APPENDICES

1 INTRODUCTION

1.1 Preamble

1.1.1 Eddisons has been instructed by Castle Green Homes to advise on the traffic and transport issues relating to a planning application for a residential development on land off the A547 Ffordd Talargoch in Meliden, known as Mindale Farm.

1.1.2 The report provides information on the traffic and transport planning aspects of the development proposals and assist the local planning authority in the positive determination of the forthcoming planning application.

1.1.3 Following this introduction, Section 2 of the report details the existing site conditions and describes the adjacent highway network.

1.1.4 Section 3 provides details of the proposed development including vehicular, pedestrian and cycle access. Section 4 of the report considers the aspects of national and local planning policy which are relevant to the development.

1.1.5 Section 5 considers the accessibility of the site by non-car modes and Section 6 contains details of the Framework Travel Plan.

1.1.6 Section 7 considers the trip generation and traffic impact assessment of the local highway network, whilst Section 8 analyses the accident statistics within the vicinity of the site.

1.1.7 Section 9 draws together the conclusions to this report.

2 DEVELOPMENT SITE AND PROPOSALS

2.1 Existing Site

2.1.1 The site is located within the village of Meliden approximately 800 metres north-west of the village centre. The location of the site is shown on **Plan 1**.

2.1.2 The site is bound to the south by residential development and the A547 Ffordd Talargoch, whilst agricultural land bounds the site to the north and west and undeveloped land bounds the site to the east. The site is currently used for undeveloped and vehicular access is provided via gated access points off neighbouring agricultural fields.

2.1.3 The A547 Ffordd Talargoch which bounds the site to the south runs in an approximate north-south alignment. In the vicinity of the site, the A547 Ffordd Talargoch is a single carriageway road and has a carriageway width of 7.2 metres. A shared pedestrian/cycleway is located on the western side of the A547 Ffordd Talargoch along the frontage of the site and a footway with a width of at least 2 metres is located on the eastern side of the carriageway.

2.1.4 The speed limit on the A547 Ffordd Talargoch changes adjacent to the site boundary. To the north it is subject to a 20mph speed limit whilst to the south the A457 Ffordd Talargoch is subject to a 40mph speed limit.

2.1.5 To the south the A547 Ffordd Talargoch provides access to Dysarth before continuing into Dysarth and linking with the wider highway network.

2.1.6 To the north the A547 Ffordd Talargoch provides access into Meliden village centre, to the north it provides access to road network located in Prestatyn and the wider highway network including the A458 Prestatyn Road.

2.2 Baseline Transport Data

2.2.1 The site currently comprises undeveloped land and does not generate any traffic movements onto the local highway network.

3 DEVELOPMENT PROPOSALS

3.1.1 The development proposals relate to a planning application for the development of 154 residential units on the site. The residential development will comprise of the following mix of house types.

- 12 x 1-Bedroom flats.
- 58 x 2-Bedroom units.
- 76 x 3-Bedroom dwellings.
- 8 x 4-Bedroom dwellings.

3.1.2 The proposed site layout is displayed in **Plan 2**.

3.2 Vehicular Access

3.2.1 Vehicular access into the site will be provided for via a new priority-controlled access off the A547 Ffordd Talargoch approximately 75 metres south of the A547 Ffordd Talargoch/Ffordd Ty Newydd priority-controlled junction.

3.2.2 The proposed access will have a carriageway width of 5.5 metres, incorporate 6 metre corner radii and provide 3 metre shared cycle footway on the northern side of the access road and a 1 metre service strip on the southern side. The proposed footway provision links with the existing provision located on the western side of the A547 Ffordd Talargoch carriageway.

3.2.3 As previously stated, the existing speed limit on A547 Ffordd Talargoch changes at the point where the access junction is provided. As part of the proposed access arrangements, it is proposed to extend the existing 20mph speed limit to the south beyond the site access junction. This extension reflects the change in nature with increased pedestrian and cyclist usage as a result of the proposed development.

3.2.4 Based on 20mph speed limit, a visibility splays of 2.4 metres by 25 metres can be achieved in each direction. It should be noted that a visibility splay to the south that accords with the existing 40mph speed can be achieved.

3.2.5 The proposed site access arrangement is displayed in **Plan 3**.

3.3 Pedestrian and Cycle Access

3.3.1 Pedestrian and cycle access into the site will be afforded via the proposed vehicular access off the A547 Ffordd Talargoch which link with the existing provision on the A547 Ffordd Talargoch.

3.3.2 In addition, a further pedestrian/cycle access into the site will be provided on the eastern side of the site to link with the existing public footpath that links with Ffordd Ty Newydd. Whilst a further pedestrian link from the site is proposed in the north-east corner which links with the existing PRoW that runs along Maes Meurig.

3.3.3 The pedestrian and cycle provision detailed above together with the provision within the site will ensure that the application site is linked to the extensive provision located in the vicinity of the site, which in turn provide access to the local amenities and services located within the surrounding areas of Meliden

3.4 Servicing

3.4.1 To demonstrate that the site can be serviced in a safe and efficient manner, swept path analysis has been undertaken using a 11.5 metre refuse vehicle. This is the same size/type of vehicle that has been used and accepted by Denbighshire Council on other planning applications in the area.

3.4.2 As can be seen in **Plan 4**, the refuse vehicle can manoeuvre safely and efficiently within the proposed site layout.

3.5 Internal Layout

3.5.1 In order to fully advise the local highway authority an illustration of the visibility at junctions and forward visibility at bends within the site has been undertaken. The speed limit within the site will be 20mph, therefore, visibility requirements for based on this speed limit have been provided i.e. Stopping Speed Distance of 25 metres.

3.5.2 The internal layout visibility splays and forward visibility are displayed on **Plan 5**.

4 TRANSPORT PLANNING POLICY

4.1 Introduction

4.1.1 Planning Policy Wales (PPW) sets out the Welsh Government's planning policies and is a relevant material consideration. The Technical Advice Notes (TANs) provides further detail on how the PPW should be applied.

4.1.2 Local transport planning policy has been taken from the North Wales Joint Local Transport Plan (2015-2020) and the Denbighshire County Council's Local Development Plan (2021).

4.1.3 This section will briefly outline the pertinent policies relating to the proposed development.

4.2 National Policy

Planning Policy Wales Edition 12 (2024)

4.2.1 Planning Policy Wales (PPW) Edition 12, was published in February 2024, and sets out the land use planning policies of the Welsh Government. It translates the Government's commitment to sustainable development into the planning system to ensure that it plays an appropriate role in moving towards sustainability.

4.2.2 The PPW is supplemented by a series of Technical Advice Notes (TAN's) with procedural advice given in circulars and policy clarification letters.

4.2.3 At the heart of the PPW is the key theme of sustainable development and the PPW highlights the need for the planning system to play an active role in guiding development to sustainable solutions. It highlights that the planning system should reconcile the needs of development and conservation, securing economy, efficiency and amenity in the use of land, and protecting natural resources and the historic environment. It maintains that a well-functioning planning system is fundamental for sustainable development.

4.2.4 The Welsh Government was one of the first administrations in the world to have a distinctive statutory duty in relation to sustainable development. The Well-being of Future Generations (Wales) Act 2015 places a duty on public bodies that they must carry out sustainable development. The PPW addresses each of the seven goals of the Well-being of Future Generations Act, which are:

- A Prosperous Wales.
- A Resilient Wales.
- A More Equal Wales.
- A Healthier Wales.
- A Wales of Cohesive Communities.
- A Wales of Vibrant Culture and Thriving Welsh Language; and
- A Globally Responsible Wales.

4.2.5 Transport plays a key part in promoting and ensuring sustainable development and meeting each of these themes. Well-designed sustainable transport solutions can ensure access to employment, services and amenities, promotes social inclusion, and promotes a healthy society whilst minimising the impact of development on the environment.

4.2.6 Section 4 of the PPW concerns Active and Social Places and highlights that:

"Active and Social Places are those which promote our social, economic, environmental and cultural well-being by providing well-connected cohesive communities. Places which are active and social contribute to the seven goals of the Well-being of Future Generations Act".

4.2.7 It goes on to state that:

"Development proposals must seek to maximise accessibility by walking, cycling and public transport, by prioritising the provision of appropriate on-site infrastructure and, where necessary, mitigating transport impacts through provision of off-site measures, such as the development of active travel routes,

bus priority infrastructure and financial support for public transport services. Importantly, sustainable transport infrastructure and services should be prioritised and put in place from the outset, before people have moved in and travel patterns have been established".

The document provides an illustration of the hierarchy to be applied in development planning, and this is reproduced in **Figure 4.1**.

Figure 9: The Sustainable Transport Hierarchy for Planning

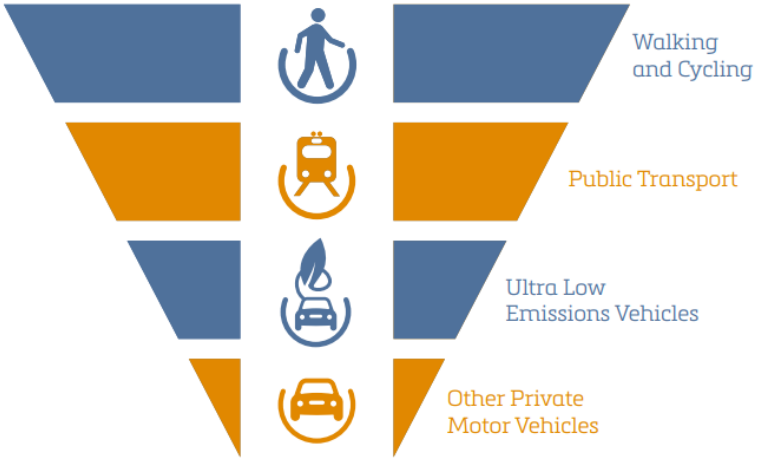

Figure 3.1 PPW Extract – The Sustainable Transport Hierarchy for Planning

4.2.8 In relation to design standards, PPW notes that the design of new or enhanced streets should respond to urban design principles, including those in Manual for Streets and the Active Travel Act Guidance, and not adhere to rigid standards.

4.2.9 It goes on to state that:

"Planning authorities must support active travel by ensuring new development is fully accessible by walking and cycling. The aim should be to create walkable neighbourhoods, where a range of facilities are within walking distance of most residents, and the streets are safe, comfortable and enjoyable to walk and cycle."

Technical Advice Note 18 (TAN18): Transport

4.2.10 Technical Advice Note 18 (TAN 18) should be read in conjunction with the PPW and is intended as a supplementary document. TAN 18 outlines how to integrate land use and transport planning and explains how transport impacts should be assessed and mitigated.

4.2.11 It includes advice on transport related issues when planning for new development including integration between land use planning and transport, location of development and design of development. It provides the standards to be applied in terms of visibility splays at junctions, and these are in accordance with those set out in Manual for Streets.

4.2.12 TAN18 highlights that an efficient and sustainable transport system is a requirement for a modern, prosperous and inclusive society. However, transport, particularly road traffic, can also have negative impacts on human health and the environment. It highlights that the overarching aim of transport policy in Wales is aimed at reducing road traffic.

4.2.13 TAN18 outlines a number of objectives to achieve sustainable transport. These objectives include:

- Promoting resource and travel efficient settlement patterns.
- Ensuring new development is located where there is, or will be, good access by public transport, walking and cycling, minimising the need for travel and fostering social inclusion.
- Managing parking provision.
- Ensuring that new developments include appropriate provision for pedestrians.
- Encouraging the location of development near other related uses to encourage multi-purpose trips.
- Promoting cycling and walking.
- Supporting the provision of high quality, inclusive public transport, and

- Encouraging good quality design of streets that provide a safe public realm and a distinct sense of place.

4.2.14 TAN 18 highlights that local authorities should seek to maximise relative accessibility rather than ensuring everyone can travel everywhere. In this instance accessibility refers to the relative ability to take up services, markets or facilities. The Welsh Government argues that focusing on accessibility is important in addressing social exclusion and for maximising choice in services, employment and recreation opportunities.

4.2.15 As will be demonstrated within this document, the proposed development accords with the aims and objections of the PPW and TAN18.

4.3 Local Policy

Joint North Wales Local Transport Plan

4.3.1 The Joint North Wales Local Transport Plan (LTP) has been jointly prepared by the six North Wales Local Authorities of Conwy County Borough Council, Denbighshire County Council, Flintshire County Council, Gwynedd Council, Isle of Anglesey County Council and Wrexham County Borough Council. The joint authority is commonly referred to as Taith.

4.3.2 Taith has responsibility for the development and delivery of the LTP in North Wales. The underlying theme and objectives of the LTP are to promote policies and measures to foster and achieve improved opportunities for travel choices by non-car modes. This provides the context for specific local measures to be considered, promoted and introduced.

4.3.3 The LTP covers a detailed programme from 2015 to 2020 and provides a framework for schemes until 2030. It sets out a range of interventions for all modes of travel with schemes responding to the issues of transport in the region and complementing those being developed at the national level and across borders.

4.3.4 The LTP aims to improve connections to key destinations and markets, enhance access to employment and services, increase the level of walking and cycling, bring improved safety and security and at the same time bring benefits and minimised impacts on the environment.

Denbighshire Local Development Plan (2013)

4.3.5 The Denbighshire Local Development Plan (2006-2021) adopted 4th June 2013 and aims to achieve its vision for a sustainable and prosperous county through the implementation of sixteen objectives addressing areas for concern such as employment, transport and infrastructure.

4.3.6 Transport policies place emphasis on integrating land-use in order to reduce the need to travel while promoting sustainable transport. Denbighshire is recognised as being predominantly a car dependant county due to its rural nature, and the LDP objectives stress the need for improvement of facilities to promote sustainable forms of transport and address this car dependence.

4.3.7 The application site is allocated in Local Development Plan for residential development (Policy BSC1). In terms of transport policy this is contained within the following policies.

Policy RD 1 – Sustainable development and Good Standard Design

"Development proposals will be supported within development boundaries provided that all the following criteria are met:

vii) Provides safe and convenient access for disabled people, pedestrians, cyclists, vehicles and emergency vehicles together with adequate parking, services and manoeuvring space. Proposals should also consider impacts on the wider Rights of Way network surrounding the site; and

viii) Does not have an unacceptable effect on the local highway network as a result of congestion, danger and nuisance arising from traffic generated and incorporates traffic management/calming measures where necessary and appropriate. A transport assessment and travel plan will be required where appropriate; and

ix) Has regard to the adequacy of existing public facilities and services;"

Policy ASA 1 – New Transport Infrastructure

"Development proposals for the provision of new transport infrastructure an improvement to existing infrastructure facilities will be supported providing that the following criteria are met:

- *There is a need and justification for the proposal on economic and/or social grounds, and*
- *There are no unacceptable effects on the natural and built environment; and*
- *Provision is made for safe access by all users, including cyclists, pedestrians and the mobility impaired."*

4.3.8 This Transport Assessment provides appropriate responses to these items as necessary.

4.4 National and Local Policy Summary

4.4.1 Reference to national guidance contained within PPW has helped to demonstrate that the site is well related to the surrounding area and will contribute towards the creation of a sustainable development.

4.4.2 The proposed development will reduce the need to travel by car in part due to its location close to a range of services and amenities. Further details on the accessibility of the proposed development by non-car modes is provided in Section 5 of this Transport Assessment.

4.4.3 The site has been designed to promote the use of active travel, it also provides connections to the public transport network, which will also facilitate non-car travel to and from the proposed development.

4.4.4 This planning application is also supported by a Travel Plan document, which seeks to maximise travel by sustainable means and reduce car travel, particularly single occupancy journeys. The Travel Plan is discussed in more detail in Section 6.

5 ACCESSIBILITY BY NON CAR MODES

5.1 Introduction

5.1.1 In order to accord with the aspirations of the Planning Policy for Wales (PPW), any new proposals should extend the choice in transport and secure mobility in a way that supports sustainable development.

5.1.2 The principle of the PWW policy is to encourage sustainable travel as set out in paragraph 4.1.1:

The planning system should enable people to access jobs and services through shorter, more efficient and sustainable journeys, by walking, cycling and public transport. By influencing the location, scale, density, mix of uses and design of new development, the planning system can improve choice in transport and secure accessibility in a way which supports sustainable development, increases physical activity, improves health and helps to tackle the causes of climate change and airborne pollution.

5.1.3 New proposals should therefore be planned to influence the mode of travel to the development in terms of gaining a shift in modal split towards non-car modes, thus assisting in meeting the aspirations of current national and local planning policy.

5.1.4 The accessibility of the proposed site has been considered by the following modes of transport:

- access on foot.
- access by cycle.
- access by bus.

5.2 Access on Foot

5.2.1 It is important to create a choice of direct, safe and attractive routes between where people live and where they need to travel in their day-to-day life. This philosophy clearly encourages the opportunity to walk whatever the journey purpose and also helps to create more active streets and a more vibrant neighbourhood.

5.2.2 A shared pedestrian/cycleway is located on the western side of the A547 Ffordd Talargoch and a footway with a width of 2 metres is located on the western side of the carriageway. To the north, the footway provision provides access to the pedestrian footway network infrastructure located within Meliden, whilst to the south it provides access to Dysarth and the outskirts of Rhuddlan.

5.2.3 In addition to the footway provision provided between the site and the services and amenities located in Meliden, pedestrian crossing facilities are provided in the form of dropped kerbs and tactile paving at all major side junctions, whilst the following controlled crossing facilities are provided.

- Puffin crossing with dropped kerbs, tactile paving and guard railing located on A547 Ffordd Talargoch 60 metres south of The Grove.

- Puffin crossing with dropped kerbs, tactile paving and guard railing located on A547 Ffordd Talargoch 20 metres south of Ffordd Tanrallt.

5.2.4 The pedestrian and cycle network located within the Meliden area is displayed on the Denbighshire County Council Active Travel mapping for the area. Figure 5.1 below shows the provision in the area.

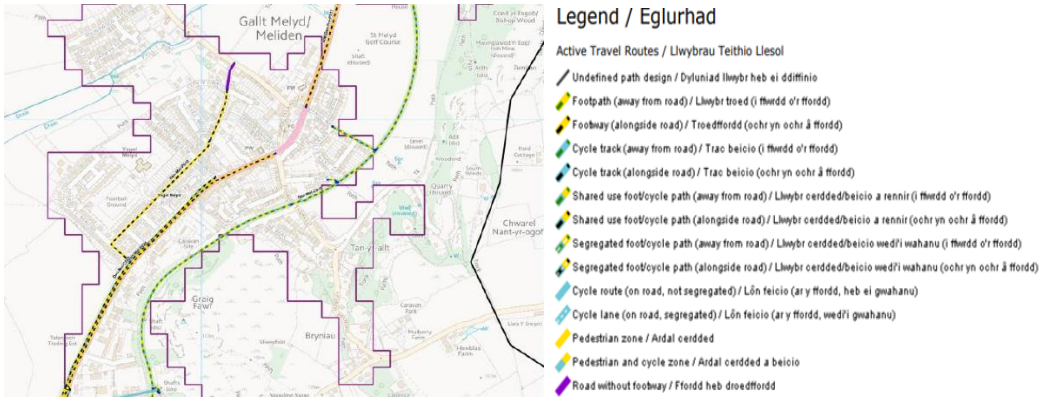

Figure 5.1 Meliden Active Travel Map (Source: DCC)

5.2.5 As previously stated, the development layout has been designed to link with these existing routes together with the existing PRoWs that are located in the vicinity of the site.

5.2.6 The Institute of Highways and Transportation (IHT) document 'Guidelines for Providing for Journeys on Foot', provides information on acceptable walking distances. Table 3.2 suggests distances for desirable, acceptable and preferred maximum walks to 'town centres', 'commuting/schools' and 'elsewhere'. The 'preferred maximum' distances are shown below in **Table 5.1**.

Suggested Preferred Maximum Walk		
Town Centre	**Commuting/School**	**Elsewhere**
800m	2,000m	1,200m

Table 5.1 IHT 'Providing for Journeys on Foot' Walk Distances'

5.2.7 Manual for Streets (MfS) continues the theme of the acceptability of the 2,000 metre distance in paragraph 4.4.1. This states that '*walkable neighbourhoods are typically characterised by having a range of facilities within 10 minutes' (up to about 800m) walking distance of residential areas which residents may access comfortably on foot. However, this is not an upper limit and PPS13 states that walking offers the greatest potential to replace short car trips, particularly those under 2 km*'.

5.2.8 **Table 5.2** below summarises this guidance in tabular form.

'Comfortable' Walk	'Preferred Maximum' Walk
800m	2,000m

Table 5.2 Manual for Streets Walk Distances

5.2.9 Further evidence that people will walk further than the suggested 'preferred maximum' distances in the IHT 'Providing for Journeys on Foot' is contained in a WYG Report entitled 'Accessibility – How Far Do People Walk and Cycle'. This report refers to National Travel Survey (NTS) data for the UK as a whole, excluding London, and confirms the following 85th percentile walk distances:

- All journey purposes – 1,930 metres;
- Commuting – 2,400 metres;

- Shopping – 1,600 metres;
- Education – 3,200 or 4,800 metres;
- Personal business – 1,600 metres.

5.2.10 Overall, in Table 5.1, the document states that 1,950 square metres is the 85th percentile distance for walking as the main mode of travel. **Table 5.3** below summarises the various 85th percentile walk distances suggested as guidelines in the WYG Study.

85th Percentile Walk Distances				Overall Recommended Preferred Max
All Journeys	Commuting	Shopping	Personal	
1,950m	2,100m	1,600m	1,600m	1,950m

Table 5.3 WYG Report/NTS Data Walk Distances

5.2.11 In summary, the distance of 1,950 metres, or around 2 kilometres, represents an acceptable maximum walking distance for the majority of land uses.

5.2.12 Section 3.1 of the CIHT guidance 'Planning for Walking' mentioned earlier in this report provides a useful reminder of the health benefits of walking. This states that:

'A brisk 20 minute walk each day could be enough to reduce an individual's risk of an early death.'

5.2.13 A 20-minute walk equates to a walking distance of around 1,600 metres.

5.2.14 In light of the above, a pedestrian catchment of 800 metres and 2 kilometres from the centre of the site, using all usable pedestrian routes, has been provided in **Plan 6**.

5.2.15 The 800 metre pedestrian catchment encompasses the majority of Meliden including the Ysgol Meld Primary School and One Stop Conveneniece store.

5.2.16 Whilst the 2,000-metre pedestrian catchment illustrates that almost the entirety of the Meliden as well as the southern areas of Prestatyn and the northern areas of Dyserth.

5.2.17 In a recent 2023 YouGov poll, respondents were asked to identify the local amenities they valued the most within a 15 minute walk of their home. The poll results highlight amenities that people consider essential for their day to day lives, such as, grocery stores, healthcare facilities and public transportation. The results of the YouGov Poll are displayed in **Figure 5.2** below:

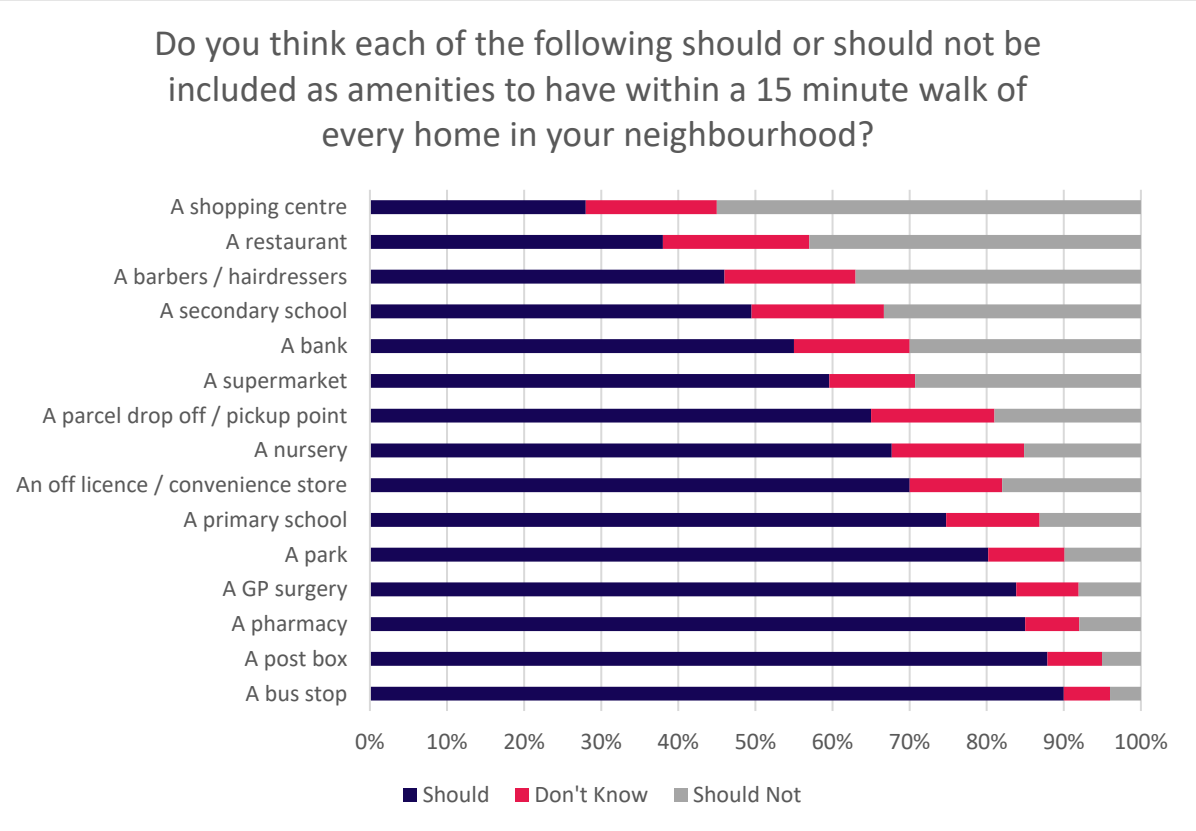

Figure 5.2 YouGov Poll Results (Source YouGov)

5.2.18 Figure 5.2 shows that the majority of respondents, approximately nine in ten, believe that having a bus stop (90%) and a post box (87%) within a short walk of their home is most important. Similarly, a significant proportion of Britons think that medical facilities like a pharmacy (85%) and a GP surgery (83%) should be easily accessible. Less than half of the respondents see the need for a shopping centre (28%), restaurant (38%), or hairdressers (46%) to be located nearby.

5.2.19 Plan 3 provides an illustrative indication of the areas that can be reached based on a leisurely walk from the site. The plan also displays nearby local amenities, as per those identified within the findings of the YouGov poll.

5.2.20 As can be seen in **Plan 6**, the site is located in close proximity to a number of a local amenities, including a bus stop, a post box, a pharmacy / GP surgery, and a local convenience store.

5.2.21 **Table 5.4** below, shows the walking distance from the centre point of the site to several of the local key amenities in the immediate vicinity of the site. The table also confirms whether or not the particular amenity is within the 'preferred maximum' walk distances using the above guideline criteria.

Local Amenity	Distance	Guidance Criteria	Meets with Guidance?
Ysgol Meld Primary School	800m	3,200m	**YES**
One Stop Convenience Store	1,000m	1,600m	**YES**
Pritchard's Pharmacy	1,100m	1,600m	**YES**
Miners Arms Public House	1,200m	1,600m	**YES**
Meliden Branch Surgery	1,200m	1,600m	**YES**
Saints Health and Fitness	1,400m	1,600m	**YES**

Table 5.4 Distance from Site to Local Facilities

5.2.22 Based on the review, it is considered that the existing pedestrian infrastructure will facilitate safe and direct pedestrian linkages between the site and numerous local services and amenities.

5.3 Access by Cycle

5.3.1 An alternative mode of travel to the site could be achieved by bicycle.

5.3.2 A distance of 5 kilometres is generally accepted as a distance where cycling has the potential to replace short car journeys. This distance equates to a journey of around 25 minutes based on a leisurely cycle speed of 12 kilometres per hour. The site's cycle catchment would encompass Meliden, Prestatyn, Dyserth, Rhuddlan and large parts of Rhyl.

5.3.3 In recent years, there has been a significant uptake in electric bikes, known as e-bikes. An e-bike features a pedal-assist motor which can propel the cyclist at 25kph, while the batteries are capable of c.100km on a single charge. Assuming a commute time of 25 minutes, a cyclist on an e bike would travel 10km, therefore, providing the opportunity for quicker and longer cycle trips, even in locations where the topography is undulating.

5.3.4 As previously stated and displayed in Figure 5.1, a shared pedestrian/cycleway is located on the western side of the A547 Ffordd Talargoch. To the north, the footway provision provides access to the pedestrian footway network infrastructure located within Meliden, whilst to the south it provides access to Dysarth and the outskirts of Rhuddlan.

5.3.5 The site can, therefore, be considered as being highly accessible by cycle.

5.4 Access by Bus

5.4.1 An effective public transport system is essential in providing good accessibility for large parts of the population to opportunities for work, education, shopping, leisure and healthcare in the town and beyond.

5.4.2 The nearest bus stops to the site are located along the A547 Ffordd Talargoch, to the north of the priority junction with Ffordd Ty Newydd. The bus stop located on the eastern side of the road is approximately 650 metres walking distance from the centre of the site. The bus stop located on the western side of the road is approximately 600 metres walking distance from the centre of the site. The bus stop on the western side of the road is sheltered, with seating and timetable provided.

5.4.3 A summary of the services available from the nearest bus stops from the development site is provided in **Table 5.5** below.

Service No	Route	Monday - Friday			Saturday			Sun
		Pre 08:00	08:00-17:00	Post 17:00	Pre 08:00	08:00-17:00	Post 17:00	
13	Llandudno - Prestatyn Bus Station - Clifton Road	-	Every 60 mins	5 services	-	Every 60 mins	5 services	6 services
36	Rhyl - Prestatyn via Dyserth, Rhuddlan Circular	4 services	Every 30 mins	5 services	4 services	Every 30 mins	5 services	Every 120 mins
F19	Flint - Holywell, Prestatyn - Rhyl	-	4 services	-	-	2 services	-	-

Table 5.5 Existing Bus Services Operating in the Vicinity of the Site

5.4.4 As can be seen from **Table 5.5**, the nearest bus stops to the site provides various services throughout the day to destinations such as Llandudno, Prestatyn, and Rhyl.

5.4.5 It is noted that the above services provide a choice of how people travel with the bus services operating from around 05:00am to around 01:00am, making travel by public transport a real alternative to travelling by car for commuting trips.

5.4.6 In order to demonstrate the level of accessibility some example journey times by bus are presented below **Table 5.6** below.

Destination	Duration
Prestatyn	5 mins
Rhyl	28 mins

Table 5.6 Example Bus Journey Times from the Site

5.4.7 The above table demonstrates that Prestatyn is around a 7-minute bus journey from the site, whilst Rhyl is just a 28-minute bus journey,

5.4.8 It is therefore concluded that the proposed development site is accessible by bus.

5.5 Access by Rail

5.5.1 The closest rail station to the site is Prestatyn, which is located 3km north-east of the site. The station can be accessed by a 7-minute bus journey via bus service 36 which runs along A547 Ffordd Talargoch.

5.5.2 Equally, the train station can also be accessed via a 9 minute cycle journey. There is currently secure cycle parking provision and storage at the station, as well as cycle hire.

5.5.3 The station is managed by Transport for Wales and has 2 platforms, offering 6 services per hour to destinations such as London Euston, Manchester Airport, Llandudno, Holyhead and Birmingham International.

5.5.4 This provides opportunities for commuting/leisure opportunities from the site via rail.

5.6 Non-Car Access Summary

5.6.1 The proposals have been considered in terms of access by non-car modes for the proposed development.

5.6.2 The following conclusions can be drawn from this section of the report:

- the site is well located to cater for trips on foot and provides potential for a high degree of pedestrian trips between the development and the local services and amenities located within Meliden.
- it has been demonstrated that the site is accessible by cycle, with designated cycle provision located within close proximity of the site.
- the services from the bus stops on travelling to destinations such as Prestatyn and Rhyl, shows that the proposed development can be considered as accessible by bus, and
- The site is accessible via rail with Prestatyn station located just a short bus or cycle journey away.

5.6.3 In light of the above, it is considered that the site is highly accessible and caters for needs of the development's residents and visitors. As such, this will assist in promoting a choice of travel modes other than the private car, as set out in PPW.

6 PROMOTING SMARTER CHOICES VIA TRAVEL PLANS

6.1 Introduction

6.1.1 To encourage resident and visitor travel to the site by non-car modes, a Travel Plan is proposed.

6.2 Travel Plan

6.2.1 A Framework Travel Plan is included in **Appendix 1**. The objective of the Travel Plan is the delivery of the objectives of National Planning Policy, i.e. to encourage residents to travel by non-car modes of travel. The Travel Plan outlines physical and management measures that are designed to achieve this objective.

6.2.2 The effectiveness of Travel Plans in assisting the use of non-car modes for journeys is intrinsically linked to the accessibility of a given site by means other than the private car.

6.2.3 The proposed development has been demonstrated to benefit from good non-car accessibility, and it should, therefore, be expected that the adoption of a Travel Plan would be effective.

7 TRAFFIC IMPACT ANALYSIS

7.1 Introduction

7.1.1 Having established that the proposed development site is accessible by modes of travel other than the private car and would be in general accordance with transport policies, the following section considers the traffic impact of the development proposals on the local highway network.

7.2 Assessment Criteria

7.2.1 Given the proposed land use, it is assumed reasonable to consider the AM and PM weekday peak hours as being those with the greatest impact on the local highway network.

7.3 Surveyed Traffic Flows

7.3.1 Before considering the potential changes in traffic that would occur on the local highway as a result of development proposals, the existing levels of traffic on the highway network in the vicinity of the site must first be established.

7.3.2 Traffic surveys were undertaken on Wednesday 1st October 2025 at the following locations:

- A547 Meliden Road/Ffordd Talargoch priority-controlled junctions.
- Ffordd Penrhwylfa/Ffordd Talargoch priority-controlled junction.
- A547 Ffordd Talargoch/B5119/Allt Y Graig priority-controlled junction.

7.3.3 The survey data is included at **Appendix 2**.

7.3.4 From the analysis, the weekday AM peak occurred between 0800 and 0900 hours, whilst the weekday PM peak occurred between 1645 and 1745 hours.

7.3.5 **Figures 1** and **2** show the 2025 surveyed traffic flows in passenger car units (PCUs), the unit of analysis, for the weekday AM and weekday PM peak periods respectively.

7.4 Growthed Flows

7.4.1 Information provided by the applicant indicates that the forecast year of the first occupation of the development will be 2028, therefore, an assessment year of 2033 has been assumed as this will be 5 years post opening of the development.

7.4.2 The future year traffic flow factors have been derived using TEMPro version 8.1. The application site falls with the Middle Super Output Area (MSOA) Denbighshire 008.

7.4.3 The resulting growth factors are as follows:

- 2025 to 2033 AM Peak – 1.0782
- 2025 to 2033 PM Peak – 1.0757.

7.4.4 The resultant 2033 growthed traffic flows are shown in **Figures 3** and **4** for the weekday AM and PM peak periods respectively.

7.5 Committed Development

7.5.1 It is our understanding that there are no major committed developments within the vicinity of the site that need to be included with this traffic impact analysis. As such, the growthed flows represent the base traffic flows.

7.6 Proposed Trip Distribution

7.6.1 In order to assign the proposed residential development trips to the local highway network, reference has been made to the Journey to Work (JtW) data for 'Location of Usual Residence and Place of Work' data available from the 2011 census.

7.6.2 The application site falls with the MSOA Denbighshire 008. The census data identifies the destination of residents travelling by car and, by using route planning software, the likely routes residents would take when travelling to the various destinations has been determined.

7.6.3 **Table 7.1** below summarises the route assumptions, whilst the full data is contained within **Appendix 3**.

Route	Trip Distribution %	
	Arrivals	Departures
A547 Ffordd Talargoch	51.6%	51.6%
B5119	13.5%	13.5%
A547 Meliden Road (N) then Victoria Road	3.0%	3.0%
A547 Meliden Road (N) then A548 Prestatyn Road	9.1%	9.1%
Allt Y Graig	22.8%	22.8%
Total	100%	100%

Table 7.1 – Proposed Trip Distribution

7.6.4 The resulting proposed trip distribution for the weekday peak periods is shown in **Figures 5**.

7.7 Proposed Development

7.7.1 It is proposed to development the site to provide a residential development of up to 155 dwellings (use class C3).

Proposed Residential Development Flows

7.7.2 In order to establish the person trip rates for the proposed residential development reference has been made to the TRICS database in the field of 'Residential – Privately Owned Properties' using the following parameters.

- Greater London and Republic of Ireland sites excluded.
- Range of sites between 50 and 300 units.
- Edge of Town, Suburban Area and Neighbourhood centre locations.
- Tuesday to Thursday surveys only.

7.7.3 The full TRICS Output is contained in **Appendix 4**.

7.7.4 The peak hour person trip rates and forecast trip generation based on a total of 155 residential units are shown within **Table 7.2** below.

Peak Period	Trip Rate (per unit)		Number of Trips		
	Arr	Dep	Arr	Dep	2-way
AM Peak Hour	0.241	0.814	37	126	164
PM Peak Hour	0.561	0.299	87	46	133

Table 7.2 Proposed Development Trip Rates and Trips (155 Units)

7.7.5 As can be seen from Table 7.3, the provision of 155 residential units is predicted to generate 164 two-way person trips during the weekday AM peak hour and 133 two-way trips during the weekday PM peak hour.

7.7.6 To calculate the proposed development vehicle trips, reference has been made to the 2011 Census and in particular the Method of Travel to Work data for the Denbighshire 008 MSOA which is where the site is located. **Table 7.3** below summarises the Modal Split data for the Denbighshire 008 MSOA, whist the modal split data is contained within **Appendix 4.**

Mode	Denbighshire 008 MSOA
Car (Driver)	73%
Car (Passenger)	5%
Public Transport	6%
Bicycle	1%
Walk	7%
Work from Home	8%
Other	0%
Total	**100%**

Table 7.3 Summary of Modal Share Data

7.7.7 The Car (driver) modal split of 73% has been applied to the total person trips, summarised in Table 7.3, and the resulting modal split trips for the proposed development are summarised in **Table 7.4,** below.

Mode	Proposed Trip Generation (155 Dwellings)			
	AM Peak		PM Peak	
	Arr	Dep	Arr	Dep
Work from Home	14		11	
Car Driver	**27**	**92**	**63**	**34**
Car Passenger	2	6	8	1
Public Transport	2	6	4	1
Bicycle	0	1	1	1
Walk	3	9	11	6

Table 7.4 Summary of Multi Modal Peak Hour Trips by Mode

7.7.8 As can be seen from Table 7.5, the provision of 155 residential units is predicted to generate 119 two-way car trips during the weekday AM peak hour and 97 two-way car trips during the weekday PM peak hour.

7.7.9 In order to assign the traffic, forecast to be generated by the proposed development, the trip distribution shown in the **Figures 5** has been utilised.

7.7.10 The resultant proposed development flows for the Weekday AM and PM peak hours are displayed in **Figures 6** and **7**, respectively.

7.8 With Development Flows

7.8.1 To calculate the 2033 'With Development' Flows, the proposed development flows contained in Figures 6 and 7 have been added to the 2033 Growthed Flows displayed in Figures 3 and 4. The resultant 2033 'With Development' Flows are displayed in **Figures 8** and **9**.

7.9 Changes in Traffic

7.9.1 Having determined the levels of traffic that could occur as a result of the proposed development proposals, the changes in traffic that would occur on the local highway network can be determined.

7.9.2 **Table 7.5**, below, summarises the changes in traffic on the network during the weekday AM and PM peak periods.

	2033 Base	2033 'With Dev'	Change in Traffic	Percentage Change
A547 Meliden Road/Ffordd Talargoch (South) priority-controlled junction				
AM Peak	1511	1525	+14	+0.9%
PM Peak	1572	1583	+11	+0.7%
A547 Meliden Road/Ffordd Talargoch (North) priority-controlled junction				
AM Peak	1469	1483	+14	+1.0%
PM Peak	1373	1384	+11	+0.8%
Ffordd Penrhwylfa/Ffordd Talargoch priority-controlled junction				
AM Peak	274	274	+0	+0.0%
PM Peak	385	385	+0	+0.0%
A547 Ffordd Talargoch/B5119/Allt Y Graig priority-controlled junction				
AM Peak	1740	1845	+105	+6.0%
PM Peak	1677	1763	+86	+5.1%

Table 7.5 Changes in Traffic Resulting from the Proposed Development

7.9.3 As can be seen above, the proposed development is forecast to result in minimal increases in changes with only the A547 Ffordd Talargoch/Dyserth Road/Waterfall Road priority-controlled junction forecast to have an increase over 5%. Notwithstanding the above, to assist the local highway authority with their

consideration of the traffic impact, capacity assessments have been undertaken at the following junctions.

- A547 Ffordd Talargoch/Proposed Site Access priority-controlled junction.
- A547 Meliden Road/Ffordd Talargoch North priority-controlled junction.
- A547 Meliden Road/Ffordd Talargoch South priority-controlled junction.
- A547 Ffordd Talargoch/B5119/Allt Y Graig priority-controlled junction.
- Ffordd Penrhwylfa/Ffordd Talargoch priority-controlled junction.

7.10 Capacity Assessments

A547 Ffordd Talargoch/Proposed Site Access Priority-controlled Junction

7.10.1 To assess the operation of the proposed A547 Ffordd Talargoch/Site Access priority-controlled junction, the computer program JUNCTIONS 11 has been utilised.

7.10.2 To ascertain the impacts of the proposed development, assessments have been undertaken using the 2033 'With Development' Flows. The results of this analysis are summarised below in **Table 7.6** whilst the full output is contained within **Appendix 5**.

Arm	2033 With Development Flows			
	Weekday AM		Weekday PM	
	RFC	Q	RFC	Q
Site Access	0.49	1	0.22	0
A547 Ffordd Talargoch (n)	0.01	0	0.04	0

Table 7.6 Summary of JUNCTIONS 11 Results for the A547 Ffordd Talargoch/Site Access Junction – 2033 With Development Flows

7.10.3 As can be seen in Table 7.6, the proposed A547 Ffordd Talargoch/Site Access junction is forecast to operate well within its theoretical capacity.

7.10.4 Based on the above it is concluded that the proposed site access junction can accommodate the levels of traffic forecast to be generated by the proposed development.

A547 Meliden Road/Ffordd Talargoch North Priority Controlled Junction

7.10.5 Capacity assessments of the A547 Meliden Road/Ffordd Talargoch North priority-controlled junction have been undertaken using the JUNCTIONS 11 program.

7.10.6 To ascertain the impacts of the proposed development, assessments have been undertaken using the 2033 Base Flows and 'With Development' Flows. The results of this analysis are summarised below in **Table 7.7** whilst the full output is contained within **Appendix 6**.

Movement	2033 Base Flows				2033 'With Dev' Flows			
	Weekday AM		Weekday PM		Weekday AM		Weekday PM	
	Max RFC	Max Queue	Max RFC	Max Queue	Max RFC	Max Queue	Max RFC	Max Queue
Fford Talargoch (n)	0.67	2	0.86	5	0.68	2	0.87	5

Table 7.7 Summary of JUNCTIONS11 Output A547 Meliden Road/Ffordd Talargoch North Junction – 2033 Base and With Development Flows

7.10.7 As can be seen from the above, the A547 Meliden Road/Ffordd Talargoch North junction is predicted to operate within its actual capacity in the Base scenarios. With the addition of the proposed development there is forecast to be minimal increases in the RFC and vehicle queuing.

7.10.8 Based on the above it is concluded that the proposed development will have a minimal impact on the operation of the A547 Meliden Road/Ffordd Talargoch North junction.

A547 Meliden Road/Ffordd Talargoch South Priority Controlled Junction

7.10.9 Capacity assessments of the A547 Meliden Road/Ffordd Talargoch South priority-controlled junction have been undertaken using the JUNCTIONS 11 program.

7.10.10 To ascertain the impacts of the proposed development, assessments have been undertaken using the 2033 Base Flows and 'With Development' Flows. The results of this analysis are summarised below in **Table 7.8** whilst the full output is contained within **Appendix 7**.

Movement	2033 Base Flows				2033 'With Dev' Flows			
	Weekday AM		Weekday PM		Weekday AM		Weekday PM	
	Max RFC	Max Queue	Max RFC	Max Queue	Max RFC	Max Queue	Max RFC	Max Queue
A547 Meliden Road (n)	0.06	0	0.18	0	0.07	0	0.18	0

Table 7.8 Summary of JUNCTIONS11 Output A547 Meliden Road/Ffordd Talargoch South Junction – 2033 Base and With Development Flows

7.10.11 As can be seen from the above, the A547 Meliden Road/Ffordd Talargoch South junction is predicted to operate within its theoretical capacity in the Base scenarios. With the addition of the proposed development there is forecast to be minimal increases in the RFC and vehicle queuing.

7.10.12 Based on the above it is concluded that the proposed development will have a minimal impact on the operation of the A547 Meliden Road/Ffordd Talargoch South junction.

A547 Ffordd Talargoch/B5119/Allt Y Graig Priority Controlled Junction

7.10.13 Capacity assessments of the A547 Ffordd Talargoch/B5119/Allt Y Graig priority-controlled junction have been undertaken using the JUNCTIONS 11 program.

7.10.14 To ascertain the impacts of the proposed development, assessments have been undertaken using the 2033 Base Flows and 'With Development' Flows. The results of this analysis are summarised below in **Table 7.9** whilst the full output is contained within **Appendix 8**.

Movement	2033 Base Flows				2033 'With Dev' Flows			
	Weekday AM		Weekday PM		Weekday AM		Weekday PM	
	Max RFC	Max Queue	Max RFC	Max Queue	Max RFC	Max Queue	Max RFC	Max Queue
Alt Y Graig Right	0.14	0	0.10	0	0.15	0	0.12	0
Alt Y Graig Left	0.23	0	0.18	0	0.28	0	0.27	0
A547 Ffordd Talargoch (s)	0.08	0	0.06	0	0.10	0	0.07	0
B5119	0.58	1	0.45	1	0.63	2	0.50	1
A547 Ffordd Talargoch (s)	0.07	0	0.03	0	0.08	0	0.03	0

Table 7.9 Summary of JUNCTIONS11 Output A547 Ffordd Talargoch/B5119/Allt Y Graig Junction – 2033 Base and With Development Flows

7.10.15 As can be seen from the above, the A547 Ffordd Talargoch/B5119/Allt Y Graig priority-controlled junction is predicted to operate within its theoretical capacity in the Base scenarios. With the addition of the proposed development there is forecast to be minimal increases in the RFC and vehicle queuing.

7.10.16 Based on the above it is concluded that the proposed development will have a minimal impact on the operation of the A547 Ffordd Talargoch/B5119/Allt Y Graig junction.

Ffordd Penrhwylfa/Ffordd Talargoch Junction

7.10.17 Capacity assessments of the Ffordd Penrhwylfa/Ffordd Talargoch priority-controlled junction have been undertaken using the JUNCTIONS 11 program.

7.10.18 To ascertain the impacts of the proposed development, assessments have been undertaken using the 2033 Base Flows and 'With Development' Flows. The results of this analysis are summarised below in **Table 7.11** whilst the full output is contained within **Appendix 8**.

Movement	2033 Base Flows				2033 'With Dev' Flows			
	Weekday AM		Weekday PM		Weekday AM		Weekday PM	
	Max RFC	Max Queue	Max RFC	Max Queue	Max RFC	Max Queue	Max RFC	Max Queue
Fford Talargoch	0.23	0	0.44	0	0.23	0	0.44	0

Table 7.11 Summary of JUNCTIONS11 Output Ffordd Penrhwylfa/Ffordd Talargoch Junction – 2033 Base and With Development Flows

7.10.19 As can be seen from the above, the Ffordd Penrhwylfa/Ffordd Talargoch junction is predicted to operate well within capacity for all assessment scenarios.

Impact on Wider Highway Network

7.10.20 To assist the local highway authority, consideration has been given to the impacts of the proposals on the wider highway network.

7.10.21 **Table 7.12** summarises the forecast in increases in traffic nearby junctions to the site which are under the jurisdiction of Denbighshire County Council.

Junction	Proposed Development Traffic	
	AM Peak	PM Peak
A548 Victoria Road/A548 Marine Road/Bastion Road	4	3
A548 Prestatyn Road/Nant Drive	10	9

Table 7.12 Summary of Proposed Development Flows On Wider Highway Network

7.10.22 As can be seen in Table 7.12, the proposed development is forecast to result in minimal increase in vehicle movements at the junctions in the vicinity of the application site.

7.10.23 Based on the above it is concluded that the proposed development will have a minimal impact on the operation of these junctions. Therefore, no detailed analysis of these junctions is required as part of this traffic impact analysis.

7.11 Traffic Impact Summary

7.11.1 In summary, the traffic impact analysis undertaken on the surrounding highway network has demonstrated the following.

- The proposed site access junction off the A547 Ffordd Talargoch/Site access junction has been designed to accord with highway design standards and will have sufficient capacity to accommodate the proposed development traffic.
- The proposed development will have a minimal impact on the operation of the A547 Meliden Road/Ffordd Talargoch North priority-controlled junction.
- The proposed development will have a minimal impact on the operation of the A547 Meliden Road/Ffordd Talargoch South priority-controlled junction.
- The proposed development will have a minimal impact on the operation of the A547 Ffordd Talargoch/B5119/Allt Y Graig priority-controlled junction.
- The proposed development will have a minimal impact on the operation the Ffordd Penrhwylfa/Ffordd Talargoch priority-controlled junction priority-controlled junction.

- The proposed development will have a minimal impact on the wider highway network.

7.11.2 It is therefore concluded that the development proposals will result in a minimal impact and can be accommodated on the local highway network.

8 ACCIDENT ANALYSIS

8.1 Introduction

8.1.1 In order to consider the potential impact of the development on road safety, a review of the Crashmap website (www.crashmap.co.uk) has been undertaken. The information provided on the website covered the five-year period 2020 to 2024, the latest data available in the vicinity of the development site.

8.1.2 The Crashmap accident data, including location maps are contained within **Appendix 10**.

8.2 Accident Analysis

8.2.1 For the purposes of this analysis, the study area has been split up into key areas to establish whether there are any particular accident hotspots on the local highway network. Each of the below listed areas have been considered in turn.

- A547 Ffordd Talargoch in the Vicinity of the Site Access.
- A547 Meliden Road/Ffordd Talargoch priority-controlled junctions.
- A547 Ffordd Talargoch/B5119/Allt Y Graig priority-controlled junction.
- Ffordd Penrhwylfa/Ffordd Talargoch priority-controlled junction.

A547 Ffordd Talargoch in the Vicinity of the Site Access

8.2.2 There were no reported accidents in the vicinity of the proposed site access junction. However, two reported accidents occurred on A547 Ffordd Talargoch around 150 metres south of the proposed site access junction.

8.2.3 One of these accidents resulted on a serious injury when two vehicles travelling in opposite directions. Whilst the remaining accident resulted in slight injury and occurred when a vehicle collided with a cyclist.

A547 Meliden Road/Ffordd Talargoch Priority Controlled Junctions

8.2.4 There were no reported accidents at these junctions during the study period.

A547 Ffordd Talargoch/B5119/Allt Y Graig Priority Controlled Junction

8.2.5 One accident has been reported at this junction during the study period. The accident resulted in slight injuries and occurred when vehicle turned right in the path of an on-coming vehicle and was the result of driver error.

Ffordd Penrhwylfa/Ffordd Talargoch Priority Controlled Junction

8.2.6 There have been two accidents reported in the vicinity of this junction within the study period. Both accidents resulted in slight injuries and involved pedestrian colliding with vehicles when crossing the road. Both of these accidents occurred due to driver error.

8.3 Accident Summary

8.3.1 The data reviewed has not identified any untypical accidents. The evidence shows that there are no particular engineering issues or problems with the road network or junction layouts.

8.3.2 The data reviewed has demonstrated that there are no particular road safety issues in the vicinity of the site.

8.3.3 It is not considered that the proposals for a residential development will unduly change the characteristics or nature of the surrounding highway network and as such will not have a detrimental impact on overall road safety.

9 CONCLUSIONS

9.1.1 Eddisons has been instructed by Castle Green Homes to advice on the traffic and transport issues relating to a planning application for a residential development on land off the A547 Ffordd Talargoch in Meliden, known as Mindale Farm.

9.1.2 A number of conclusions can be drawn from the report, namely:

- The proposed development will be accessed by safe and efficient vehicular access arrangement off the A547 Ffordd Talargoch.
- The proposed development site benefits from being accessible on foot and cycle to local services and amenities, but improvements will be provided as part of the development proposals.
- The site benefits from being located close to the bus stops located on the A547 Ffordd Talargoch which provides services that are ideally placed to cater for the needs of the development's residents.
- The site is located within a short bus or cycle journey of Prestatyn train station which provides access to services to destinations such as London Euston, Manchester Airport, Llandudno, Holyhead and Birmingham International.
- The traffic impact assessments indicate that the proposed development would be able to be accommodated on the local highway network. The proposals will have not result in a severe traffic impact on the local highway network.
- A Framework Travel Plan will be implemented to encourage the use of non-car modes.

9.1.3 In conclusion, the proposals for a residential development will provide a sustainable development in transport terms and planning permission should be granted in accordance with the Framework.

1 INTRODUCTION

1.1 Preamble

1.1.1 Eddisons has been instructed by Castle Green Homes to advice on the traffic and transport issues relating to a planning application for a residential development on land off the A547 Ffordd Talargoch in Meliden, known as Mindale Farm.

1.1.2 One of the UK's top priorities is to reduce transport's emissions of carbon dioxide and other greenhouse gases with the desired outcome of tackling climate change. To achieve this, society must improve and encourage the use of sustainable (low carbon) transport, whilst ensuring that new development takes place in accessible locations thereby minimising the need for travel.

1.1.3 This Travel Plan Framework has been prepared to accompany the planning application for the proposed development. It considers travel to and from the proposed development and outlines a number of suggested initiatives and measures that will allow sustainable travel modes to be positively promoted at the Mindale Farm development from day one. It seeks to encourage less travel, and where travel does occur, more sustainable journeys.

1.1.4 The measures identified within this Travel Plan will assist in promoting healthy and sustainable travel to, from and within the proposed development, and elsewhere within the community, in line with local, regional, and national policies.

1.2 Development Site and Location

1.3 The site is located within the village of Meliden approximately 800 metres north-west of the village centre. The location of the site is shown on **Plan 1.**

1.4 Development Proposals

1.4.1 The development proposals relate to a planning application for the development of 154 residential units on the site. The residential development will comprise of the following mix of house types.

- 12 x 1-Bedroom flats.
- 58 x 2-Bedroom units.
- 76 x 3-Bedroom dwellings.
- 8 x 4-Bedroom dwellings.

1.4.2 Vehicular access into the site will be provided for via a new priority-controlled access off the A547 Ffordd Talargoch approximately 75 metres south of the A547 Ffordd Talargoch/Ffordd Ty Newydd priority-controlled junction.

1.4.3 The proposed site layout is displayed in **Plan 2**.

1.5 Pedestrian and Cycle Access

1.5.1 Pedestrian and cycle access into the site will be afforded via the proposed vehicular access off the A547 Ffordd Talargoch which link with the existing provision on the A547 Ffordd Talargoch.

1.5.2 In addition, a further pedestrian/cycle access into the site will be provided on the eastern side of the site to link with the existing public footpath that links with Ffordd Ty Newydd. Whilst a further pedestrian link from the site is proposed in the north-east corner which links with the existing PRoW that runs along Maes Meurig.

1.5.3 The pedestrian and cycle provision detailed above together with the provision within the site will ensure that the application site is linked to the extensive provision located in the vicinity of the site, which in turn provide access to the local amenities and services located within the surrounding areas of Meliden.

1.6 The Travel Plan

1.6.1 The primary aim of this Travel Plan is to facilitate and encourage modes of travel other than single occupancy car.

1.6.2 The objectives of this Travel Plan include:

- Reduce reliance on single occupancy car journeys; • Encouraging less travel in general.
- Encouraging use of sustainable travel modes (which includes all non-single car occupancy modes).
- Promoting healthy lifestyles within the community; • Enabling residents to identify their travel choices.
- Promoting sustainability as a key factor of the development by raising the awareness of environmental damage, and
- Give weight to advocating means of travel that are beneficial to the health of those living on or visiting the site

1.7 Residents Travel Pack

1.7.1 The principal measure will consist of a Residents Travel Pack containing relevant material to promote non-car modes of travel and the provision of certain physical measures. This will be discussed further in Section 3.

1.8 Plan Administration

1.8.1 The developer will be required to designate a Travel Plan Co-ordinator prior to occupation of the site. Initially, the role is likely to be undertaken by a person employed by Castle Green Homes. Essentially this Co-ordinator will act as a main point of contact and liaison in implementing the Travel Plan with the local authority.

1.8.2 The name and contact details of the Travel Plan Co-ordinator will be provided to the Sustainable Travel Plan Officer at Denbighshire Council.

2 ACCESSBILITY OF SITE BY NON-CAR MODES

2.1 Introduction

2.1.1 In order to accord with the aspirations of the Planning Policy for Wales (PPW), any new proposals should extend the choice in transport and secure mobility in a way that supports sustainable development.

2.1.2 The principle of the PWW policy is to encourage sustainable travel as set out in paragraph 4.1.1:

The planning system should enable people to access jobs and services through shorter, more efficient and sustainable journeys, by walking, cycling and public transport. By influencing the location, scale, density, mix of uses and design of new development, the planning system can improve choice in transport and secure accessibility in a way which supports sustainable development, increases physical activity, improves health and helps to tackle the causes of climate change and airborne pollution.

2.1.3 New proposals should therefore be planned to influence the mode of travel to the development in terms of gaining a shift in modal split towards non-car modes, thus assisting in meeting the aspirations of current national and local planning policy.

2.1.4 The accessibility of the proposed site has been considered by the following modes of transport:

- access on foot.
- access by cycle.
- access by bus.
- access by rail.

2.2 Access on Foot

2.2.1 It is important to create a choice of direct, safe and attractive routes between where people live and where they need to travel in their day-to-day life. This philosophy clearly encourages the opportunity to walk whatever the journey purpose and also helps to create more active streets and a more vibrant neighbourhood.

2.2.2 A shared pedestrian/cycleway is located on the western side of the A547 Ffordd Talargoch and a footway with a width of 2 metres is located on the western side of the carriageway. To the north, the footway provision provides access to the pedestrian footway network infrastructure located within Meliden, whilst to the south it provides access to Dysarth and the outskirts of Rhuddlan.

2.2.3 In addition to the footway provision provided between the site and the services and amenities located in Meliden, pedestrian crossing facilities are provided in the form of dropped kerbs and tactile paving at all major side junctions, whilst the following controlled crossing facilities are provided.

- Puffin crossing with dropped kerbs, tactile paving and guard railing located on A547 Ffordd Talargoch 60 metres south of The Grove.

- Puffin crossing with dropped kerbs, tactile paving and guard railing located on A547 Ffordd Talargoch 20 metres south of Ffordd Tanrallt.

2.2.4 The pedestrian and cycle network located within the Meliden area is displayed on the Denbighshire County Council Active Travel mapping for the area. **Figure 2.1** below shows the provision in the area.

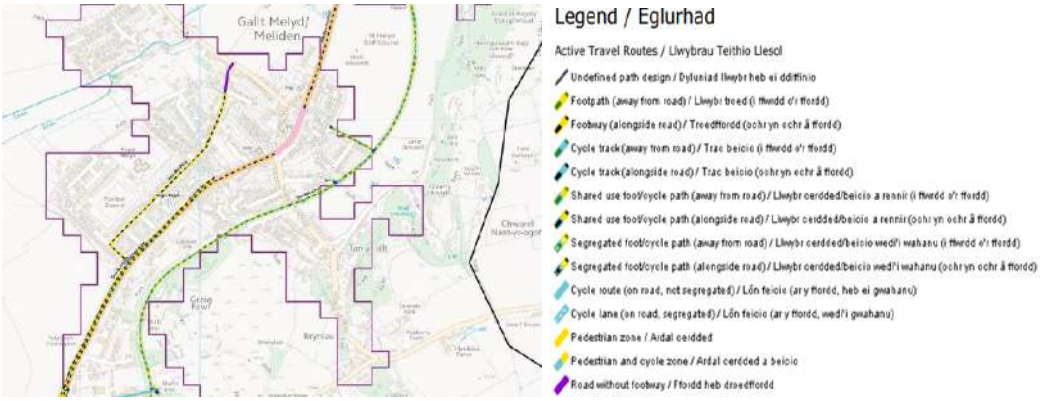

Figure 2.1 Meliden Active Travel Map (Source: DCC)

2.2.5 As previously stated, the development layout has been designed to link with these existing routes together with the existing PRoWs that are located in the vicinity of the site.

2.2.6 A pedestrian catchment of 800 metres and 2 kilometres from the centre of the site, using all usable pedestrian routes, has been provided in **Plan 6**. The 800 metre pedestrian catchment encompasses the majority of Meliden including the Ysgol Meld Primary School and One Stop Conveneniece store.

2.2.7 Whilst the 2,000-metre pedestrian catchment illustrates that almost the entirety of the Meliden as well as the southern areas of Prestatyn and the northern areas of Dyserth.

2.2.8 In a recent 2023 YouGov poll, respondents were asked to identify the local amenities they valued the most within a 15 minute walk of their home. The poll results highlight amenities that people consider essential for their day to day lives, such as, grocery stores, healthcare facilities and public transportation. The results of the YouGov Poll are displayed in **Figure 2.2** below:

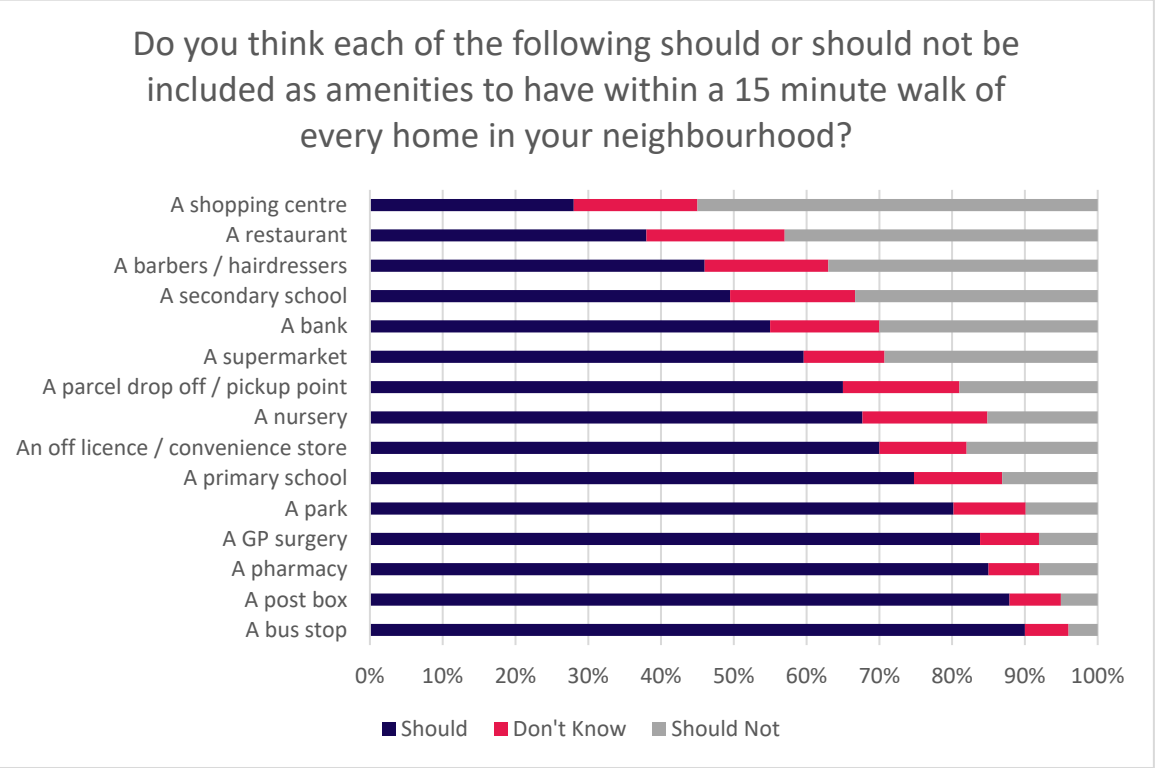

Figure 2.2 YouGov Poll Results (Source YouGov)

2.2.9 Figure 2.2 shows that the majority of respondents, approximately nine in ten, believe that having a bus stop (90%) and a post box (87%) within a short walk of their home is most important. Similarly, a significant proportion of Britons think that medical facilities like a pharmacy (85%) and a GP surgery (83%) should be easily accessible. Less than half of the respondents see the need for a shopping centre (28%), restaurant (38%), or hairdressers (46%) to be located nearby.

2.2.10 Plan 3 provides an illustrative indication of the areas that can be reached based on a leisurely walk from the site. The plan also displays nearby local amenities, as per those identified within the findings of the YouGov poll.

2.2.11 As can be seen in **Plan 6**, the site is located in close proximity to a number of a local amenities, including a bus stop, a post box, a pharmacy / GP surgery, and a local convenience store.

2.2.12 **Table 2.1** below, shows the walking distance from the centre point of the site to several of the local key amenities in the immediate vicinity of the site. The table also confirms whether or not the particular amenity is within the 'preferred maximum' walk distances using the above guideline criteria.

Local Amenity	Distance	Guidance Criteria	Meets with Guidance?
Ysgol Meld Primary School	800m	3,200m	**YES**
One Stop Convenience Store	1,000m	1,600m	**YES**
Pritchard's Pharmacy	1,100m	1,600m	**YES**
Miners Arms Public House	1,200m	1,600m	**YES**
Meliden Branch Surgery	1,200m	1,600m	**YES**
Saints Health and Fitness	1,400m	1,600m	**YES**

Table 2.1 Distance from Site to Local Facilities

2.2.13 Based on the review, it is considered that the existing pedestrian infrastructure will facilitate safe and direct pedestrian linkages between the site and numerous local services and amenities.

2.3 Access by Cycle

2.3.1 An alternative mode of travel to the site could be achieved by bicycle.

2.3.2 A distance of 5 kilometres is generally accepted as a distance where cycling has the potential to replace short car journeys. This distance equates to a journey of around 25 minutes based on a leisurely cycle speed of 12 kilometres per hour. The site's cycle catchment would encompass Meliden, Prestatyn, Dyserth, Rhuddlan and large parts of Rhyl.

2.3.3 In recent years, there has been a significant uptake in electric bikes, known as e-bikes. An e-bike features a pedal-assist motor which can propel the cyclist at 25kph, while the batteries are capable of c.100km on a single charge. Assuming a commute time of 25 minutes, a cyclist on an e bike would travel 10km, therefore, providing the opportunity for quicker and longer cycle trips, even in locations where the topography is undulating.

2.3.4 As previously stated and displayed in Figure 5.1, a shared pedestrian/cycleway is located on the western side of the A547 Ffordd Talargoch. To the north, the footway provision provides access to the pedestrian footway network infrastructure located within Meliden, whilst to the south it provides access to Dysarth and the outskirts of Rhuddlan.

2.3.5 The site can, therefore, be considered as being highly accessible by cycle.

2.4 Access by Bus

2.4.1 An effective public transport system is essential in providing good accessibility for large parts of the population to opportunities for work, education, shopping, leisure and healthcare in the town and beyond.

2.4.2 The nearest bus stops to the site are located along the A547 Ffordd Talargoch, to the north of the priority junction with Ffordd Ty Newydd. The bus stop located on the eastern side of the road is approximately 650 metres walking distance from the centre of the site. The bus stop located on the western side of the road is approximately 600 metres walking distance from the centre of the site. The bus stop on the western side of the road is sheltered, with seating and timetable provided.

2.4.3 A summary of the services available from the nearest bus stops from the development site is provided in **Table 2.3** below.

Service No	Route	Monday - Friday			Saturday			Sun
		Pre 08:00	08:00-17:00	Post 17:00	Pre 08:00	08:00-17:00	Post 17:00	
13	Llandudno - Prestatyn Bus Station - Clifton Road	-	Every 60 mins	5 services	-	Every 60 mins	5 services	6 services
36	Rhyl - Prestatyn via Dyserth, Rhuddlan Circular	4 services	Every 30 mins	5 services	4 services	Every 30 mins	5 services	Every 120 mins
F19	Flint - Holywell, Prestatyn - Rhyl	-	4 services	-	-	2 services	-	-

Table 2.3 Existing Bus Services Operating in the Vicinity of the Site

2.4.4 As can be seen from **Table 2.3**, the nearest bus stops to the site provides various services throughout the day to destinations such as Llandudno, Prestatyn, and Rhyl.

2.4.5 It is noted that the above services provide a choice of how people travel with the bus services operating from around 05:00am to around 01:00am, making travel by public transport a real alternative to travelling by car for commuting trips.

2.4.6 In order to demonstrate the level of accessibility some example journey times by bus are presented below **Table 2.4** below.

Destination	Duration
Prestatyn	5 mins
Rhyl	28 mins

Table 2.4 Example Bus Journey Times from the Site

2.4.7 The above table demonstrates that Prestatyn is around a 7-minute bus journey from the site, whilst Rhyl is just a 28-minute bus journey,

2.4.8 It is therefore concluded that the proposed development site is accessible by bus.

2.5 Access by Rail

2.5.1 The closest rail station to the site is Prestatyn, which is located 3km north-east of the site. The station can be accessed by a 7-minute bus journey via bus service 36 which runs along A547 Ffordd Talargoch.

2.5.2 Equally, the train station can also be accessed via a 9 minute cycle journey. There is currently secure cycle parking provision and storage at the station, as well as cycle hire.

2.5.3 The station is managed by Transport for Wales and has 2 platforms, offering 6 services per hour to destinations such as London Euston, Manchester Airport, Llandudno, Holyhead and Birmingham International.

2.5.4 This provides opportunities for commuting/leisure opportunities from the site via rail.

2.6 Non-Car Access Summary

2.6.1 The proposals have been considered in terms of access by non-car modes for the proposed development.

2.6.2 The following conclusions can be drawn from this section of the report:

- the site is well located to cater for trips on foot and provides potential for a high degree of pedestrian trips between the development and the local services and amenities located within Meliden.
- it has been demonstrated that the site is accessible by cycle, with designated cycle provision located within close proximity of the site.

- the services from the bus stops on travelling to destinations such as Prestatyn and Rhyl, shows that the proposed development can be considered as accessible by bus, and

- The site is accessible via rail with Prestatyn station located just a short bus or cycle journey away.

2.6.3 In light of the above, it is considered that the site is highly accessible and caters for needs of the development's residents and visitors. As such, this will assist in promoting a choice of travel modes other than the private car, as set out in PPW.

3 MANAGEMENT MEASURES

3.1 Introduction

3.1.1 The following Travel Plan measures will be implemented:

i) Resident's Travel Pack,

ii) Travel awareness and Information,

iii) Promotion of Lift Share Scheme, and

iv) Encouraging Walking/Cycling.

3.2 Resident's Travel Pack

3.2.1 It is an important and emerging principle in residential developments that where appropriate the implementation of travel plan type measures can establish a pattern of travel behaviour favouring sustainable modes from the inception of the development.

3.2.2 The proposed development is very well placed for encouraging access on foot or by cycle to a wide range of facilities. Similarly the existence of a local bus service will encourage choice of public transport as a primary means of travel for the development.

3.2.3 However, in order to build on these locational advantages it is recommended that a Residents' Travel Pack is provided for the occupants of each new dwelling.

3.2.4 The contents of such a travel pack would include information relating to walking and cycling routes in the area and the provision of up to date bus and rail timetable information as well as identification of the location of nearby amenity facilities as part of the information supplied to prospective purchasers.

3.2.5 The adoption of such travel packs is recognised as being an important element in ensuring that access by non-car modes is promoted from the earliest occupation of a residential development.

3.2.6 Within the Resident's Welcome Pack, residents will be encouraged to consider ways in which to reduce their need to travel such as home delivery for shopping and working from home. The first issue of the Resident's Travel Pack will be the responsibility of the house builder.

3.2.7 The provision of a Resident's Travel Pack will form part of the terms of the sale or occupancy of the dwellings and therefore they are aware in advance of what is required of them within the Travel Plan framework.

3.3 Travel Awareness and Information

3.3.1 Residents will be made aware of the existence of the Travel Plan and a copy of the plan will be made available to residents on purchasing a property.

3.3.2 As mentioned previously, Resident's Travel Packs will be issued for new residents moving into the development and prospective buyers will be made aware of the travel plan when viewing properties.

3.4 Car Sharing Scheme

3.4.1 The Travel Plan Co-ordinator will promote the use of car sharing scheme and employees will be encouraged to register on the Liftshare or Cowheels websites.

3.4.2 This allows users to register their details, where they are travelling to the Meliden area and if they are offering a lift or require a lift to their destination.

3.4.3 Travel Plan Co-ordinator will also investigate the viability of establishing a Car Sharing Club for the residential development, however, it is likely that the promotion of the above schemes will be more beneficial.

3.5 Encouraging Walking/Cycling

3.5.1 Residents will be provided with information and advice concerning safe pedestrian and cycle routes to the site through the provision of the Resident’s Travel Pack. Local and National campaigns for walking and cycling will also be promoted by the Travel Plan Co-ordinator.

3.5.2 To encourage pedestrian/cyclist links between the site and the surrounding area, the layout has been designed to link with the existing pedestrian provision located within the Meliden area.

3.5.3 The provision of walking/cycling signage will be investigated by the Travel Plan Co-ordinator, this signage could provide details on the routes and distances to and from local services and amenities in the area.

4 TRAVEL PLAN TARGETS

4.1 Introduction

4.1.1 This section of the Travel Plan will provide details of the targets against which the success of the Plan in achieving its objectives will be measured.

4.1.2 The targets are designed to be quantifiable, be relevant to both measures and objectives identified in the Plan and to include timescale.

4.1.3 In order to set the targets further information (e.g. through a travel survey) may have to be obtained in order to establish against which to set the targets. This information will be related to existing patterns of movement (i.e. the proportion of residents who travel to their workplace by non-car mode) and may be obtained from sources such as the National Travel Survey and the National Census.

4.1.4 Suitable targets for reducing the need to travel by private car will be set and agreed with Denbighshire County Council and included in the final Travel Plan for the development.

4.2 Initial Targets

4.2.1 Targets will be set now and may be modified once travel surveys have been carried out, and after each new set of travel surveys. Targets will be 'SMART' meaning:

- Site-specific.
- Measurable.
- Achievable.
- Realistic, and
- Time related.

4.2.2 A preliminary target has been set at a 10% reduction in single occupancy vehicle trips over the life of the Travel Plan. This takes into consideration the existing and proposed new and existing infrastructure in the vicinity of the site and the close proximity of local services to the development site.

4.3 Action Plan

4.3.1 **Table 4.1** below provides an Action Plan and timescales to assist the Travel Plan Co-ordinator (TPC) to implement the obligations of the Travel Plan.

Action	Target Date	Indicator/Measured by	Responsibility
Appointment of TPC	TPC appointed one month prior to first occupation of site	Appointment of TPC by target date	Developer
Production of Travel Pack	Upon Occupation	Resident travel survey	Developer/Travel Plan Co-ordinator
Undertake initial travel surveys	Within 1 month of reaching 75% occupation of development	Receipt of survey results	Travel Plan Co-ordinator
Agree Travel Plan Targets	1 month after initial travel survey undertaken	Receipt of written agreements of target	Travel Plan Co-ordinator
Achieve target car driver travel to work mode split	5 years after initial travel survey (75% occupation)	Multimodal resident travel surveys conducted in years 1, 3 and 5	Travel Plan Co-ordinator
Produce final Travel Plan	3 months following collection of initial Travel Surveys	Amend targets (if necessary) and submit final document to Local Authority	Travel Plan Co-ordinator

Table 4.1 Travel Plan Action Plan

4.3.2 The table above sets out the key tasks that will need to be undertaken by the Travel Plan Co-ordinator as part of the Travel Plan including guidance as to timescales for the tasks to be undertaken.

4.3.3 The above table includes the production of the final Travel Plan document which will be submitted to the Travel Officer at the Council within 3 months of the initial travel surveys.

	FA	FALKIRK	1 day

This section displays the number of survey days per TRICS® sub-region in the selected set.

Audit Code: b45240c2-be42-40a0-8ad2-b116627fcaf3

Primary Filtering Selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter:	DWELLS
Actual Range:	4 to 1817 (units:DWELLS)
Range Selected by User:	50 to 300 (units:DWELLS)
Parking Spaces Range:	6 - 2604

Public Transport Provision:

Selection by:	All Surveys Included
Date Range:	05/05/87 to 30/06/25

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Thursday	34 days
Tuesday	41 days
Wednesday	18 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	93
Direction ATC Count	0

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaking using machines

Selected Locations:

Edge of Town	60 days
Neighbourhood Centre	14 days
Suburban Area	19 days

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Development Zone	1 days
No Sub Category	9 days
Out of Town	3 days
Residential Zone	66 days
Village	14 days

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Inclusion of Servicing Vehicle Counts:

Servicing vehicles Excluded	85 days
Servicing vehicles Included	8 days

Secondary Filtering Selection:

Use Class:

C3	93 surveys

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order (England) 2020 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 500m Range:

200 - 8961

Population within 1 mile:

1,001 to 5,000	13 surveys
10,001 to 15,000	24 surveys
15,001 to 20,000	16 surveys
20,001 to 25,000	10 surveys
25,001 to 50,000	4 surveys
5,001 to 10,000	26 surveys

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

100,001 to 125,000	9 surveys
125,001 to 250,000	30 surveys
25,001 to 50,000	17 surveys
250,001 to 500,000	5 surveys
5,001 to 25,000	10 surveys
50,001 to 75,000	10 surveys
75,001 to 100,000	12 surveys

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	20 surveys
1.1 to 1.5	64 surveys
1.6 to 2.0	9 surveys

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Petrol filling station:

This data displays the number of surveys within the selected set that include petrol filling station activity, and the number of surveys that do not.

Travel Plan:

No	39 surveys
Yes	54 surveys

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	93 surveys

This data displays the number of surveys within the selected set that include petrol filling station activity, and the number of surveys that do not.

COVID-19 Restrictions:

Yes - At least one survey within the selected data set was undertaken at a time of Covid-19 restrictions

Total Rates:			**2.253**	**2.289**	**4.542**

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*

Audit Code: b45240c2-be42-40a0-8ad2-b116627fcaf3

Parameter Summary:

Trip rate parameter range selected:	50 - 300 (units: DWELLS)
Survey date date range:	04/07/2000 - 22/05/2025
Number of weekdays (Monday-Friday):	93
Number of Saturdays:	0
Number of Sundays:	0
Surveys automatically removed from selection:	37
Surveys manually removed from selection:	0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are show. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.

Summary of junction performance

	AM						PM					
	Set ID	Queue (PCU)	Delay (s)	RFC	Junction Delay (s)	Junction LOS	Set ID	Queue (PCU)	Delay (s)	RFC	Junction Delay (s)	Junction LOS
	2033 - with Development Flows											
Stream B-AC	D1	0.9	34.61	0.49	2.04	A	D2	0.3	26.81	0.22	0.64	A
Stream C-AB		0.0	4.02	0.01				0.1	4.52	0.04		

There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle. Junction LOS and Junction Delay are demand-weighted averages.

File summary

Jobnumber	
Enumerator	EDD\George.Monks
Description	

Units

Distance units	Speed units	Traffic units input	Traffic units results	Flow units	Average delay units	Total delay units	Rate of delay units
m	kph	PCU	PCU	perHour	s	-Min	perMin

Analysis Options

Vehicle length (m)	Calculate Queue Percentiles	Calculate detailed queueing delay	Show lane queues in feet / metres	Show all PICADY stream intercepts	Calculate residual capacity	RFC Threshold	Average Delay threshold (s)	Queue threshold (PCU)	Use simulation for HCM roundabouts	Use iterations for HCM roundabouts
5.75	✓					0.85	36.00	20.00		

Demand Set Summary

ID	Year	Scenario	Time period	Traffic profile type	Start time (HH:mm)	Finish time (HH:mm)	Time segment length (min)	Run automatically
D1	2033	with Development Flows	AM	ONE HOUR	08:00	09:30	15	✓
D2	2033	with Development Flows	PM	ONE HOUR	16:45	18:15	15	✓

Analysis Set Details

ID	Include in report	Network flow scaling factor (%)	Network capacity scaling factor (%)
A1	✓	100.000	100.000

2033 | with Development Flows | AM

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Queue variations	Analysis Options	Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.

Junction Network

Junctions

Junction	Name	Junction type	Arm A Direction	Arm B Direction	Arm C Direction	Use circulating lanes	Junction Delay (s)	Junction LOS
1	untitled	T-Junction	Two-way	Two-way	Two-way		2.04	A

Junction Network

Driving side	Lighting	Network delay (s)	Network LOS
Left	Normal/unknown	2.04	A

Arms

Arms

Arm	Name	Description	Arm type
A	Ffordd Talargoch (S)		Major
B	Site Access		Minor
C	Ffordd Talargoch (N)		Major

Major Arm Geometry

Arm	Width of carriageway (m)	Has kerbed central reserve	Has right-turn storage	Visibility for right turn (m)	Blocks?	Blocking queue (PCU)
C	6.00			79.0	✓	0.00

Geometries for Arm C are measured opposite Arm B. Geometries for Arm A (if relevant) are measured opposite Arm D.

Minor Arm Geometry

Arm	Minor arm type	Lane width (m)	Visibility to left (m)	Visibility to right (m)
B	One lane	2.50	20	53

Slope / Intercept / Capacity

Priority Intersection Slopes and Intercepts

Stream	Intercept (PCU/hr)	Slope for A-B	Slope for A-C	Slope for C-A	Slope for C-B
B-A	485	0.088	0.223	0.140	0.319
B-C	624	0.096	0.242	-	-
C-B	620	0.240	0.240	-	-

The slopes and intercepts shown above include custom intercept adjustments only.

Streams may be combined, in which case capacity will be adjusted.

Values are shown for the first time segment only; they may differ for subsequent time segments.

Traffic Demand

Demand Set Details

There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle.

File summary

File Description

Title	A547 Meliden Road - Ffordd Talargoch
Location	Prestatyn
Site number	
Date	10/10/2025
Version	
Status	(new file)
Identifier	
Client	
Jobnumber	4433
Enumerator	EDD
Description	Based on existing arrangement.

Units

Distance units	Speed units	Traffic units input	Traffic units results	Flow units	Average delay units	Total delay units	Rate of delay units
m	kph	PCU	PCU	perHour	s	-Min	perMin

Analysis Options

Vehicle length (m)	Calculate Queue Percentiles	Calculate detailed queueing delay	Show lane queues in feet / metres	Show all PICADY stream intercepts	Calculate residual capacity	RFC Threshold	Average Delay threshold (s)	Queue threshold (PCU)	Use simulation for HCM roundabouts	Use iterations for HCM roundabouts
5.75	✓					0.85	36.00	20.00		

Demand Set Summary

ID	Year	Scenario	Time period	Traffic profile type	Start time (HH:mm)	Finish time (HH:mm)	Time segment length (min)	Run automatically
D1	2025	Surveyed	AM	ONE HOUR	00:00	01:30	15	✓
D2	2025	Surveyed	PM	ONE HOUR	17:00	18:30	15	✓
D3	2033	Base Flows	AM	ONE HOUR	00:00	01:30	15	✓
D4	2033	Base Flows	PM	ONE HOUR	17:00	18:30	15	✓
D5	2033	with Development Flows	AM	ONE HOUR	00:00	01:30	15	✓
D6	2033	with Development Flows	PM	ONE HOUR	17:00	18:30	15	✓

Analysis Set Details

ID	Include in report	Network flow scaling factor (%)	Network capacity scaling factor (%)
A1	✓	100.000	100.000

2025 | Surveyed | AM

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Queue variations	Analysis Options	Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.

Junction Network

Junctions

Junction	Name	Junction type	Arm A Direction	Arm B Direction	Arm C Direction	Use circulating lanes	Junction Delay (s)	Junction LOS
1	untitled	T-Junction	Two-way	Entry Only	Two-way		7.05	A

Junction Network

Driving side	Lighting	Network delay (s)	Network LOS
Left	Normal/unknown	7.05	A

Arms

Arms

Arm	Name	Description	Arm type
A	A547 Meliden Road (S)		Major
B	Ffordd Talargoch		Minor
C	A547 Meliden Road (N)		Major

Major Arm Geometry

Arm	Width of carriageway (m)	Has kerbed central reserve	Has right-turn storage	Visibility for right turn (m)	Blocks?	Blocking queue (PCU)
C	7.80			100.0	✓	1.00

Geometries for Arm C are measured opposite Arm B. Geometries for Arm A (if relevant) are measured opposite Arm D.

Minor Arm Geometry

Arm	Minor arm type	Lane width (m)	Visibility to left (m)	Visibility to right (m)
B	One lane	2.20	0	0

Slope / Intercept / Capacity

Priority Intersection Slopes and Intercepts

Stream	Intercept (PCU/hr)	Slope for A-B	Slope for A-C	Slope for C-A	Slope for C-B
B-A	440	0.074	0.187	0.117	0.266
B-C	574	0.081	0.205	-	-
C-B	632	0.226	0.226	-	-

The slopes and intercepts shown above include custom intercept adjustments only.

Streams may be combined, in which case capacity will be adjusted.

Values are shown for the first time segment only; they may differ for subsequent time segments.

Traffic Demand

Demand Set Details

ID	Year	Scenario	Time period	Traffic profile type	Start time (HH:mm)	Finish time (HH:mm)	Time segment length (min)	Run automatically

There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle. Junction LOS and Junction Delay are demand-weighted averages. Network Residual Capacity indicates the amount by which network flow could be increased before a user-definable threshold (see Analysis Options) is met.

File summary

File Description

Title	A547 - Ffordd Penrhwylfa
Location	Prestatyn
Site number	
Date	10/10/2025
Version	
Status	(new file)
Identifier	
Client	
Jobnumber	4433
Enumerator	EDD
Description	Based on existing.

Units

Distance units	Speed units	Traffic units input	Traffic units results	Flow units	Average delay units	Total delay units	Rate of delay units
m	kph	PCU	PCU	perHour	s	-Min	perMin

Analysis Options

Vehicle length (m)	Calculate Queue Percentiles	Calculate detailed queueing delay	Show lane queues in feet / metres	Show all PICADY stream intercepts	Calculate residual capacity	Residual capacity criteria type	RFC Threshold	Average Delay threshold (s)	Queue threshold (PCU)	Use simulation for HCM roundabouts	Use iterations for HCM roundabouts
5.75	✓				✓	Delay	0.85	36.00	20.00		

Demand Set Summary

ID	Year	Scenario	Time period	Traffic profile type	Start time (HH:mm)	Finish time (HH:mm)	Time segment length (min)	Run automatically

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Minor arm visibility to right	Arm B - Minor arm geometry	Visibility to right expected to have two components if the arm has two lanes, or two lanes in a flared section.
Warning	Queue variations	Analysis Options	Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.

Junction Network

Junctions

Junction	Name	Junction type	Arm A Direction	Arm B Direction	Arm C Direction	Use circulating lanes	Junction Delay (s)	Junction LOS
1	untitled	T-Junction	Two-way	Exit Only	Two-way		0.14	A

Junction Network

Driving side	Lighting	Network residual capacity (%)	First arm reaching threshold	Network delay (s)	Network LOS
Left	Normal/unknown	164	Stream C-B	0.14	A

Arms

Arms

Arm	Name	Description	Arm type
A	A547 (S)		Major
B	Ffordd Penrhwylfa		Minor
C	A547 (N)		Major

Major Arm Geometry

Arm	Width of carriageway (m)	Has kerbed central reserve	Has right-turn storage	Visibility for right turn (m)	Blocks?	Blocking queue (PCU)
C	7.00			100.0		-

Geometries for Arm C are measured opposite Arm B. Geometries for Arm A (if relevant) are measured opposite Arm D.

Minor Arm Geometry

Arm	Minor arm type	Lane Width (Left) (m)	Lane Width (Right) (m)	Visibility to left (m)	Visibility to right (m)
B		3.45	3.45		

Slope / Intercept / Capacity

Priority Intersection Slopes and Intercepts

Stream	Intercept (PCU/hr)	Slope for A-B	Slope for A-C	Slope for C-A	Slope for C-B
B-A	517	0.090	0.228	0.143	0.325
B-C	665	0.098	0.247	-	-
C-B	632	0.234	0.234	-	-

The slopes and intercepts shown above include custom intercept adjustments only.

Streams may be combined, in which case capacity will be adjusted.

Values are shown for the first time segment only; they may differ for subsequent time segments.

2025 | Surveyed | PM

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Minor arm visibility to right	Arm B - Minor arm geometry	Visibility to right expected to have two components if the arm has two lanes, or two lanes in a flared section.
Warning	Queue variations	Analysis Options	Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.

Junction Network

Junctions

Junction	Name	Junction type	Arm A Direction	Arm B Direction	Arm C Direction	Use circulating lanes	Junction Delay (s)	Junction LOS

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Minor arm visibility to right	Arm B - Minor arm geometry	Visibility to right expected to have two components if the arm has two lanes, or two lanes in a flared section.
Warning	Queue variations	Analysis Options	Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.

There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle. Junction LOS and Junction Delay are demand-weighted averages. Network Residual Capacity indicates the amount by which network flow could be increased before a user-definable threshold (see Analysis Options) is met.

File summary

File Description

Title	A547 Ffordd Talargoch - Allt Y Graig - A547 - B5119 Crossroads
Location	Prestatyn
Site number	
Date	10/10/2025
Version	
Status	(new file)
Identifier	
Client	
Jobnumber	4433
Enumerator	EDD
Description	Based on existing arrangement.

Units

Distance units	Speed units	Traffic units input	Traffic units results	Flow units	Average delay units	Total delay units	Rate of delay units
m	kph	PCU	PCU	perHour	s	-Min	perMin

Analysis Options

Vehicle length (m)	Calculate Queue Percentiles	Calculate detailed queueing delay	Show lane queues in feet / metres	Show all PICADY stream intercepts	Calculate residual capacity	Residual capacity criteria type	RFC Threshold	Average Delay threshold (s)	Queue threshold (PCU)	Use simulation for HCM roundabouts	Use iterations for HCM roundabouts
5.75	✓				✓	Delay	0.85	36.00	20.00

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Minor arm visibility to right	Arm B - Minor arm geometry	Visibility to right expected to have two components if the arm has two lanes, or two lanes in a flared section.
Warning	Queue variations	Analysis Options	Queue Variations cannot be calculated for crossroads.
Warning	Queue variations	Analysis Options	Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.

Junction Network

Junctions

Junction	Name	Junction type	Arm A Direction	Arm B Direction	Arm C Direction	Arm D Direction	Use circulating lanes	Junction Delay (s)	Junction LOS
1	untitled	Crossroads	Two-way	Two-way	Two-way	Two-way		2.96	A

Junction Network

Driving side	Lighting	Network residual capacity (%)	First arm reaching threshold	Network delay (s)	Network LOS
Left	Normal/unknown	8	Stream D-ABC	2.96	A

Arms

Arms

Arm	Name	Description	Arm type
A	A547 Ffordd Talargoch (N)		Major
B	Allt Y Graig		Minor
C	A547 (S)		Major
D	B5119		Minor

Major Arm Geometry

Arm	Width of carriageway (m)	Has kerbed central reserve	Has right-turn storage	Width for right-turn storage (m)	Visibility for right turn (m)	Blocks?	Blocking queue (PCU)
A	7.70		✓	3.50	100.0	✓	4.00
C	7.70		✓	3.50	130.0	✓	3.00

Geometries for Arm C are measured opposite Arm B. Geometries for Arm A (if relevant) are measured opposite Arm D.

Minor Arm Geometry

Arm	Minor arm type	Lane width (m)	Width at give-way (m)	Width at 5m (m)	Width at 10m (m)	Width at 15m (m)	Width at 20m (m)	Estimate flare length	Flare length (PCU)	Visibility to left (m)	Visibility to right (m)
B	One lane plus flare		10.00	5.40	3.20	3.10	3.10	✓	1.00	32	32
D	One lane	3.40								33	27

Slope / Intercept / Capacity

Priority Intersection Slopes and Intercepts

Stream	Intercept (PCU/hr)	Slope for A-B	Slope for A-C	Slope for A-D	Slope for B-A	Slope for B-C	Slope for B-D	Slope for C-A	Slope for C-B	Slope for C-D	Slope for D-A	Slope for D-B	Slope for D-C

2025 | Surveyed | PM

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Minor arm visibility to right	Arm B - Minor arm geometry	Visibility to right expected to have two components if the arm has two lanes, or two lanes in a flared section.
Warning	Queue variations	Analysis Options	Queue Variations cannot be calculated for crossroads.
Warning	Queue variations	Analysis Options	Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.

Junction Network

Junctions

Junction	Name	Junction type	Arm A Direction	Arm B Direction	Arm C Direction	Arm D Direction	Use circulating lanes	Junction Delay (s)	Junction LOS
1	untitled	Crossroads	Two-way	Two-way	Two-way	Two-way		2.04	A

Junction Network

Driving side	Lighting	Network residual capacity (%)	First arm reaching threshold	Network delay (s)	Network LOS
Left	Normal/unknown	17	Stream D-ABC	2.04	A

Traffic Demand

Demand Set Details

ID	Year	Scenario	Time period	Traffic profile type	Start time (HH:mm)	Finish time (HH:mm)	Time segment length (min)	Run automatically
D2	2025	Surveyed	PM	ONE HOUR	17:00	18:30	15	✓

2033 | with Development Flows | AM

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Minor arm visibility to right	Arm B - Minor arm geometry	Visibility to right expected to have two components if the arm has two lanes, or two lanes in a flared section.
Warning	Queue variations	Analysis Options	Queue Variations cannot be calculated for crossroads.
Warning	Queue variations	Analysis Options	Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.

Junction Network

Junctions

Junction	Name	Junction type	Arm A Direction	Arm B Direction	Arm C Direction	Arm D Direction	Use circulating lanes	Junction Delay (s)	Junction LOS
1	untitled	Crossroads	Two-way	Two-way	Two-way	Two-way		4.33	A

Junction Network

Driving side	Lighting	Network residual capacity (%)	First arm reaching threshold	Network delay (s)	Network LOS
Left	Normal/unknown	-3	Stream D-ABC	4.33	A

Traffic Demand

Demand Set Details

ID	Year	Scenario	Time period	Traffic profile type	Start time (HH:mm)	Finish time (HH:mm)	Time segment length (min)	Run automatically

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Minor arm visibility to right	Arm B - Minor arm geometry	Visibility to right expected to have two components if the arm has two lanes, or two lanes in a flared section.
Warning	Queue variations	Analysis Options	Queue Variations cannot be calculated for crossroads.
Warning	Queue variations	Analysis Options	Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.

There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle. Junction LOS and Junction Delay are demand-weighted averages. Network Residual Capacity indicates the amount by which network flow could be increased before a user-definable threshold (see Analysis Options) is met.

File summary

File Description

Title	Ffordd Penrhwylfa - Ffordd Talagoch
Location	Prestatyn
Site number	
Date	10/10/2025
Version	
Status	(new file)
Identifier	
Client	
Jobnumber	4433
Enumerator	EDD
Description	Based on existing arrangement.

Units

Distance units	Speed units	Traffic units input	Traffic units results	Flow units	Average delay units	Total delay units	Rate of delay units
m	kph	PCU	PCU	perHour	s	-Min	perMin

Analysis Options

Vehicle length (m)	Calculate Queue Percentiles	Calculate detailed queueing delay	Show lane queues in feet / metres	Show all PICADY stream intercepts	Calculate residual capacity	Residual capacity criteria type	RFC Threshold	Average Delay threshold (s)	Queue threshold (PCU)	Use simulation for HCM roundabouts	Use iterations for HCM roundabouts
5.75	✓				✓	Delay	0.85	36.00	20.00		

Demand Set Summary

A1	✓	100.000	100.000

2025 | Surveyed | AM

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Queue variations	Analysis Options	Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.

Junction Network

Junctions

Junction	Name	Junction type	Arm A Direction	Arm B Direction	Arm C Direction	Use circulating lanes	Junction Delay (s)	Junction LOS
1	untitled	T-Junction	Two-way	Entry Only	Two-way		3.43	A

Junction Network

Driving side	Lighting	Network residual capacity (%)	First arm reaching threshold	Network delay (s)	Network LOS
Left	Normal/unknown	245	Stream B-AC	3.43	A

Arms

Arms

Arm	Name	Description	Arm type
A	Ffordd Talagoch (E)		Major
B	Ffordd Talagoch (S)		Minor
C	Ffordd Penrhwylfa (W)		Major

Major Arm Geometry

Arm	Width of carriageway (m)	Has kerbed central reserve	Has right-turn storage	Visibility for right turn (m)	Blocks?	Blocking queue (PCU)
C	6.70			50.0		-

Geometries for Arm C are measured opposite Arm B. Geometries for Arm A (if relevant) are measured opposite Arm D.

Minor Arm Geometry

Arm	Minor arm type	Lane width (m)	Visibility to left (m)	Visibility to right (m)
B	One lane	3.70	30	35

Slope / Intercept / Capacity

Priority Intersection Slopes and Intercepts

Stream	Intercept (PCU/hr)	Slope for A-B	Slope for A-C	Slope for C-A	Slope for C-B
B-A	540	0.095	0.241	0.152	0.344
B-C	691	0.103	0.260	-	-
C-B	603	0.226	0.226	-	-

The slopes and intercepts shown above include custom intercept adjustments only.

Streams may be combined, in which case capacity will be adjusted.

Values are shown for the first time segment only; they may differ for subsequent time segments.
