Good Practice Guidelines – 3rd Edition (2016) it is a criminal offence to:

*“To kill, capture, injure or take a wild bat;*

- *To damage or destroy a place used by a bat for breeding or resting. All offences of this nature are identified within the Habitats Regulations. This offence is unique in that it can be committed accidentally. No element of intentional, reckless or deliberate action needs to be evidenced;*
- *To disturb bats anywhere (roosts, flight lines or foraging areas) if levels of disturbance can be shown to impair their ability to survive, to breed or reproduce, to rear or nurture their young, to hibernate or migrate or to affect significantly local distribution or abundance;*
- *To intentionally or recklessly disturb a bat, whilst it is occupying a place of shelter or protection;*
- *To intentionally or recklessly obstruct access to any place used by a bat for shelter or protection; and*
- *To be in possession or control of a bat alive or dead (or any part of a bat or anything derived from a bat, although bat droppings are generally considered to be acceptable), or to transport a bat, to sell or exchange a bat or to offer to sell or exchange a bat taken from the wild.”*

### ***Breeding Birds***

Breeding Birds are protected under the Wildlife and Countryside Act which make it an offence to:

- *intentionally kill, injure or take any wild bird or take, damage or destroy the nest of any wild bird whilst it is in use or being built;*
- *intentionally take or destroy the egg of any wild bird;*
- *have in one's possession or control any wild bird, dead or alive, or any part of a wild bird (including eggs), which has been taken in contravention of the Act or the Protection of Birds Act 1954;*
- *intentionally or recklessly disturb any wild bird listed on Schedule 1 while it is nest building, or at a nest containing eggs or young, or disturb the dependent young of such a bird.*

### ***Invasive Species***

It is an offence under Section 14(2) of the Wildlife and Countryside Act 1981 to ‘plant or otherwise cause to grow’ in the wild any plant in Schedule 9 Part II.

**It is a criminal offence to intentionally, wilfully kill, injure or take any of the aforementioned protected species or to destroy or disturb its habitat.**

### **Local Policy**

The site lies within Mancot and is covered by the Flintshire Local Development Plan 2015-2030 (Adopted 2023). It has been adopted in line with the Future Wales: The National Plan 2040. The policies of relevance are EN6 and EN9 regarding Sites of Biodiversity Importance and Development in or Adjacent to Conservation Areas.

## Cofnod Environmental Information Search (CONFIDENTIAL VERSION)

<b>Our Reference</b>	CO/E11491
<b>Your Reference</b>	P.1884.23
<b>Requested By</b>	Liz Kenyon, Ascerta
<b>Data Users</b>	Liz Kenyon (Senior Ecologist); Lizzie Atkinson (Ecologist)
<b>Search Date</b>	08/08/2023 09:04
<b>Expiry Date</b>	08/02/2024 (may be extended on request)
<b>Search Type</b>	Chargeable

### Important Information

- Use of the data is governed by Cofnod's [Terms & Conditions](#).
- Data marked as confidential or sensitive must not be released into the public domain, with the exception of the Public Version of the PDF report, which has had sensitive information removed or restricted.
- You should not amend any part of the downloaded records.
- Unless otherwise agreed, use of the data is valid until the Expiry Date (08/02/2024).
- Past records of presence of a habitat or species do not guarantee continued occurrence; absence of records does not imply absence of a species, merely that no records are held by Cofnod; Cofnod cannot guarantee the accuracy of supplied data; copyright of records remains with the original recorder.
- The Dataset ID associated with each record can be used to find information about the provenance of the data. See the [Cofnod Metadata](#) page for more information.
- Verification Levels are given for each record and indicate whether the record has been assessed by an expert.
- Please [contact us](#) if you have any questions about using the data or wish to add further Data Users.

### Notes

- Records with 1km, 2km, 5km, 10km or 100km grid references (where present) are highlighted with, for example, (1km) next to the distance to indicate that the distance

should not be considered to be exact given the vague nature of the grid reference.

- Records shown in **bold** typeface are sensitive species records, and **must not be released into the public domain**. A public version of this report is also available and this can be released into the public domain. In the public version the resolution of sensitive species grid references are reduced and the contents of some fields are removed.
- **Distances:** The distance from each record to the grid reference will be shown in the 'Distance (m)' column (except in public versions of reports as referred to above). Distances are highlighted in **red** where records fall within 50m of the grid reference. Distances are measured from edge of the search location to the centre point of a record's grid square.

## Verification Levels

- **UA:** Unassessed
- **PC:** Probably Correct
- **KC:** Known Correct
- **NA:** Not Required

## Species Categories

- **All Other Species:** Any species not included in other categories
- **Category 1 Species:** Species with European and/or UK Legal Protection, Section 7 Species or UK BAP Priority Species
- **Category 2 Species:** Global Red List, British Red Data Book, Nationally Rare & Scarce, Welsh Red and Amber Birds & Welsh Red Data Lists, not identified in Category 1
- **Category 3 Species:** Local species not identified under Categories 1 & 2, Locally Important species as specified by local experts

## Data Description

<b>Distance</b>	Indicates the distance, in metres, between the grid reference of the record (using the central point of the grid square) and the search location. For any Sensitive Species Records, this should not be released into the Public Domain.
<b>Species Name</b>	Name of the taxon (usually identified to species level) using the binomial system.
<b>Grid Reference</b>	Grid reference based on the Ordnance Survey grid system.
<b>Date</b>	Date on which the record was made. In some cases this might be a date range, or a vague date such as 'Summer 2010'.
<b>Recorder(s)</b>	One or more people who made the original observation and recorded it in some way. It may have subsequently been included in a data collation by another person or it may have been submitted to the LERC directly.
<b>Abundance</b>	Number of individuals recorded. Where not specified it is assumed that at least one was present.
<b>Record Type</b>	A description of the type of record.
<b>Site Name</b>	The site name (if one has been supplied). For any Sensitive Species Records, this cannot be released into the Public Domain.
<b>Notes</b>	Any additional notes about the sighting. For any Sensitive Species Records, this cannot be released into the Public Domain.
<b>Dataset ID</b>	ID of this dataset. See 'Important Issues' for more details.
<b>Lists</b>	Any local, national or international conservation statuses or legal protection which apply to this species and whether it is included in any Local Biodiversity Action Plans. See 'Abbreviations' for more details.
<b>V</b>	An indicator showing the level of confidence held in the record's correct identification.

## Dataset Information

The records in these results are drawn from the following datasets. Use the Dataset ID next to each record to find its dataset.

Dataset ID	Title	Acknowledgements	Type
D0026/042/01	Records captured from CCW regional files - CCW Files SJ18.1 & SJ18.2 - SSSI: Dee Estuary/Aber Afon Dyfrdwy - Scientific Information	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0026/073/01	Records captured from CCW regional files - CCW File SJ37.3.3 (Dee Bridge to A55 Junction Road Improvements) - Deeside - Un-named File	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0035/002/01	Vice-County dataset - Reptile records from Denbighshire and Flintshire Vice-counties (50 and 51)	Mick Brummage (North East Wales Amphibian and Reptile Network)	Species
D0059/001/03	North Wales badger records held by Clwyd Badger Group (including some historic data) - CBG Historic sett data	Clwyd Badger Group (clwydbadgergroup@btinternet.com)	Species
D0059/009/01	North Wales badger records held by Clwyd Badger Group (including some historic data) - Badger road traffic accidents recorded by CBG, imported from spreadsheet	Clwyd Badger Group (clwydbadgergroup@btinternet.com)	Species
D0062/008/01	Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - All records up to 2018	Ian M Spence (Clwyd Bird Recording Group)	Species
D0062/012/01	Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - 2021 records	Ian M Spence (Clwyd Bird Recording Group)	Species
D0101/001/01	Historic Vice-County dataset - Vascular plant records from Flintshire Vice-county (50) digitised by Cofnod - Species summary cards	Goronwy Wynne (BSBI Vice County Recorder)	Species
D0108/001/03	Brown Hare records collated by North Wales Wildlife Trust - Brown Hare records	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species
D0121/001/02	Wales Water Vole Database 2006 - Data from the Cofnod area	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0127/001/02	Historic Vice-County dataset - Butterfly records from Denbighshire and Flintshire Vice-counties (50 and 51)	Rob Whitehead	Species
D0217/001/04	Welsh Invertebrate Database (WID) - Records from within the Cofnod boundary	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0227/002/01	Flintshire Wildlife Sites - Species records extracted from Wildlife Site Database	Cyngor Sir y Fflint/Flintshire County Council	Species
D0257/008/01	Miscellaneous species records collected by Richards, Moorehead and Laing Ltd on behalf of various clients - Records entered by RML from miscellaneous reports	Richards, Moorehead and Laing Ltd	Species
D0346/001/01	eBird records - 2020 records from Cofnod area	Cornell Lab of Ornithology	Species

D0346/002/01	eBird records - 2021 records from Cofnod area	Cornell Lab of Ornithology	Species
D0346/003/01	eBird records - Records from Cofnod area between 2011 and 2019	Cornell Lab of Ornithology	Species
D0969/001/05	Miscellaneous species records submitted to rECOrd	rECOrd	Species
D0971/001/01	Hedgehog records collected by NRW and Wild Ground	Wild Ground & Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1072/001/02	Mammal records from Britain from the Atlas of Mammals (1993), with some subsequent records	Biological Records Centre (NBN Download)	Species
D1075/001/06	Bryophyte data for Great Britain from the British Bryological Society held by BRC: Atlas 2014 - North Wales data	British Bryological Society (NBN download 04/12/2019)	Species
D1076/001/02	Reptiles and Amphibians Dataset	Biological Records Centre (NBN Download)	Species
D1081/001/03	Caddisfly (Trichoptera) records from Britain' held by UK Trichoptera (Caddisfly) Recording Scheme	Biological Records Centre & UK Caddis Recording Scheme	Species
D1097/002/04	Ladybird Survey of the UK - Data from the Cofnod area	Biological Records Centre	Species
D1117/001/01	ad hoc Cofnod Online Recording System records	Individual Recorder(s)	Species
D1118/011/03	Miscellaneous species datasets held in MapInfo format by Matthew Ellis - Great Crested Newt records	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1118/013/01	Miscellaneous species datasets held in MapInfo format by Matthew Ellis - Watervole records	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1156/004/02	Marine Intertidal Phase 1 species dataset from the Countryside Council for Wales 1996-2005 - Species records from the Cofnod area	Cyfoeth Naturiol Cymru/Natural Resources Wales (NBN Download, 22/01/2020)	Species
D1161/001/01	Butterfly distributions for Great Britain and Ireland for the period 1690-1999 from Butterfly Conservation and the Biological Records Centre - Records not already held by Cofnod, VCs 50 & 51	Butterfly Conservation (NBN download)	Species
D1239/013/01	Miscellaneous species records captured from paper forms containing results of surveys on potential N E Wales Wildlife Sites. - SJ36 Alyn + Deeside	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species
D1274/001/01	Vice-County dataset - Vascular plant records from Flintshire Vice-county (51).	Emily Meilleur (BSBI)	Species
D1285/001/03	Vice-County dataset - Moth records from Denbighshire and Flintshire Vice-counties (50 and 51)	Justin Williams	Species
D1295/001/05	Dragonfly records from the British Dragonfly Society Recording Scheme - Records from the Cofnod area	British Dragonfly Society Recording Scheme (2022). Dragonfly records from the British Dragonfly Society Recording Scheme. Occurrence dataset on the NBN Atlas	Species
D1297/020/01	BirdTrack records - 2015 records from within the Cofnod boundary	British Trust for Ornithology & Individual Recorders	Species
D1297/021/01	BirdTrack records - 2016 records from within the Cofnod boundary	British Trust for Ornithology & Individual recorders	Species

D1297/025/01	BirdTrack records - 2004-2018 data from Vice-Counties 50 & 51 (Denbighshire & Flintshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/027/01	BirdTrack records - 2019 data from Vice-County 51 (Flintshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/040/01	BirdTrack records - 2020 records for Vice-County 51 (Flintshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/041/01	BirdTrack records - 1900-2003 records for Vice-County 51 Flintshire	Ian M. Spence and British Trust for Ornithology	Species
D1297/047/01	BirdTrack records - 2021 records from within the Cofnod boundary (excluding Meirionnydd)	Julian Hughes & British Trust for Ornithology	Species
D1297/049/01	BirdTrack records - 2022 records for Vice-County 51 (Flintshire)	Ian M. Spence & British Trust for Ornithology	Species
D1308/001/01	Flintshire (VC51) County Rare Plant Register - WYNNE, G. et al, 2008: "The Rare Plants of Flintshire". Unpublished report, compiled by Goronwy Wynne, Joe Phillips and Delyth Williams. BSBI.	Goronwy Wynne (former BSBI Vice County Recorder)	Species
D1308/002/01	Flintshire (VC51) County Rare Plant Register - BROWN, B.M., 2020: "The Rare Plants of Flintshire. A Register of the rare, scarce or threatened plants in the old county of Flintshire, botanical vice-county 51. Based on the original edition by Goronwy Wynne, with Delyth Williams & Joe Phillips". Botanical Society of the British Isles	Botanical Society of the British Isles	Species
D1330/001/01	Invasive Non Native Species records, submitted to Cofnod as part of the N. Wales and Dee Invasive Non Native Species Forum 'Record An Alien' project	Individual recorders	Species
D1373/001/05	Historic Vice-County dataset - Butterfly records from Denbighshire and Flintshire Vice-counties (50 and 51)	David Hinde	Species
D1383/001/01	Hedgehog records submitted to Cofnod via their Online Recording System	Individual Recorders, and North Wales Local Biodiversity Action Plan partnerships.	Species
D1476/001/01	2008 Farmland Bird Survey North East Wales - RSPB/CCW	RSPB Cymru and Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1480/001/01	Wales Online Amphibian & Reptile Atlas Ad-hoc Records	Amphibian & Reptile Conservation Trust	Species
D1486/001/01	Natural Resources Wales North Wales Bat Roosts	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1543/001/01	Miscellaneous bat records collected by Sam Dyer - Building and Roost records	Sam Dyer	Species
D1544/002/01	Data collected as part of Vincent Wildlife Trust national polecat distribution survey 2014 & 2015 - N. Wales records not submitted through Cofnod ORS	Vincent Wildlife Trust	Species
D1574/001/03	Hedgehog Hibernation Survey records	People's Trust for Endangered Species	Species
D1578/001/02	BLS Lichen Database: Wales churchyards 1700-2016	British Lichen Society	Species
D1587/002/01	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Records from 2014	Jonathan Shanklin	Species

<b>D1587/003/01</b>	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Records from July 2015	Jonathan Shanklin	Species
<b>D1587/013/01</b>	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Additional records from October 2012	Jonathan Shanklin	Species
<b>D1587/015/01</b>	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Records from April 2017	Jonathan Shanklin	Species
<b>D1587/030/01</b>	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - August 2019	Jonathan Shanklin	Species
<b>D1587/033/01</b>	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - December 2019	Jonathan Shanklin	Species
<b>D1587/041/01</b>	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - October 2021	Jonathan Shanklin	Species
<b>D1587/045/01</b>	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Records from June 2022	Jonathan Shanklin	Species
<b>D1587/046/01</b>	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Records from July 2022	Jonathan Shanklin	Species
<b>D1587/047/01</b>	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Records from August 2022	Jonathan Shanklin	Species
<b>D1587/050/01</b>	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Records from April 2023	Jonathan Shanklin	Species
<b>D1643/001/01</b>	Butterfly distributions for the UK 2010-2014 from Butterfly Conservation and the Biological Records Centre - Records not already held by Cofnod (VCs 50 & 51)	Butterfly Conservation (NBN download)	Species
<b>D1650/001/02</b>	Miscellaneous invertebrate species records by Bryan Formstone and others - Aculeata records from Vice-counties 50 and 51	Bryan Formstone	Species
<b>D1666/001/01</b>	Records captured from Licence Returns submitted to Natural Resources Wales - Mammal records captured during 2016 from survey licence return forms	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
<b>D1682/001/03</b>	National Bat Monitoring Programme Field Survey - Records from the Cofnod area, received March 2020	Bat Conservation Trust	Species
<b>D1683/002/01</b>	National Bat Monitoring Programme Waterway Survey - Records from the Cofnod area, received September 2022	Bat Conservation Trust	Species
<b>D1688/004/01</b>	Big Hedgehog Map records - Records from 2010 to January 2020	People's Trust for Endangered Species	Species
<b>D1688/005/01</b>	Big Hedgehog Map records - Records from January 2020 - June 2020	People's Trust for Endangered Species	Species
<b>D1688/007/01</b>	Big Hedgehog Map records - Records from January 2021 - July 2021	People's Trust for Endangered Species	Species

D1688/008/01	Big Hedgehog Map records - Records from May 2021 - March 2022	People's Trust for Endangered Species	Species
D1734/001/02	Swift Inventory of Low-Level Screaming Parties in the UK, 2009-2014 - Records from Cofnod area	RSPB (NBN download, 23/01/2020)	Species
D1735/001/02	Swift Inventory of Nest Sites in the UK, 2009-2014 - Records from Cofnod area	RSPB (NBN download, 23/01/2020)	Species
D1743/001/01	British Myriapod and Isopod Group, Centipede Recording Scheme data held by the Biological Records Centre - Records from the Cofnod area	Biological Records Centre	Species
D1767/004/01	Miscellaneous species records collated by Julie Rose - SJ3268, Chemistry Lane, Sandycroft	Julie Rose and Peter Stevenson	Species
D1767/005/01	Miscellaneous species records collated by Julie Rose - SJ3267, Chemistry Lane, Sandycroft	Julie Rose	Species
D1775/001/02	Tir Cynnal and Tir Gofal Monitoring and Evaluation Programme: Field-scale winter surveys of yellowhammers	Welsh Government (NBN Download, 13/11/2019)	Species
D1803/001/01	Miscellaneous species records collected by David Winnard - Moths 2017	David Winnard	Species
D1844/001/03	iRecord data for the Cofnod area - Verified data	Biological Records Centre and Individual Recorders	Species
D1847/001/01	Hogwatch and Rural Landowner surveys	People's Trust for Endangered Species	Species
D1852/001/01	RSPB Big Garden Birdwatch winter sightings in the UK in 2008 - 2008 records	RSPB (NBN Download, 16/01/2019)	Species
D1852/002/01	RSPB Big Garden Birdwatch winter sightings in the UK in 2008 - 2009 records	RSPB (NBN Download, 16/01/2019).	Species
D1858/001/02	Butterfly records collected and collated by Andrew Graham for VCs 50 and 51 - Records to 2019 inclusive	Andrew Graham	Species
D1874/001/01	Vice-County dataset - Micro-moth records from Flintshire Vice-county (51) - Records from 2007 to 2018	Helen Bantock	Species
D1874/005/01	Vice-County dataset - Micro-moth records from Flintshire Vice-county (51) - Additional records supplied by Andrew Graham 26/10/2022	Andrew Graham	Species
D1923/001/01	Natural Resources Wales (NRW) Licence Return Dataset	Cyfoeth Naturiol Cymru/Natural Resources Wales (NBN Download, 05/12/2019)	Species
D1944/001/01	Big Bluebell Watch - 2017 records	The Woodland Trust (NBN Download)	Species
D1944/002/01	Big Bluebell Watch - 2018 records	The Woodland Trust (NBN Download)	Species
D1946/001/01	Amphibian and reptile records for Great Britain 2016-2017	Froglife (NBN download)	Species
D1959/001/01	Dipterists Forum Stilt & Stalk Flies Recording Scheme data - Records from Cofnod area	Dipterists Forum (NBN download, 14/05/2020)	Species

D1964/001/01	Records from the Cofnod area entered using the LERC Wales App - Verified data	Biological Records Centre and Individual Recordors	Species
D1979/001/01	Vascular plant records verified via iRecord	Botanical Society of Britain & Ireland (NBN download, 24/09/2020)	Species
D1986/001/01	Non-avian taxa (BTO/JNCC/RSPB partnership)	British Trust for Ornithology (NBN download, 25/11/2020)	Species
D1991/001/02	Moth records collected by Andrew Graham from VC's 50 and 51	Andrew Graham	Species
D2012/002/01	Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - Ringing data - 2019 and earlier records not previously supplied	Ian M. Spence (Clwyd Bird Recording Group)	Species
D2012/003/01	Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - Ringing data - Additional records supplied in 2017	Ian M. Spence	Species
D2108/001/01	Big Butterfly Count records from VCs 50 & 51 - 2022 records	Butterfly Conservation	Species

Species List - A summary of species found in this search								
Search Group	Species Group	Scientific Name	English Name	Welsh Name	Earliest Year	Latest Year	Total Records	Lists
Category 1 Species	Terrestrial Mammal	Chiroptera	Bat	Ystlum	1986	2009	11	Bern2, Bonn2, CHS2, HDir4, LBAP-T, WCA5
Category 1 Species	Terrestrial Mammal	Erinaceus europaeus	Hedgehog	Draenog	1966	2022	43	BAP, Bern3, LBAP-A, LBAP-C, LBAP-F, LBAP-G, RL-VU, S7, WRL-TM[VU]
Category 1 Species	Terrestrial Mammal	Pipistrellus pipistrellus	Common Pipistrelle		1994	2020	77	Bonn2, CHS2, HDir4, LBAP-A, LBAP-D, LBAP-E, LBAP-F, LBAP-G, S7, WCA5
Category 1 Species	Flowering Plant	Hyacinthoides non-scripta	Bluebell	Clychau'r Gog	1996	2023	13	LBAP-A, LBAP-C, LBAP-E, LBAP-F, LBAP-T, WCA8
Category 1 Species	Bird	Passer domesticus	House Sparrow	Aderyn y To	1996	2022	32	BAP, LBAP-C, LBAP-F, LBAP-G, S7, UKBR, WBA
Category 1 Species	Flowering Plant	Cerastium fontanum	Common Mouse-ear	Clust-y-Llygoden Gulddail	1985	2021	18	BAP
Category 1 Species	Amphibian	Rana temporaria	Common Frog	Broga	1984	2017	4	Bern3, HDir5, LBAP-A, LBAP-C, LBAP-F, LBAP-T, WCA5
Category 1 Species	Bird	Emberiza citrinella	Yellowhammer	Bras Melyn	1993	2015	23	BAP, Bern2, LBAP-A, LBAP-C, LBAP-D, LBAP-E, LBAP-F, LBAP-G, S7, UKBR, WBR
Category 1 Species	Bird	Prunella modularis	Dunnoek	Llwyd y Gwrych	2002	2022	23	BAP, Bern2, LBAP-C, S7, UKBA
Category 1 Species	Bird	Sturnus vulgaris	Starling	Drudwen	1996	2022	25	BAP, BDir2.2, LBAP-C, LBAP-F, LBAP-G, RL-VU, S7, UKBR, WBR
Category 1 Species	Bird	Troglodytes troglodytes	Wren	Dryw	2002	2022	20	BAP, BDir1, Bern2, UKBA
Category 1 Species	Bird	Turdus philomelos	Song Thrush	Bronfraith	1999	2022	18	BAP, BDir2.2, LBAP-A, LBAP-C, LBAP-D, LBAP-E, LBAP-F, LBAP-G, LBAP-W, S7, UKBA, WBA
Category 1 Species	Bird	Larus argentatus	Herring Gull	Gwylan y Penwaig	2005	2022	18	BAP, BDir2.2, LBAP-C, LBAP-G, RL-DD, RL-EN, S7, UKBR, WBR
Category 1 Species	Terrestrial Mammal	Meles meles	Badger	Mochyn Daear	1983	2022	31	Bern3, LBAP-C, LBAP-D, LBAP-F, LBAP-W, PBA
Category 1 Species	Bird	Alauda arvensis	Skylark	Ehedydd	2004	2022	19	BAP, BDir2.2, LBAP-A, LBAP-C, LBAP-D, LBAP-E, LBAP-F, LBAP-G, S7, UKBR, WBA
Category 1 Species	Bird	Falco tinnunculus	Kestrel	Cudyll Coch	2004	2022	21	Bern2, Bonn2, CITES-A, LBAP-A, LBAP-C, LBAP-D, LBAP-F, LBAP-G, RL-VU, S7, UKBA, WBR
Category 1 Species	Bird	Turdus pilaris	Fieldfare	Socan Eira	2004	2021	9	BDir2.2, LBAP-C, RL-PX, UKBR, WBA, WCA1.1
Category 1 Species	Insect - Butterfly	Lasiommata megera	Wall	Gweirlöyn y Cloddiau	1953	1994	8	BAP, LBAP-G, RL-NT, S7
Category 1 Species	Insect - Butterfly	Satyrrium w-album	White-letter Hairstreak	Brithribin W Wen	1983	1983	2	BAP, LBAP-F, RL-EN, S7, WCA5
Category 1 Species	Bird	Tyto alba	Barn Owl	Tylluan Wen	2008	2022	7	Bern2, CITES-A, LBAP-A, LBAP-C, LBAP-D, LBAP-E, LBAP-F, LBAP-G, LBAP-T, LBAP-W, WBA, WCA1.1, WCA9
Category 1 Species	Bird	Regulus ignicapilla	Firecrest	Dryw Penfflamgoch	2015	2015	2	Bern2, LBAP-C, LBAP-G, WBA, WCA1.1

Search Group	Species Group	Scientific Name	English Name	Welsh Name	Earliest Year	Latest Year	Total Records	Lists
Category 1 Species	Bird	<i>Turdus iliacus</i>	Redwing	Coch Dan Adain	2004	2021	10	BDir2.2, LBAP-C, RL-CR, UKBA, WBA, WCA1.1
Category 1 Species	Terrestrial Mammal	<i>Nyctalus noctula</i>	Noctule Bat	Ystum Mawr	2018	2020	20	BAP, Bern2, Bonn2, CHS2, HDir4, LBAP-A, LBAP-C, LBAP-D, LBAP-E, LBAP-F, LBAP-G, S7, WCA5
Category 1 Species	Terrestrial Mammal	<i>Pipistrellus pygmaeus</i>	Soprano Pipistrelle		2018	2020	27	BAP, Bern2, Bonn2, CHS2, HDir4, LBAP-A, LBAP-D, LBAP-E, LBAP-F, LBAP-G, S7, WCA5
Category 1 Species	Insect - Moth	<i>Arctia caja</i>	Garden Tiger	Teigr yr Ardd	1986	2018	5	BAP, LBAP-G, S7
Category 1 Species	Insect - Moth	<i>Caradrina morpheus</i>	Mottled Rustic	Gwladwr Brith	1986	2018	5	BAP, LBAP-G, S7
Category 1 Species	Insect - Moth	<i>Cirrhia icteritia</i>	Sallow	Melyn Penfelyn	1987	2020	5	BAP, LBAP-G, S7
Category 1 Species	Insect - Moth	<i>Ennomos quercinaria</i>	August Thorn	Carplog Awst	1987	1987	1	BAP, LBAP-G, S7
Category 1 Species	Insect - Moth	<i>Euxoa nigricans</i>	Garden Dart	Dart y Gerddi	1986	1998	3	BAP, LBAP-G, S7
Category 1 Species	Insect - Moth	<i>Graphiphora augur</i>	Double Dart	Dart Deunod	1986	1998	2	BAP, S7
Category 1 Species	Insect - Moth	<i>Helotropha leucostigma</i>	Crescent	Clustwyfyn Cilgantog	1971	2015	5	BAP, S7
Category 1 Species	Insect - Moth	<i>Hoplodrina blanda</i>	Rustic	Llwyd Llyfn	1986	2015	4	BAP, LBAP-G, S7
Category 1 Species	Insect - Moth	<i>Hydraecia micacea</i>	Rosy Rustic	Gwladwr Gwridog	1987	2020	5	BAP, LBAP-G, S7
Category 1 Species	Insect - Moth	<i>Pechipogo strigilata</i>	Common Fan-foot	Coeswyntyll Gyffredin	1986	1986	1	BAP
Category 1 Species	Insect - Moth	<i>Scotopteryx chenopodiata</i>	Shaded Broad-bar	Rhesen Lydan Dywyll	1987	2021	5	BAP, LBAP-G, S7
Category 1 Species	Bird	<i>Alcedo atthis</i>	Kingfisher	Glas y Dorlan	2005	2020	3	BDir1, Bern2, LBAP-C, LBAP-D, LBAP-F, LBAP-G, LBAP-T, WBA, WCA1.1
Category 1 Species	Bird	<i>Chroicocephalus ridibundus</i>	Black-headed Gull	Gwylan Benddu	2005	2022	15	BDir2.2, LBAP-G, RL-VU, S7, UKBA, WBR
Category 1 Species	Bird	<i>Emberiza schoeniclus</i>	Reed Bunting	Bras y Cyrs	2004	2017	7	BAP, Bern2, LBAP-C, LBAP-D, LBAP-F, LBAP-G, S7, UKBA, WBA
Category 1 Species	Bird	<i>Linaria cannabina</i>	Linnet	Llinos	2005	2021	9	BAP, Bern2, LBAP-A, LBAP-C, LBAP-D, LBAP-F, LBAP-G, RL-NT, S7, UKBR, WBR
Category 1 Species	Amphibian	<i>Lissotriton helveticus</i>	Palmate Newt	Madfall Ddwr Balfog	2004	2022	2	Bern3, LBAP-A, LBAP-C, LBAP-D, LBAP-F, LBAP-T, WCA5
Category 1 Species	Amphibian	<i>Lissotriton vulgaris</i>	Smooth Newt	Madfall Ddwr Gyffredin	1984	2022	3	Bern3, LBAP-C, LBAP-D, LBAP-F, LBAP-T, WCA5
Category 1 Species	Bird	<i>Locustella naevia</i>	Grasshopper Warbler	Troellwr Bach	1979	2010	5	BAP, LBAP-C, LBAP-D, LBAP-F, LBAP-G, S7, UKBR, WBR
Category 1 Species	Bird	<i>Pyrrhula pyrrhula</i>	Bullfinch	Coch y Berllan	2002	2021	11	BAP, LBAP-C, LBAP-D, LBAP-F, LBAP-G, S7, UKBA, WBR
